WARD LINES.

CITY OF NEW BEDFORD,
IN BOARD OF ALDERMEN,
April 12, 1906.

Ordered, That in conformity with the REVISED LAWS OF MASSACHUSETTS, and under authority of Section 14 of Chapter 423 of the Acts of the Legislature in the year 1904, the several wards of the city, until the first day of May, 1915, and until otherwise ordered, be and they are hereby divided and established according to the following described lines, said division and designation to take effect, for the purposes described in Section 164, Chapter 11, Revised Laws, on January 1, 1907.

Ward One. All that portion of the city lying north and east of a line beginning at the river and drawn westerly through the center of Linden street to the center of Pleasant street, thence northerly through the center of Pleasant street to the center of Weld street, thence westerly through the center of Weld street to the center of County street, thence northerly through the center of County street to the westerly line of location of the Old Colony Railroad, thence northerly and westerly by the westerly line of location of the Old Colony Railroad and the southerly line of location of the Fall River Branch Railroad to the west line of the city, will constitute Ward One.

Ward Two. All that portion of the city lying between a line drawn from the river westerly through the center of Linden street to the center of Pleasant street, thence northerly through the center of Pleasant street to the center of Weld street, thence westerly through the center of Weld street to the center of County street, thence northerly through the center of County street to the westerly line of location of the Old Colony Railroad, thence northerly and westerly by the westerly line of location of the Old Colony Railroad and the southerly line of location of the Fall River Branch Railroad to the west line of the city, and a line drawn from the river through the center of Pope street westerly to the center of Cottage street, thence southerly through the center of Cottage street to the center of Parker street, thence westerly through the center of Parker street to the west line of the city, will constitute Ward Two.

Ward Three. All that portion of the city lying between a line drawn from the river westerly through the center of Pope street to the center of Cottage street, thence southerly through the center of Cottage street to the center of Parker street, thence westerly through the center of Parker street to the west line of the city, and a line drawn from the river westerly through the centre of Kempton street to the center of Summer street, thence northerly through the center of Summer street to the center of Mill street, thence westerly through the center of Mill street to the center of Kempton street, thence westerly through the center of Kempton street to the west line of the city, will constitute Ward Three.

Ward Four. All that portion of the city lying between a line drawn from the river westerly through the center of Kempton street to the center of Summer street, thence northerly through the center

of Summer street to the center of Mill street, thence westerly through the center of Mill street to the center of Kempton street, thence westerly through the center of Kempton street to the west line of the city, and a line drawn from the river westerly through the center of School street to the center of County street, thence southerly through the center of County street to the center of Clinton street, thence westerly through the center of Clinton street to the center of Park street, thence northerly through the center of Park street to the center of Arnold street, thence westerly through the center of Arnold street to the west line of the city, including Fish Island and Pope's Island, will constitute Ward Four.

Ward Five. All that portion of the city lying between a line drawn from the river westerly through the center of School street to the center of County street, thence southerly through the center of County street to the center of Clinton street, thence westerly through the center of Clinton street to the center of Park street, thence northerly through the center of Park street to the center of Arnold street, thence westerly through the center of Arnold street to the west line of the city, and a line drawn from the river westerly through the center of South street to the center of County street, thence southerly through the center of County street to the center of Fair street, thence westerly through the center of Fair street to the center of Bonney street, thence southerly through the center of Bonney street to the center of Rockland street, thence westerly through the center of Rockland street to the center of Dartmouth street, thence northerly through the center of Dartmouth street to the center of Oak street, thence westerly through the center of Oak street to the center of Grape street, thence westerly through the center of Grape street to the center of Rockdale avenue, thence northerly through the center of Rockdale avenue to the center of Allen street, thence westerly through the center of Allen street to the west line of the city, will constitute Ward Five.

Ward Six. All that portion of the city lying south of a line drawn from the river westerly through the center of South street to the center of County street, thence southerly through the center of County street to the center of Fair street, thence westerly through the center of Fair street to the center of Bonney street, thence southerly through the center of Bonney street to the center of Rockland street, thence westerly through the center of Rockland street to the center of Dartmouth street, thence northerly through the center of Dartmouth street to the center of Oak street, thence westerly through the center of Oak street to the center of Grape street, thence westerly through the center of Grape street to the center of Rockdale avenue, thence northerly through the center of Rockdale avenue to the center of Allen street, thence westerly through the center of Allen street to the west line of the city, including Palmer's Island, will constitute Ward Six.

Adopted in concurrence.

Presented to and approved by the Mayor, April 13, 1906.

A true copy, attest:

DANIEL B. LEONARD,
City Clerk.

VOTING PRECINCTS.

CITY OF NEW BEDFORD,
IN BOARD OF ALDERMEN,
June 28, 1906.

Ordered, That the several Wards of the city as divided and established April 12, 1906, to take effect January 1, 1907, be and they are hereby divided as provided by Section 162 and Section 163 of Chapter 11 of the REVISED LAWS into voting precincts for the holding of all meetings for the choice of all officers who are elective by the people, and that the dividing lines of said precincts be as is hereinafter defined.

IN WARD ONE.

All that part of Ward One lying north of a line beginning at a point in the channel of the Acushnet River, formed by the extension of the centre line of Shaw street; thence westerly in said extended line and in the centre of Shaw street to the centre line of Acushnet avenue; thence northerly in the centre line of Acushnet avenue to the centre line of Shaw street; thence westerly in the centre line of Shaw street to the westerly line of location of the Old Colony R. R.; thence northwesterly in a straight line to the junction of Mt. Pleasant street and King's Highway; thence westerly in a straight line to the junction of Shawmut avenue and a way; thence continuing westerly in the same straight line to the boundary line between the town of Dartmouth and the City of New Bedford, shall be known and called Precinct "A."

All that part of said Ward lying south of the above described line and north of a line beginning at a point in the channel of the Acushnet River, formed by the extension of a line in the centre of Deane street; thence westerly in said extended line and in the centre of Deane street to the westerly line of location of the Fall River branch of the Old Colony R. R.; thence northwesterly by said southerly line of location to the boundary line between the town of Dartmouth and the city of New Bedford, shall be known and called Precinct "One."

All that part of said ward lying south of the above described line and north of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Two.

Beginning at a point in the channel of the Acushnet River formed by the extension of the center line of Coggeshall street; thence westerly in said extended line and in the center of Coggeshall street to the center of County street; thence northerly in the center of County street to the westerly side line of location of the Old Colony R. R.; and thence in said westerly side line of location to intersection with the southerly line of Precinct Number One.

All that part of said ward lying south of the last described line of Coggeshall street to County street shall be and is hereby made a voting precinct to be known as Precinct Number Three.

IN WARD TWO.

All that part of said ward lying east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Four; beginning at the intersection of the center line of Pope street with the center line of County street; thence northerly through the center of County street.

All that part of said ward lying west of the last described line in County street and east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Five; beginning at the intersection of the center line of Pope street with the center line of Cottage street; thence northerly through the center of Cottage street and of Mt. Pleasant street to the southerly line of location of the Fall River branch of the Old Colony R. R.

All that part of said ward lying west of the last described line in Cottage street and Mt. Pleasant street shall be and is hereby made a voting precinct to be known as Precinct Number Six.

IN WARD THREE.

All that part of said ward lying east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Seven; beginning at the intersection of the center line of Kempton street with the center line of Hill street; thence northerly through the center line of Hill street to the center line of Hillman street; thence easterly through the center line of Hillman street to the center of State street; thence northerly through the center of State street to the center of Willis street; thence easterly through the center of Willis street to the center of State street; thence northerly through the center of State street and through extension of the same to the center of Pope street.

All that part of said ward lying west of the last described line through Hill street and State street and east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Eight; beginning at the intersection of the center line of Mill street with the center line of Cottage street; thence northerly through the center of Cottage street to the center of Pope street.

All that part of said ward lying west of the last described line through Cottage street shall be and is hereby made a voting precinct to be known as Precinct Number Nine.

IN WARD FOUR.

All that part of said ward lying east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Ten; beginning at the intersection of the center line of School street with the center line of County street; thence northerly through the center of County street to the center of Kempton street.

All that part of said ward lying west of the last described line through County street and east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Eleven; beginning at the intersection of the center line of Clinton street with the center line of Chancery street; thence

northerly through the center of Chancery street to the center of Mill street.

All that part of said ward lying west of the last described line through Chancery street shall be and is hereby made a voting precinct to be known as Precinct Number Twelve.

IN WARD FIVE.

All that part of said ward lying east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Thirteen; beginning at the intersection of the center line of South street with the center line of Fourth street; thence northerly through the center of Fourth street to the center of Grinnell street; thence westerly through the center of Grinnell street to the center of Fifth street; thence northerly through the center of Fifth street to the center of School street.

All that part of said ward lying west of the last described line through Fourth street and Fifth street and east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Fourteen; beginning at the intersection of the center line of Rockland street with the center line of Orchard street; thence northerly through the center line of Orchard street to the center line of Clinton street.

All that part of said ward lying west of the last described line in Orchard street shall be and is hereby made a voting precinct to be known as Precinct Number Fifteen.

IN WARD SIX.

All that part of said ward lying south and east of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Sixteen; beginning at the intersection of the center line of an extension of the center line of Gifford street and the channel of the Acushnet River; thence westerly in said extension and in the center of Gifford street to the center of Water street; thence northerly through the center of Water street to the center of Division street; thence westerly through the center of Division street to the center of County street; thence southerly through the center of County street to Clark's Cove.

All that part of said ward lying north and west of the last described line in Gifford street, Division street and County street and east and south of the following described line shall be and is hereby made a voting precinct to be known as Precinct Number Seventeen; beginning at the intersection of the center line of County street with the center line of Fair street; thence southerly through the center of County street to the center of Independent street; thence through the center of Independent street to the center of Crapo street; thence southerly through the center of Crapo street to Clark's Cove.

All that part of said ward lying west and north of the last described line in County street, Independent street and Crapo street shall be and is hereby made a voting precinct to be known as Precinct Number Eighteen.

Said precinct shall also include all the territory described in Chapter 256 of the Acts of the Legislature of 1911, being territory formerly lying in the town of Dartmouth, the same being made in said act a part of Ward Six in the said city of New Bedford, viz. :—

“SECTION 1. There is hereby set off from the town of Dartmouth and annexed to and made a part of the city of New Bedford a certain tract of land with its inhabitants and all estates therein, comprising eighteen acres, more or less, of upland and marsh thus bounded and described, to wit. :—Beginning at the point of intersection of the south line of Cove road in said New Bedford and the east line of contemplated Taylor street so-called in said Dartmouth; thence running in the south line of Cove road, or the existing boundary line between said city and said town, north fifty-eight degrees thirty-seven minutes thirty seconds east, or whatever the course may be, six hundred three and forty-nine one-hundredths feet to an angle in said road; thence still in said boundary line north eighty-one degrees three minutes east, or whatever the course may be, two hundred sixty-five feet more or less to Clark's cove, and thence continuing in said existing boundary line into and through the waters of Clark's cove to the existing boundary line of tide waters between said town and said city. Then starting again at the point of beginning and running in the easterly line of said Taylor street south two degrees thirty-six minutes west nine hundred seventy-four and eighty-seven one-hundredths feet to the northerly line of a proposed continuation eastwardly of contemplated Rogers street to be extended in its present course and direction in said Dartmouth; thence south eighty-seven degrees eight minutes east in the proposed continuation of the northerly line of said contemplated Rogers street two hundred thirty-two feet to Clark's cove, and thence continuing in the same course into and through the waters of Clark's cove to the existing boundary line of tide waters between the said town and said city as established by the Board of Harbor and Land Commissioners; and thence in said boundary line of tide waters northwardly to its intersection with the easterly end of the boundary line first above described.”

By order of the Mayor and Aldermen,

W. H. B. REMINGTON,
City Clerk.

FOURTEENTH
INAUGURAL ADDRESS
OF THE
HON. CHARLES S. ASHLEY
MAYOR OF NEW BEDFORD
MASSACHUSETTS
AT THE
INAUGURATION OF THE CITY GOVERNMENT
JANUARY SECOND
NINETEEN HUNDRED AND ELEVEN

NEW BEDFORD, MASS.
E. ANTHONY & SONS, INCORP., PRINTERS
1911

FOURTEENTH INAUGURAL ADDRESS

OF THE

HON. CHARLES S. ASHLEY.

Gentlemen of the City Council:

Conforming to my custom of other years, the scope of my remarks will be restricted to comment and recommendation.

No part of the time at my disposal will be devoted to a detailed review of routine departmental operations.

If I thus disregard the stereotyped plan yet much in vogue, it is because of conviction born of observation and experience.

Tabulations of facts and figures in an inaugural address possess no power to engage thoughtful interest; they are unavoidably wearying and non-instructive when read from the platform.

An accumulated mass of statistical matter, I am sure can gain nothing in value because of its recitation here; it is available in the records and documents open to you all.

You will learn that the duties of the several departments, generally well organized and of manifest efficiency, are so uniform that there is no anticipation of a substantial variation of the amounts they expend or departure from the methods they pursue.

In arranging for their maintenance you will receive the information which if not now possessed, will guide you in the allotment of the funds for the coming year.

To those actually employed in the city's service no reminder of our greater growth is needed; no emphatic word of mine is required to impress it upon you today.

There is everywhere thoughtful recognition of our largely widened responsibilities; facilities and equipment have increased accordingly and are intelligently utilized.

So many of the requirements result from the quick expansion of our business enterprises that I assume it to be a matter of general understanding.

In considering the aggregate estimates that the municipal revenue will be called upon to maintain, you must at the outset be advised as to the gross sum which will accrue to the city credit for the purpose.

FINANCIAL.

Upon the valuation of \$83,000,000 the tax assessment of \$12 upon each \$1,000 will produce \$996,000 to which may be added the further sum of \$435,000, made up of unexpended revenue of 1910 with the receipts from corporation taxes, liquor licenses and miscellaneous income from fees, total, \$1,396,000.

This amount exceeds by the sum of \$167,000 the income received from the same sources last year.

The 1911 borrowing capacity of \$313,200 will be also greater by \$57,000 than existed in the margin of 1910.

This increase, of course, is not a net gain; the additional demands made upon the treasury having naturally grown in corresponding proportion.

There is the same necessity as ever for the exercise of judgment in adjusting the appropriations; the initial estimates cannot in all cases be accepted; allowances

must be made for emergency, since no other funds will be at hand for general city maintenance expenses.

CIVIC CENTRE.

All the formalities for the Pleasant and Sixth street alterations having been complied with, the actual work should be completed at the earliest time possible.

In this connection I deem it my particular duty to urge you to disregard any hasty suggestions as to the employment of the land in the square that the city possesses north of the Municipal Building.

This property was acquired to perfect the creation of a dignified community centre.

It was desirable that the location should not be occupied further for uses conflicting entirely with that purpose.

This end was achieved when we secured the land; it is not immediately necessary to build anything upon it.

The effort has been making to have this locality present a modern city appearance.

The placing of a fire-house or police station there would be an unpardonable impropriety; while new quarters of this kind may be needed it would be folly to give them the prominence quite usually accorded by the smallest of towns and villages.

HATHAWAY PLAYGROUND.

The large tract of land which was given to the city for a public playground by Mrs. Ellen R. Hathaway, will prove to be of the greatest practical benefit.

Her liberal thoughtfulness deserves our appreciation in the fullest measure.

It is our duty to make prompt provision for securing the full effectiveness of this gift to the children who are to have it for their pleasure and recreation.

Whatever is erected there, including a suitable enclosing fence, requires careful treatment and should be undertaken at a near date.

It would be well to have competent advice upon this point so that in all details this playground shall be fittingly equipped and satisfactory in every respect.

STREET RAILWAY.

It is my belief that certain extensions of the Union Street Railway system if established would result in promoting the convenience of the people and improvement of the service.

The Ashland Street line should run north from Clark Street to a street which should be laid out between the Beacon Mill and Pierce Bros., Limited, and thence go easterly in such street and join tracks at Belleville Avenue.

The Purchase Street line requires a terminus near the Beacon Mill.

Bolton Road should be connected with the line in Acushnet Avenue by a track installation in Rivet Street.

These matters if laid before the company would deserve favorable consideration.

An expression of the City Council's opinion with reference thereto should at the proper time be recorded.

STREET WIDENINGS.

Mount Pleasant Street and Tarkiln Hill Road, while at the moment semi-suburban highways, will very soon be prominent city streets.

Both are irregular in their bounds and of insufficient width.

Neither have many, if any, structures abutting that would be injuriously affected by the projection of new bounds making them uniformly sixty feet wide.

Investigation will demonstrate that but little expense would be involved, since land owners and the general public cannot fail to see the advantages that will be derived by having adequate thoroughfares in these vicinities.

I recommend that action be taken widening both of these streets and changing the grade of the hill so that its steepness shall be greatly reduced and the approaches to it be gradual and less abrupt.

LUNDS CORNER IMPROVEMENTS.

I recommend that you take action for securing a suitable lot near Lunds Corner and provide for the placing upon the same of the former school building, to be remodelled into a Branch Library, Ward Room and Polling Place.

This would satisfactorily meet the needs of the locality and can be effected with economy.

The division of the voters in Ward One must be readjusted to make the equalities contemplated by the law and to serve the public convenience in a proper degree.

A new voting precinct will have to be established and it would seem that Lunds Corner is the suitable point for voters to assemble.

THE BRIDGE.

The New Bedford and Fairhaven Bridge demands the most intelligent treatment we can bestow.

The fact that its railings are going to ruin cannot be ignored. Something must be done, either by way of concrete parapet or new iron work.

The paint is disappearing and from the standpoint of preservation of material, if for no other reason, must be restored.

This structure is a most expensive one; it will doubtless require for all time a close attention to keep it in a fair state of usefulness; it is no part of good judgment to delay supplying the necessities which are now so conspicuously omitted.

It is a much used main highway upon which travel each year will become greater.

The bridge has never been sufficiently lighted, which fact has furnished a justifiable cause for adverse criticism.

I recommend that the bridge be repaired in every feature requiring it and that all deficiencies in its appointment be supplied without delay or postponement.

There is an opportunity to provide an ideal public landing-place, recreation pier and marine park with access from the south side of the bridge, by filling in between proper retaining walls, at the place east of the Yacht Club House and west of the spur of the old bridge-way.

Its frontage would be about fourteen hundred feet and the area five acres; of sufficient size to serve all the purposes mentioned.

Cost of construction would be very small because the fill could be deposited by the city's waste and scavenger carts.

State and national permission could undoubtedly be secured and I recommend that you give this subject careful consideration.

SHELL-FISH INDUSTRY.

I think there is a solution to the unfortunate situation whereby the quahaug fishermen of this city have lost a business amounting to several hundred thousand dollars per annum.

I shall pursue such investigations as I have underway with the hope that the State Board of Health, without

further legislation, may see fit to revise its rules so that these shell-fish can be transported for a period to clean water and afterwards sold.

If this can be brought about a large business will have been saved from sacrifice and no interest injured or prejudiced in any way.

The end to be attained of course is that no polluted shell-fish food shall reach a consumer here or elsewhere, but with the danger of all contagion removed there would be no reason to still prohibit quahaug taking under proper regulations.

That a system can be devised to make this possible is my confident hope and I will report what shall be developed as a result of the inquiry now going forward.

NEW SEWERS.

Of sewer construction ordered but not completed there remains undone a quantity estimated as requiring in money about \$29,000.

I am furnished with the following statements, in each case including the lateral extensions, of contemplated sewers deemed to be necessary, for which at the present time there is no means of securing.

The legislative authorization of some years ago was exhausted in 1910 when over 24,000 feet of sewers were laid at a cost of \$99,000.

On Clark's Point,	10,000 ft.	\$32,000.00
Rockdale Ave., Bolton Road and Winterville,	8,000 ft.	22,000.00
Grape St.,	20,000 ft.	60,000.00
Tripp's Brook Sewer near Oak Grove Cemetery,	12,000 ft.	30,000.00
Willis St. extension to Durfee St. north between Shawmut Ave. and Mt. Pleasant St.,	9,000 ft.	32,000.00

Purchase St. Sewer between Mt. Pleasant and Railroad from Sawyer St. northerly,	9,000 ft.	38,000.00
Brook St. north of Nash Road between Railroad and Bow- ditch St.,	5,000 ft.	21,000.00
Laterals to Belleville Ave. system between Bowditch St. and Belleville Ave. from Willis Ave. to Tarkiln Hill Road,	20,000 ft.	50,000.00
Miscellaneous extensions in vari- ous parts of city,	7,000 ft.	15,000.00
		<hr/> \$300,000.00

In order to provide for the foregoing a bill will have to be introduced at our instance in the General Court for the necessary bond issuing authority, which action I advise and recommend.

We were authorized in the year 1910 to make a large sewer outlay which is to be confined to the intercepting system, so called, for which plans have been prepared and are to be passed upon by state and government boards.

The steps being taken are necessarily preliminary and further action of the City Government will be required before any work can go forward.

This will be brought forward in due season, and at this time nothing is desirable by way of recommendation.

STREETS AND TREES.

Street construction, general repair, oil and cleaning, cannot be forwarded, in any event, to meet the demands of necessity.

By the application of all the appropriation which may be set aside for the purpose it will be impossible to have this work come up to the requirements.

We have so many miles of streets which need attention that the most that can be done is to employ your wisest judgment and discretion in decreeing where the bulk of the work shall be performed.

The most that can be expected is that you will exercise your best capabilities in reaching this determination.

In the projection of new streets there should be systematic regard paid to the placing of ornamental shade trees.

Except where now and then an abutting owner has provided for the space opposite his own property very little has been done to secure fineness of appearance and contribution to comfort.

Many of the ancient elms have each year to be displaced and where one tree has to go we will do well to see that another takes its place.

I would recommend that a plan be made indicating places of necessary tree removal and suggesting the substitute that shall stand in its place, together with a whole new outline for the balance of the city or such parts as are adaptable to successful tree planting.

Each year a considerable portion of the territory could be supplied with young trees in the streets which would eventually beautify particular localities and contribute to the whole general pleasing effect.

WATER SUPPLY.

The benefits of the splendid reservoir and water supplying system are not to be wholly realized until the distribution is made more complete.

It is represented to me that to secure efficiency there must be extensions of the two mains that enter the city at the north, one to go easterly and the other into the southwest portion of the city and to unite near Rivet street; from which point a main is needed to run well into Brock avenue.

At the north end of the city a large new main is required the whole length of Acushnet avenue to be directly connected with the Quittacus pumping main and not with the High Hill reservoir.

The pressure from the force main itself would supplant any necessity for drawing upon the reservoir itself.

It will be seen that these are projects of great magnitude, involving the expenditure of several hundreds of thousands of dollars, which must be defrayed from the proceeds of special authorizations, making it essential to have recourse again to the General Court.

A bill should be introduced for bond issue for the whole amount or for such part of the undertaking as is best to pursue without waiting until a later time.

My own investigation leads me to believe that it is better to take it up as a whole notwithstanding the great expense that is involved.

The matters that are to go to the legislature must be attended to early so that your consideration of this subject must be immediate.

The roadway and bridge at Turner's Pond where the main from reservoir passes towards the city is in need of widening and repair, which for every reason should not be neglected or forgotten.

I do not favor any relinquishment of the old Mt. Pleasant water-works system which it seems to me must eventually be brought into requisition for some particular manufacturing purposes, which can be served either by pumping or the natural flow.

It should be safely guarded and preserved intact for a usefulness that is certain to appear.

SCHOOLS.

In many of the schools the classes are arranged on half time with pupils seated in the halls and corridors.

The committee urges the erection of a twenty-room

schoolhouse for the south portion of the city, between Dunbar and Benjamin schools, together with an increased number of portables.

In several cases buildings of the latter type have been successfully changed in their locations, so that it is claimed they do much more good than their appearance would indicate.

We should confer with the School Board, and whatever can be accomplished to relieve the unsatisfactory conditions brought about if within our power so to do.

MUNICIPAL BUILDING.

To furnish complete and equip the Municipal Building heretofore wholly unprovided for, expenditures to the amount of \$63,000 will be necessary.

As the balance to the credit of this account is about \$28,000 more money to the amount of \$35,000 must be obtained, for which a bond issue should be made.

A bill to this effect can be presented to the incoming legislature at the time of action upon the other matters to which I have referred.

ALMSHOUSE.

Conditions at the Almshouse do not meet the approval of the State authorities, the crowded nature of the quarters being such that a remedy must be provided therefor.

I have communicated to the Overseers of the Poor a plan, in which they concur, which will at the same time solve two difficulties which are much in evidence.

By removing to the Almshouse premises the former residential building on the Hazelwood Park and fitting it up as an administration house, home and headquarters the space now used in this way in the main building would be vacated.

By then utilizing it for the inmates, after readjusting it suitably, the total gain in accommodations would equal that sought in recent plans for brand new extension, at a great saving in cost.

The Park Commissioners would most probably be willing to relinquish the house as it does not now serve any public use to the extent of which it is capable.

Your attention is directed to this topic as easy of consummation, economical and to be favored from every standpoint.

WHARVES.

The desirability of the city's control, by ownership, of prominent wharf properties is so apparent that every reason prompts the acquirement in two instances where there now is the opportunity.

In each case the prices are consistent and reasonable, and my information is no adverse options or restrictions are at this time outstanding if the city shall desire to make the purchase.

I refer to Central Wharf, having a waterfront of 680 feet, which in connection with the other City Rotch Wharf property nearby would give us control at channel depth of very valuable approaches.

The other is the tract of land 1125 feet in length on west side of West French Avenue, which if procured, would make a full mile of city shore, from the Government Reservation to a point near the Kilburn Mill.

CONCLUSION.

I am not unmindful of the fact that the propositions I have advanced result, if adopted, in augmenting the gross public debt, which is amounting to figures of large size.

At the same time under the limitations by which we are legally controlled no other method is possible.

I am in accord with the sentiment of other chief executives whose experience teaches that the twelve-dollar taxation law is arbitrary and encourages the accumulation of postponed debt rather than the present payment of current obligations.

Until there is a change in the law, which is bound to come, we are constrained to a continuance of ways and means not strictly conformable to the best plans that could be invented.

My recommendations are therefore not made in a spirit of indifference but with a profound appreciation of the exact circumstances.

The public has reposed in us their confidence as chosen representatives united on supposedly common grounds of political fellowship, and have declared for an administration of affairs by men of one party and political affiliation.

Responsibility of this nature we have invited and advocated our ability to assume.

We should take up our duties without thought of evasion and in a spirit of obedient and faithful acknowledgment of the trust bestowed.

Let us in every way display capability and justify the expectations of the citizens.

Report of

Committee on Public Baths

For the Year 1910.

CITY OF NEW BEDFORD.

IN COMMITTEE.

To the City Council:

GENTLEMEN:—The Committee on Public Baths herewith submits its annual report for the season of 1910.

The bathing houses were opened for business on Saturday, June 25, and remained open until Sunday, September 11, a period of twelve weeks. The estimated number of bathers and the weekly receipts are shown on the weekly reports of the Superintendent, on file at the office of the Clerk of Committees, as follows:

Week Ending	Attendance.	Receipts.
June 26.....	418	\$5.46
July 3.....	1,987	26.98
July 10.....	1,225	54.69
July 17.....	2,690	45.97
July 24.....	2,967	36.52
July 31.....	2,823	38.56
Aug. 7.....	2,239	36.08
Aug. 14.....	2,001	34.74
Aug. 21.....	1,457	22.72
Aug. 28.....	1,179	16.42
Sept. 5.....	625	7.67
Sept. 11.....	317	4.47
	<hr/> 19,928	<hr/> \$332.28

The number of bathers indicates the appreciation of the public of the privileges offered by the public bathing houses. The attendance has not been confined to persons residing in the southerly part of the city to such a degree as when the bathing houses were located at the foot of David street, observation and the testimony of street railroad employees showing that many people from the north end of the city have used the houses.

Constant work on the beach by the employees, with some hired assistance, has resulted in considerable improvement. This work should be continued until all the stones and seaweed are removed from that portion of the beach used by bathers.

Before the opening of the season the committee laid a water supply pipe from the Isolation Hospital building across the City Farm land to the bath houses, thus affording a supply for fresh water shower baths and drinking purposes, which was greatly appreciated. An electric light was installed at the end of the pier, which was an improvement. The houses were painted and the roofs were repaired.

The committee calls attention to the fact that next season the supply of suits will need replenishing, if the system of letting suits is followed.

The houses, during the season, were in charge of the following employees:

Superintendent,	JOHN HOLDEN.
Assistant,	THOMAS F. QUINNAN.
Woman Assistant,	MRS. HANNAH OGDEN.

A financial statement, compiled by the City Auditor, is herewith presented.

Appropriation	\$1,800.00
Pay rolls, attendants	\$609.79
Advertising	25.44
Insurance	15.00
Land rent	250.00
Laundry	196.03
Lighting	10.01
Supplies	36.28
Tools80
Water	10.58
Stock, labor and fitting.....	552.88
Care taker, winter.....	10.00
Private water meter.....	56.50
Carting	11.25
	1,784.56
Balance	\$15.44

The committee desires to call the attention of the City Council to the system of portable shower baths now in use in Baltimore and other cities. In the congested districts temporary shelters, either of canvas, wood or galvanized iron, containing as many shower baths as can be conveniently located in them, are erected. The cost of these structures, built of galvanized iron, is from \$600 to \$650 each, including plumbing, piping, water heating apparatus, etc., and the cost of maintenance about \$33.60 per week. Days are set apart for males and females, and the system has proved very popular and beneficial to the population of the districts in which they are located.

The committee recommends that the system be tried in New Bedford; that one location at the north end of the city and one at the south end of the city be selected, and the plan put in operation during the coming summer.

For the Committee,

JOHN HANNIGAN,
Chairman.

Annual Report

OF THE

Superintendent of Public Buildings

ALSO

Inspector of Buildings

OF THE

CITY OF NEW BEDFORD, MASS.

For the Year 1910

NEW BEDFORD, MASS.
E. ANTHONY & SONS, Incorp., PRINTERS
1911

REPORT

OF THE

Superintendent of Public Buildings

OFFICE OF SUPERINTENDENT OF PUBLIC BUILDINGS,

NEW BEDFORD, MASS., Dec. 31, 1910.

To His Honor the Mayor and the City Council:

Gentlemen:—I have the honor to submit this report on the condition of public buildings under construction Dec. 31, 1909, also of the work performed under my supervision up to and including Dec. 31, 1910.

FREE PUBLIC LIBRARY BUILDING.

On the 29th of September, the new Free Public Library Building was finished and accepted by His Honor the Mayor and Committee on City Property from the contractor and turned over to the Library Trustees. A general description of this building was given in my report for 1908. This building is decidedly of the first class in every particular and has the added distinction of being the first "fireproof" building built in the city.

STATEMENT OF COST.

General construction, including finishing of grounds, (John B. Sullivan & Son, Contractor),	\$176,620.54
Metal book stacks and accessories, (Art Metal Construction Co., Jamestown, N. Y.),	43,509.00
Heating and plumbing, (Wood, Brightman & Co.),	11,185.63
Electrical work, (Eastern Electric Co.),	2,441.50
Lighting fixtures, (Enos Co., New York),	7,500.00
Elevator, (Otis Elevator Co., Boston, Mass.),	2,700.00
Vacuum cleaning plant, (Burke-Lawton Cleaner Co., Providence. R. I.),	1,042.00
Furniture, (Library Bureau, New York),	20,606.00
Bronze tablets, (Murdock-Reed Co., Boston),	280.00
Architect's fees, (Nat. C. Smith, Architect),	9,956.63
	<hr/>
	\$275,841.30

PORTABLE SCHOOLS.

During the early part of the year our city government contracted with the E. F. Hodson Co., of Boston, for the furnishing and setting up of two portable school buildings, capacity of fifty scholars each, to be located on the William H. Taylor school lot, Brock Avenue. The total cost of these buildings including furniture and connecting with steam boiler in main building for heating purposes, was \$2,967.

Later in the year when the addition to the main building was ready for use, these buildings were taken down and removed to the Phillips Avenue School lot, set up and connected with boiler in main building for the sum of \$295.00. This type of portable school is giving excellent satisfaction.

BOWDITCH STREET SCHOOL.

The work of excavating for this building was commenced January 21st of the present year, and the work has so far progressed that the building is now roofed in

and will be ready for plastering in about another month. This is a schoolhouse containing 20 class rooms and assembly hall, the floors, partitions and stairs being constructed of fireproof material throughout. The contract calls for this building to be completed on or before Sept. 1st, 1911, and it now looks as if it will be completed long before that time.

NEW HIGH SCHOOL.

The work on this building, of which a full description was given in my report of last year, was commenced early in January. A short delay was caused by the City Council ordering the contractor to set the building further back from the line of County street. After some readjustment of the plans by the City Engineer and Superintendent of Public Buildings to conform to this order the work was again resumed. Another delay was caused by the labor strike in September. The work at this building has progressed to that stage where foundations and walls are built up to and including the steel frame of the second floor.

GARAGE FOR WATER DEPARTMENT.

A contract was awarded to Patrick McQuade of this city for the erection of a garage for the water department, to be located on their premises, North Water street, for the sum of \$3,327.00. Plans and specifications furnished by Nat. C. Smith.

This building is 25x33 feet and built of terra cotta blocks plastered on outside and inside, the finish on outside to be of the slap dash order. Floor to be granolithic and roof slated, making a thoroughly fireproof building. The building is now ready for painting.

WILLIAM H. TAYLOR SCHOOL—BROCK AVENUE.

The addition of four rooms and assembly hall to this building was commenced in the early part of the year and is now nearly completed.

Under the terms of the contract this building was to be completed and ready for use on or before Sept. 1st, 1911. The building will now be ready by Feb. 1, 1911.

MUNICIPAL BUILDING.

The work on this building has progressed to that stage that the interior finish is being installed, and I see no reason at this time why the new half of this building will not be ready to occupy in the early part of 1911.

WELD STREET STATION.

During the early part of the year this building was moved back to the north line of the lot in order to complete the widening of Weld street.

It was finally decided to remodel the building for the purpose of a police station, ward room and branch of the Free Public Library, and our City Property Committee engaged E. G. Bullard, Architect, of this city to prepare plans and specifications for this work.

The plans have now been completed and will be reported to the Committee early in the new year.

ALLEN STREET SCHOOL.

On the 14th day of April, the City Council voted to purchase the lot bounded by Allen, Bedford and Brownell streets, containing 857 rods, for the sum of \$25,710, for the purpose of erecting a schoolhouse thereon.

The Committee on City Property was ordered to procure plans and specifications with estimates for the erection of a modern schoolhouse containing 12 class rooms and assembly hall on this lot, and report to City Council for further action. The Committee engaged Louis E. Destremps, Architect, of this city to furnish plans and specifications for same, and on October 20th estimates were called for to be opened on November 3rd.

The low bidders were as follows:

General Construction—Wilmarth-Mackillop, Inc., Pawtucket, R. I., \$110,493.

Heating and Ventilating—John Perra, New Bedford, \$7,400.

Plumbing—Jeremiah Coholan, New Bedford, \$1,848.

On the 11th day of November, the City Council voted to award contracts to the above firms.

As required by Section 2, Chapter XIII. of the City Ordinances, I hereby submit a detailed report of all repairs to city buildings coming under my supervision during the year of which the cost in each case was in excess of ten dollars:

Acushnet Avenue School.

I have inspected numerous City Buildings and have advised the different departments and Committees in charge of same relative to repairs, and have prepared specifications for the same.

During the year, with the assistance of Mr. E. F. Dahill, Chief of the Fire Department, I have prepared a modern building code that should be adopted in its entirety.

In conclusion, I wish to express my appreciation and thanks to the Mayor, Committee on City Property, Buildings in the Fire Districts and School Committee for their cordial co-operation in all matters pertaining to the work of this department.

Respectfully submitted,

JOSEPH L. GIBBS,

Supt. Public Buildings.

Sacred Heart	5 acres	3.62 square rods.
Peckham West	5 acres	136.06 square rods.
Hebrew	1 acre	25.00 square rods.
Hathaway		12.61 square rods.

A BRIEF statement of work and subjects of special importance before the Board of Cemetery Commissioners during the year is herewith given.

In June of 1909, the City Council made an appropriation for the purchase of additional land for Pine Grove Cemetery. This secured to the city an invaluable piece of property, the land is high, dry and porous, largely cleared, and heavily wooded in sections, which will provide natural growth for the future layout of park sections in these grounds. Later it was advisable to purchase the rear land of adjacent farms, owned by Thomas Hersom and others, to straighten the south line. This was purchased from the "Sales of Lots" fund and added about eight acres to these grounds.

As was stated by the Board in its previous report, the purchase of this land presents an important and serious proposition as to its preparation and development for the future. This new land must form the principal and main section of what is known as Pine Grove Cemetery. The location, contour and nature of the land is such that it is necessary to prepare plans in its entirety; lay out and construct roadways, and a suitable entrance from Acushnet avenue, before lots can be sold, or interments made therein. Such preparations mean a large expenditure of time and labor before the land can be fitted for cemetery purposes. The completion of this work is the most urgent proposition before the Board, and we earnestly recommend that the City Council make special appropriation to that end, in view of the fact that the department cannot meet the expense of such work from the regular appropriation.

RURAL CEMETERY.

The general care and maintenance has progressed under the careful direction of the Sexton, Nelson L. Pike. The recommendation of the Superintendent in his last year's report, relative to the resurfacing of the concrete

drive leading from Bay View avenue, across the cemetery, to where it intersects the Main avenue in the old section, has been accomplished. Two thousand, five hundred and ninety-four square yards were resurfaced, at an expense of \$1,306.00.

The Board, from its organization, advocated unceasingly the erection of a shelter-house in Rural Cemetery, for the convenience of lot-owners and those having occasion to visit the cemetery. We are pleased to announce that this building has become a reality. The building is an open-work wooden structure of modern design, with a concrete foundation and metal roof. It is situated on an island in the pond, and approached by a rustic bridge leading from the main avenue at the west. The island and the slopes to the pond are planted in artistically arranged groups, a variety of shrubs and conifers. In the waters of the pond are many varieties of aquatic plants and beautifully colored water lilies, while myriads of gold fish bask on the surface of the water on warm and clear days. The building is a source of satisfaction to the Board, and has been appreciated by the lot-owners, who are unanimous in commendation.

IN connection with the improvements in Rural Cemetery, the Board are pleased to announce for the second time the magnanimous and public spirit of Mr. Oliver F. Brown. Appreciating the marked improvement by the planting of trees, shrubs and flowering plants about the Dartmouth street entrance to Rural Cemetery, and desiring that like effects might be accomplished at the Rural street entrance, he purchased the lot of land on the northeast corner of Grape and Rural streets, consisting of 12 rods, at a cost of \$420.00, and presented the same to the city, to be used in connection with the cemetery in perfecting the Rural street entrance. It is the intention of the Board to prepare and embellish this approach in like manner as at Dartmouth

street. In view of this, it is desired that the Street Department will combine its efforts with this public spirit and put the approach to Rural street entrance in perfect and harmonizing condition, both as to sidewalks and roadway.

A small acquisition to Rural has been purchased this year, consisting of 42.95 rods, for \$901.95, being a portion of that strip of land laying between the west boundary of the cemetery and Rockdale avenue. This gives an additional frontage on the avenue of 205 feet. The entire strip of land on this boundary should become a part of the cemetery proper, and the barns, henneries, and unsightly buildings thereon removed.

As the development of this rapidly extending cemetery is now wholly in the west section, it is very apparent that provision must be made to drain this land to properly prepare it for burial purposes. To do this will require not less than 1,000 feet of pipe to be laid southerly across the grounds to enter the sewer at Rockdale avenue, or else easterly across the cemetery to the Babbitt street outlet. The latter is believed the most advisable.

At the approach of the dry season the main avenues of this cemetery were treated with an oil dressing, with satisfactory results, and the elimination of the constant use and expense of the water wagons.

OAK GROVE CEMETERY.

All the land in these grounds is now fully developed, and the lots are gradually being disposed of. Those remaining unsold are desirably located and the steady demand insures the entire sale of the same.

As there will be no new land to develop, the labor in these grounds will be entirely devoted to its proper maintenance, the repair and improvement of many of the old sections, and a complete renovation of that portion south of Parker street.

The heavy face wall which has formed the street boundary of these grounds for many years is now so badly thrown by the frosts and weather actions that it has become a menace to pedestrians and unsightly in its present condition. This should be entirely rebuilt, and the Board hope to accomplish the work the coming season.

During the season these grounds have presented a very attractive appearance. Many new designs of flower beds, with the richest variety of flowering plants, have graced the lawn and borders, and its general condition has been very satisfactory to its lot-owners.

PINE GROVE CEMETERY.

THE unprecedented growth of the city to the north has already brought this cemetery within reasonable proximity to the resident district, and the public interest in the development of these grounds is quite apparent.

The acquisition of the new territory, consisting of 73 acres, renders it essential that immediate steps should be taken to develop so much of these grounds as will enable the public to make future provision for themselves and their families. Realizing this, the active work in cemetery development has been centred in Pine Grove the past season. The boundaries have been carefully lined by the City Engineer, and a temporary enclosure constructed to prevent cattle from straying upon the land, and the inroads of thoughtless and careless people, who may seek to injure the natural growth of many varieties of trees, with which this land is beautifully supplied, and which will eventually become its park sections.

About \$9,000.00 was expended in improvement in 1910, including preparing land and grading, drainage, road making and tree planting. More extensive work is planned for the coming year. All of the original 10 acres of Pine Grove has been developed on plans prepared by landscape

gardeners. These sections will be utilized largely for public grounds, single graves and small lots, costing from \$25.00 to \$60.00. Extensive tree planting is intended in this section, as most of the stately pines on the adjacent lands and whose beauty was reflected into these grounds have been cut down by active real estate interests, now working in this vicinity. On the new land, however, there is a large natural growth of pines, with many large trees on the grounds, and the landscape development throughout will receive the most careful attention. The land has a rolling surface, a diversity in topography, which makes it easy to obtain fine landscape effects. With what nature has already done to adorn the cemetery, the management will not interfere, but much will be added in the way of trees, shrubs and flowering plants to greatly enhance the appearance of the grounds. The soil is sandy and porous, and the elevation of the land is more than any of the city's cemeteries.

The Board has requested that a special appropriation of \$5,000.00 be made that a roadway may be constructed from Acushnet avenue into these grounds, making this cemetery accessible from the car lines. This will be the regular entrance to this cemetery, until the future extension of Bowditch street, which will intersect the grounds near the centre, when new and permanent entrances should then be provided from this avenue.

A section of land has been prepared as a nursery for the purpose of transplanting seedlings of ornamental trees and shrubs, which can be acquired at a small cost and herein developed and used as needed in future embellishment of the grounds in general.

By reason of the cemetery work being centred in Pine Grove Cemetery during the season, it was advisable to use so much of experienced labor as at times could be spared from Rural and Oak Grove Cemeteries. The car lines were availed of for this purpose, thereby creating an unavoidable transportation expense.

FLOWER DAY.

Flower Day was publicly observed on the eleventh day of September, the results of which were particularly gratifying to the Board. The popularity of this feature is increasing each year, as is manifested in the response so general at this time, occurring in the season of flowers and at the close of the vacation period, when families returning to their home, their thoughts are again drawn to the little burial lot where rest some of their friends or loved member of the family. It is at this period that Flower Day appeals to them, and again the memory of their dear one comes afresh to their hearts, as the tribute of flowers is tenderly placed on the grave of their dead.

It is at this season that the many flower beds in the several cemeteries present the most effective appearance, and with individual co-operation, the whole is beautiful to look upon.

PERPETUAL CARE.

What makes the cemetery beautiful? Almost as many different answers will be given as there are persons answering, and all will be right so far as they go, and yet nearly all will miss the most important point. The grand old oaks; the rare exotic trees and shrubs in countless variety; the endless forms of flowers, of foliage, of ornamental fruits; the somber pines; the blue of the wonderful Colorado spruces; the masses of flowers; the wide stretch of green lawn; the beautiful winding drives bordered by artistically arranged masses of flowers, foliage and trees; the undulating perfectly contoured sections; the buildings; the massive entrance—all these would be mentioned, but what about the perfect care that maintains all these beautiful features? The trees decay, if not cared for; the flowers perish quickly; the shrubs, though more lasting, soon dwindle away; disease attacks all growing things, and insects destroy; the

winds and the snow and the frost work destruction; noxious plants find a foothold, invade the grassy spaces, and the beautiful lawns are no more. The driveways must be watered and rolled, swept and repaired; the trees and shrubs pruned and fertilized; a constant warfare must be waged against destructive insects. The grass must be mown, fertilized and reseeded. The lawns must be ever raked and cleaned. New plantings of trees and shrubs must replace the constant losses; the enclosures; the entrances; the buildings; the water system; the greenhouses—all are subject to depreciation, and repairs and renewals are constantly in order. So it is care—intelligent, perpetual care, through all the year, that makes the cemetery beautiful. And keeps it so.

As the years go by families scatter, those closest in relationship pass away, other interests engage the younger generation, until finally no one remains who will expend the necessary sum annually to keep the family plot from falling into a neglected and unkempt condition.

Therefore, some other method must be adopted to insure its care for all time. There is only one safe and sure method, and that is by creating a fund sufficiently large to be held in trust for this purpose. It must be large enough so that the income will be sufficient to carry out the work. No sum less than \$150.00 should be deposited for the perpetual care of any one lot. It should be borne in mind that the tendency of interest rates in the past has been steadily downward. By ordinance, these deposits are required to be placed in the savings banks of the Commonwealth, and the net income is not over 4 per cent., or \$4.00 for each \$100.00, annually.

Perpetual care consists of the cutting of grass at reasonable intervals, keeping the sod in good condition, trimming of shrubs and trees, cleaning of monuments and headstones, and replacing of foundations, and regrading the

lot, so far as the interest, annually accrued, on the sum deposited, will allow.

The fund deposited to perpetual care, December 5, 1909, was \$135,533.33—to this has been added this year \$9,445.00, making a total amount on deposit of \$144,978.33, representing 1,365 lots.

SPECIAL CARE.

Some lot-owners do not care to have flowers planted, others desire very elaborate and expensive planting, each year. On some lots there are no monuments, on others very large and costly monuments have been erected. It is thus evident that no general plan can be made for special care of this kind. Each case must be provided for separately. Lot-owners who wish planting done annually, monuments kept in repair, or other similar work done, may deposit *SPECIAL CARE* funds, the income of which will be devoted exclusively to the purpose specified. Estimates for such work will be promptly given on application.

CONVEYANCE OF LOTS IN TRUST.

It is no uncommon occurrence for cemetery lots to come, in the course of years, into the possession of persons having no relationship to, or respect for the memory of the family of the original owner, buried therein. Rights of burial are disposed of to aliens. The monuments, and possibly graves, are disturbed to make room for the interment of strangers. This state of affairs can be absolutely prevented, and yet all rights of use be retained, by conveyance in trust to the City of New Bedford. Such conveyance can be so made as to secure the full use of the lot to the owner, and the descent of such use to such persons as may be specified, but will effectually prevent the lot from ever coming into the possession of persons not akin to the original owner.

The Board is prepared to accept such trust on behalf of the city, under certain simple conditions, which will be made known on application.

Blank forms of trust will be furnished at the office of the Board, and no expense is attached to trust conveyances.

OFFICE.

MERCHANTS BANK BUILDING.

In connection with the routine work performed at the city office of the department, this year, much time has been devoted to transferring the records from the plat books to the more modern and convenient card catalogue system, and to placing the records of lots, so far as they relate to present titleship, in accordance with existing laws governing the same, it being necessary that the lot shall stand upon our records in the name of a living individual. This is important to lot-owners in general, as upon the death of the proprietor of a lot, the heirs should take immediate steps to consult with the department, relative to titleship. The increasing interest in the several grounds of the department is manifested by daily calls at the city office of those desirous of consulting the records and card catalogue system of the department. These records are being placed in form convenient for public use, and special care is taken relative to the accuracy of the information therein contained.

MEMORIAL GIFTS.

It is gratifying to read of the increasing number of gifts being made to cemeteries in many of our towns and cities, gifts that, while adding to the attractive features of the cemetery, serve in far more than ordinary sense the effect of a memorial. Excellent, appropriate and useful memorials may consist of entrances, fountains, shelter houses, chapels, and special funds for the care of neglected lots. We have already called attention to the public spirit of Mr. Oliver F. Brown in presenting to the city a lot of land suitably situated for the embellishment of the entrance

to Rural Cemetery. Of importance among the above suggestions, the Board would emphasize the need of a Chapel in these grounds, for the many services which are now held in undertakers' apartments, quite inadequate for such purpose, or in the open grounds of the cemeteries. It is hoped that some of our public-spirited citizens might accept this suggestion as one which appeals to their taste and provide for a memorial of this character, either by will or subscription. A fund for such a purpose is not alone a worthy memorial but a fitting and thoughtful tribute to the dead.

In the improvement and adornment of our city and the education of its youth, our generous spirited citizens are not wanting, and as this spirit continues in the future we hope the last resting places of our dead may not be forgotten, but receive the thoughtful and kindly care of our citizens throughout succeeding years.

The chief requisites for the development, harmony and beauty of every cemetery are a good drainage system, adequate water supply, appropriate planting of trees and shrubs, well placed driveways, the erection of works of art, the family monument in place of headstones, adoption of low markers, and the disuse of all footstones. There should be no mounds over graves, or visible cornerstones above grade, nor copings, fences, hedges, etc. With these main suggestions in mind, and with each lot-owner's hearty approval and co-operation, much may be done to carry out the aim of the Commissioners to make our public cemeteries modern and beautiful in every respect.

Respectfully submitted,

W. M. HIGHAM, *Chairman.*

JOHN G. NICHOLSON,

CHARLES H. VINAL, *Secretary.*

SUPERINTENDENT'S REPORT.

To the Honorable Board of Cemetery Commissioners:

GENTLEMEN:—I have the honor to submit to you my fourth annual report, giving a summary of the work accomplished by your direction in this department during the year. Much of the work suggested by me last year, I am pleased to report, has been achieved, among the important of which is the resurfacing of the concrete drive in Rural Cemetery, the placing of needed catch-basins, the policing of the cemeteries at certain periods of the season, the purchase and controlling of its own teams, the oiling of the main avenues, and other progressive improvements with which the Board are familiar.

A large force of men have been actively engaged in the several grounds. The principal work, however, in cemetery expansion has centred in Pine Grove Cemetery, and the season closed with considerable unfinished work, which will be continued as soon as the weather will permit in the spring.

Following is a summary of the work performed during the year 1910:

SUMMARY.

	Rural.	Oak Grove.
Square feet land dug over.....	4,360	
Lineal feet of avenues fitted....	1,350	1,025
Lineal feet of borders fitted.....	450	2,075
Lineal feet of walls built	62	
Square feet avenues paved.....	280	1,560
Lineal feet of water mains laid.	100	
Foundations (tablets)	145	121
Foundations (monuments)	15	10

CEMETERY REPORT.

Value of lots unsold	\$5,875 00
Single graves unsold	319
Value of graves unsold	\$3,190 00

Griffin Street Cemetery has had the usual annual care given to these grounds. Mr. Fred S. Spooner has been detailed to give his entire time to the care of this little cemetery. It is desirable to improve the appearance this year by the additional planting of trees and flower beds.

SUGGESTIONS.

The following suggestions I trust will receive the consideration of the Board the coming season:

The retaining wall on the Parker street front of the Oak Grove Cemetery of the old ground should be rebuilt, the frost and water has badly thrown it so that it is at present a menace to pedestrians. The fence forming the east enclosure of these grounds should also be rebuilt, as it is in poor condition and cannot last another season.

The main avenue from the entrance on the north of the receiving tomb should be macadamized.

If possible, an entrance should be opened in the new Pine Grove Cemetery, from Acushnet avenue, and an avenue prepared leading into these grounds. All activity possible should be furthered to the opening of this cemetery for public use.

A proper tool-house should be erected in Pine Grove Cemetery for the storage of tools, implements and stock, to be used in the work of these grounds.

I also recommend that a spraying apparatus be purchased for the protection of the trees and shrubs.

Respectfully submitted,

HURLBERT E. THOMAS, *Superintendent.*

Annual

Report of City Clerk.

For the Year 1910.

THE CITY OF NEW BEDFORD.

CLERK'S OFFICE.

January 26, 1911.

To the Honorable the City Council of the City of New Bedford:

GENTLEMEN:—The undersigned herewith respectfully submits the following statement of licenses and fees received by him during the fiscal year ending December 3, 1910, and returned by him into the office of the City Treasurer:

Auctioneers' licenses at \$5 each.....	\$130.00
Pool, billiards, bowling alleys, etc.....	1,072.00
Exhibition, skating rink, carousals.....	20.00
Fruit licenses	1,540.00
Hacks, wagons, etc., at 50c. each.....	69.50
Intelligence office licenses at \$2 each.....	14.00
Junk collectors' licenses at \$3 each.....	153.00
Junk dealers' licenses at \$5 each.....	170.00
Pawnbrokers' licenses at \$50 each.....	300.00
Petroleum licenses at \$1 each.....	61.00
Petroleum registrations at 50c. each.....	95.00
Scallop licenses at \$1 each.....	181.00

FEES.

Marriage licenses	\$1,165.00
Mortgages, bills of sale, etc.....	177.65
Assignments of mortgages.....	1.25
Discharges of mortgages	24.75
Assignments of wages	26.75
Discharge of assignments of wages.....	1.50
Married women's certificates.....	9.75
Copies records	44.85
Voluntary assignments	6.00
Recording liquor licenses	3.00
Writs50
Foreclosure mortgages50
Mechanics lien	
Recording express permit transportation liquors...	1.00
Power of attorney.....	.50
Lease50
Recording dog licenses	506.40

Total amount\$5,775.40

Respectfully,

D. B. LEONARD,
City Clerk.

EIGHTEENTH ANNUAL REPORT

OF THE

ENGINEERING DEPARTMENT

OF THE

CITY OF NEW BEDFORD

BY THE

CITY ENGINEER

FOR THE YEAR 1910

NEW BEDFORD, MASS.
E. ANTHONY & SONS, Incorp., PRINTERS
1911

IN BOARD OF ALDERMEN.

Feb. 23, 1911.

Received. Ordered printed in the City Documents
and sent down for concurrence.

D. B. LEONARD,
City Clerk.

IN COMMON COUNCIL.

Feb. 23, 1911.

Concurred.

W. H. B. REMINGTON,
Clerk.

REPORT

City of New Bedford,
Engineering Department,

January 1, 1911.

To the City Council of the City of New Bedford:

Gentlemen:—In compliance with section 5 of the ordinance defining the duties of the City Engineer, the following report of the expenses and operations of the Engineering Department for the year ending December 3rd, 1910, is respectfully submitted:

EXPENDITURES.

Salaries and pay-rolls,	\$13,522.55	
Rent,	741.12	
Janitor's services,	104.00	
Lighting,	80.54	
Telephone,	49.04	
Local transportation,	454.35	
Drawing supplies,	167.88	
Blue print material,	195.37	
Printing, stationery, etc.,	190.99	
Sundry supplies,	54.20	
Repairs to instruments, tapes, etc.,	28.70	
Office furniture and repairs,	328.22	
Platting expenses,	115.50	
General instruments for office and field,	79.76	
Grade crossings,	14.75	
Traveling expenses, postage, express, etc.,	70.41	
Printing report,	50.25	
Meteorological instruments,	32.56	
Public statutes and reference books,	19.50	
Bound stones,	2.87	
Sundry labor not in pay-roll,	19.50	
Sewage investigation,	194.75	
		\$16,516.81
Balance,		83.19
		<hr/>
		\$16,600.00

RECEIPTS.

Appropriation, regular,	\$15,000.00	
Appropriation, special,	1,600.00	
	<hr/>	\$16,600.00

EXPENDITURES.

Gross,	\$16,516.81
--------	-------------

RECEIPTS.

By credit to Miscellaneous Revenue of 1910:—		
Cash from sale of blue print material and for printing,	\$401.11	
Labor and expenses for Water Dept. on account of new supply main,	333.47	
Intercepting sewer,	479.76	
	<hr/>	\$1,214.34
Net expenditures,		15,302.47
		<hr/>
		\$16,516.81

The assistants at present employed in this department are George H. Nye, L. J. Hathaway, Jr., Edward M. Slocum, Norman Barstow, William H. Chase, Clifford L. Wade, Chauncey R. Mosher, Paul G. Covill, Elmer L. Deane, Robert A. McIntyre, John A. Silsbee, George E. Caswell and Jessie Loughlin. Harold Williams is employed on special work.

PLATTING SYSTEM.

Record of conveyance of real estate recorded at the Registry of Deeds, at New Bedford, and reported to the Board of Assessors each month.

TRANSFERS.

December, 1909,	175
January, 1910,	217
February, “	247
March, “	270
April, “	352
May, “	245
June, “	289

July,	1910	228
August,	"	229
September,	"	225
October,	"	247
November,	"	204
Total,		2,928

A full set of blue prints of the plats, 150 in number, is furnished the Board of Assessors in May of each year. From time to time these plat prints are corrected to show the changes made by transfers of property, and changes in ownership are also made on the card index in the Assessors' Office.

During the year the records of 90 estates have been looked up in the Probate Court at Taunton and the changes in ownership reported to the Assessors.

Ten new tracings of plats have been made to replace old tracings, and eight entirely new plats have been made to take care of the "cut ups" in the farming district.

December 1, 1910, there were 24,206 lots shown on the plats, being 2,017 more than on December 1, 1909.

Sewers have been shown on all the plats.

Respectfully submitted,

WILLIAM F. WILLIAMS,

City Engineer.

RECORD OF TIDES—1910.

FROM OBSERVATIONS BY ENGINEERING DEPARTMENT.

GAUGE LOCATED AT ROTCH WHARF.

ELEVATIONS ARE FROM "MEAN HIGH WATER."

CITY OF NEW BEDFORD,
April 3, 1911.

To the City Council Committee on Finance :

GENTLEMEN:—

The sub-committee on the valuation of city property reports herewith a list of city property and its value. The valuation of real estate has been secured from the Board of Assessors, and the valuation of other property has been secured from the officers in charge of the several departments. The entire valuation is believed by your sub-committee to be a fair valuation of the city property. List appended hereto:

ALDEGE CHAUSSE,
CHARLES W. JONES,
WILLIAM H. MURPHY,
Committee.

CITY OF NEW BEDFORD,
OFFICE OF THE CITY AUDITOR,
April 29, 1911.

The Honorable City Council :

I respectfully report that I have this day examined the report and investments of the trustees of the Kempton fund and find the same correct. Said investments are represented by securities having a face value of two hundred and fifty-seven thousand dollars, and a savings bank deposit amounting to one thousand dollars and sixty-three cents.

CHARLES J. MCGURK,
City Auditor.

CERTIFICATES.

We have examined the foregoing report and statements of the City Auditor, and believe the same to be correct.

JOHN F. HATCH, JR.,
HENRY E. WOODWARD,
FREDERIC H. TABER,

Sub-committee of the joint standing committee on finance,
appointed to examine the books and accounts of the City
Treasurer and City Auditor.

The foregoing report and statements of the City Auditor are approved.

JOHN HANNIGAN,
JOHN F. HATCH, JR.,
CHAS. W. JONES,
JOHN T. LIVESEY,
FREDERIC H. TABER,
Committee of Audit.

CITY OF NEW BEDFORD.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,
March 23, 1911.

Received, ordered printed in the City Documents and
sent down for concurrence.

CHARLES P. SAWYER,
Ass't City Clerk.

IN COMMON COUNCIL,
March 23, 1911.

Concurred.

W. H. B. REMINGTON,
Clerk.

Office of the City Treasurer,

New Bedford, December 5, 1910.

To the City Council of the City of New Bedford.

Gentlemen:—Submitted herewith find the annual report of this department for the year ending December 3, 1910, as required by the ordinances.

In addition to a classified statement of the cash receipts and disbursements for the year, I have prepared tables showing the condition of the City's several trust fund income accounts and the special funds authorized beyond the legal limit of indebtedness; also comparative tables of figures pertaining to the city debt, valuation of property and the division of the tax rate.

Respectfully submitted,

WILLIAM S. COOK,
City Treasurer.

Disbursements, previous years,	222,171.33
Balance December 5, 1910,	11,577.76
	<hr/>
	\$335,158.73

NEW HIGH SCHOOL.

Chapter 385, Acts of 1903.

Authorized loan, \$450,000.00.

Receipts from bonds issued to date,	\$200,000.00
Received from Treasury cash, previous to 1910,	1,620.37
	<hr/>
	\$201,620.37
Disbursements, 1910,	\$ 84,426.88
Disbursements, previous years,	101,620.37
Balance December 5, 1910,	15,573.12
	<hr/>
	\$201,620.37

WATER WORKS, DUPLICATE SUPPLY MAIN.

Chapter 202, Acts of 1909.

Authorized loan, \$250,000.00.

Receipts from bonds issued,	\$250,000.00
Department transfers, 1910,	836.65
	<hr/>
	\$250,836.65
Disbursements, 1910,	\$221,926.03
Disbursements, previous years,	20,677.55
Balance December 5, 1910,	8,233.07
	<hr/>
	\$250,836.65

TREASURER'S REPORT.

11

SEWERAGE PURPOSES.

Chapter 474, Acts of 1910.

Authorized loan, \$1,600,000.00,

Advances from Treasury cash,	\$5,112.32
------------------------------	------------

Disbursements, 1910,	\$5,112.32
----------------------	------------

SCHOOLHOUSE CONSTRUCTION.

Chapter 144, Acts of 1909.

Authorized loan, \$175,000.00.

Receipts from bonds issued,	\$100,000.00
-----------------------------	--------------

Disbursements, 1910,	\$93,976.22
Balance December 5, 1910,	6,023.78

\$100,000.00

SCHOOLHOUSE CONSTRUCTION.

Chapter 233, Acts of 1910.

Authorized loan, \$140,000.00.

Advances from Treasury cash,	\$25,710.00
------------------------------	-------------

Disbursements, 1910,	\$25,710.00
----------------------	-------------

TAUNTON GREAT RIVER BRIDGE.

Chapter 549, Acts of 1910.

Authorized loan, \$38,738.71.

Receipts from bonds issued,	\$38,738.71
-----------------------------	-------------

Disbursements, 1910,	\$38,738.71
----------------------	-------------

SCHOOLHOUSE CONSTRUCTION LOAN OF 1910.

Order of City Council approved November 15, 1910.

Authorized loan, \$14,000.00.

Advances from Treasury cash,	\$3,068.53
------------------------------	------------

Disbursements, 1910,	\$3,068.53
----------------------	------------

TREASURER'S REPORT.

HIGHWAY LOAN OF 1910.

Order of City Council approved June 28, 1910.

Authorized loan, \$50,000.00.

Receipts from bonds issued,	\$50,000.00
Disbursements, 1910, (block paving, special account)	\$50,000.00

MUNICIPAL LOAN No. 1 OF 1910.

Order of City Council approved February 12, 1910.

Authorized loan, \$215,200.00.

Receipts from bonds issued,	\$215,200.00
Disbursements, 1910:	
Schools, pay of teachers,	\$ 76,366.55
Police, special account,	25,792.12
Land for municipal building	110,200.00
Unexpended balance December 5, 1910,	2,841.33
	\$215,200.00

MUNICIPAL LOAN NO. 2 OF 1910.

Order of City Council approved May 13, 1910.

Authorized loan, \$41,000.00.

Receipts from bonds issued,	\$41,000.00
Disbursements, 1910, land damages,	\$35,817.60
Transfer, 1910, observance July 4, 1910,	750.00

Order of City Council approved September 9, 1910.

Authorized loan, \$50,000.00.

Receipts from bonds issued,	\$50,000.00
Disbursements, 1910, highways, special account,	\$49,970.32
Unexpended balance December 5, 1910,	29.68
	\$50,000.00

We have examined the foregoing and believe the same to be correct.

JOHN F. HATCH, JR.,
HENRY E. WOODWARD,
FREDERIC H. TABER,

Sub-committee of the Joint Standing Committee on Finance, appointed to examine the books and accounts of the City Treasurer and City Auditor.

The following table, compiled from previous reports, compares the Assessors' valuation of real and personal property, the tax rate, inventory of city property, funded water debt, funded debt other than water, and sinking funds, from the year 1901 to 1910, inclusive:—

Year	Assessors' Net Valuation Real and Personal	Tax Rate	Inventory City Property	Water Debt Funded	Other Funded Debt	Sinking Funds
1901	\$62,401,390	\$17.40	\$4,887,803	\$1,628,000	\$2,078,000	\$ 923,838
1902	61,964,450	17.40	4,954,634	1,598,000	2,311,000	1,044,399
1903	62,246,300	18.00	5,065,011	1,568,000	2,369,000	1,073,379
1904	62,865,476	19.20	5,228,788	1,538,000	2,630,000	1,184,665
1905	63,951,461	19.40	5,440,536	1,508,000	2,884,000	1,352,077
1906	65,550,381	18.40	5,576,817	1,478,000	2,844,000	1,495,459
1907	70,719,086	17.60	5,586,995	1,448,000	3,776,000	1,547,871
1908	75,505,198	19.00	5,777,292	1,418,000	4,468,000	1,661,725
1909	77,464,331	19.00	6,289,217	1,388,000	4,721,581	1,711,226
1910	83,426,001	19.00	8,453,894	1,638,000	5,494,938	1,873,676

COMPARATIVE TABLE OF DIVISION OF TAX RATE.

	1908	1909	1910
Rate per 1,000 dollars,	\$19.00	\$19.00	\$19.00
Divided as follows:			
State tax,	\$ 1.43	\$ 1.10	\$ 1.41
County tax,	1.26	1.21	1.30
City purposes,	10.86	11.28	10.50
City debt.	4.95	4.95	5.27
Grade crossings,	.14	.26	.23
Armory,	.02		
Overlay,	.34	.20	.29
	\$19.00	\$19.00	\$19.00

ANNUAL REPORT
OF THE
COLLECTOR OF TAXES.

December 5, 1910

To the City Council of the City of New Bedford:

Gentlemen:—In compliance with the ordinance requiring that the annual report of the Collector of Taxes shall be made to the City Council annually in January, I submit herewith detailed statements of all collections made during the fiscal year ending December 3, 1910, together with a statement of taxes remaining unpaid.

Respectfully submitted,

WILLIAM S. COOK,

Collector of Taxes.

REPORT

OF THE

Commissioners of the Sinking Funds

City of New Bedford,
March 29, 1911.

*To the City Council of the City of New Bedford,
Mass.:*

GENTLEMEN :—At a meeting of the Commissioners of Sinking Funds of the City of New Bedford, held at this date, it was

Voted :—To adopt the foregoing statement of the Treasurer of the Sinking Funds as the report of the Commissioners of the Sinking Funds of the City of New Bedford, required by the Statutes of the Commonwealth of Massachusetts to be made annually to the City Council.

WM. A. MACKIE,
EDMUND W. BOURNE,
Commissioners of the Sinking Funds.

Distribution of the receipts from taxation, water and wharf revenue appropriations and net income from the invested funds is shown in the following table, which also shows the standing of the various Sinking Fund Accounts at this date :—

JAMES P. FRANCIS,
Auditor and Accountant,
Masonic Building. New Bedford, Mass.,
March 2, 1911.

*William A. Mackie, Esq., Edmund W. Bourne, Esq.,
John T. Bullard, M. D., Commissioners New Bedford Sinking Funds :*

DEAR SIRs :—I have finished my examination of the books and accounts of the Treasurer of the Sinking Funds, and hereby certify that they are correct. I have also examined the securities representing the investments, and have found them as stated in his report.

Yours very truly,

JAMES P. FRANCIS,
Certified Public Accountant.

New Bedford, Mass.,
January 2, 1911.

To the City Council of New Bedford :

The Trustees of the Kempton Fund, under the will of Sarah E. Potter, herewith submit the following as their Third Annual

REPORT.

During the past year there has been no change of the securities in which the Fund of the Trust of \$250,000 is invested.

The gross amount of income which has been received by the Trustees is \$10,770, and this amount has been paid to the City Treasurer without any deduction for charges or expenses.

WM. W. CRAPO,
THOMAS B. TRIPP,
FREDERIC TABER,
Trustees.

City of New Bedford,
January 2, 1911.

*Trustees of the Kempton Fund, the gift of Sarah E.
Potter:*

GENTLEMEN:—As Treasurer of the Kempton Fund I have received and paid over to the City Treasurer, as provided by ordinance, the following amounts, being the income received during the year 1910, viz.:

INVESTMENT.	Par Value.	Rate.	Amount
C., B. & Q. R. R.	\$50,000.00	4%	\$2,000.00

FREDERICK C. GRAVES, M. D.,

Residence, 17 Campbell Street.

Appointed July 1, 1910.

REPORT.

HEADQUARTERS FIRE DEPARTMENT,
OFFICE OF CHIEF ENGINEER.

December 31, 1910.

To the Honorable the City Council:

GENTLEMEN:—I have the honor of submitting the annual report of the fire department for the year ending December 31, 1910, together with such recommendations as I deem necessary for increasing the efficiency of the department.

ORGANIZATION.

The department consists of:—

- Board of Engineers
- Fire Alarm and Repair Force
- 8 Engine Companies
- 4 Hose Companies
- 3 Hook and Ladder Companies
- 1 Protecting Society

MANUAL FORCE.

Seventy-two men, permanently employed, and one hundred and forty-six call men, comprise the manual force of this department.

FIRE STATIONS.

There are ten brick and one frame fire stations in good condition.

APPARATUS.

The apparatus consists of:—

- 5 Second Size Amoskeag Fire Engines
- 3 Second Size La France Fire Engines
- 1 Webb Auto Engine
- 6 Hose Wagons
- 2 Combination Chemical and Hose Wagons
- 3 "Dahill" Aerial Trucks
- 1 Combination Truck
- 2 Automobile Combination Chemicals
- 9 Exercise and Coal Wagons
- 2 Fire Alarm Wagons
- 1 Automobile for Repair Department
- 1 Chief's Buggy

IN RESERVE

- 1 Ryan Truck
- 2 Hose Wagons
- 1 Hand Engine
- 1 Hose Reel

HORSES.

There are forty-six horses in this department, mostly in good condition. Four of them should be replaced during the year.

HARNESSES.

There are nine sets for three horse hitches, twelve for two horse hitches and four single harnesses in good condition.

HOSE.

There are 17,450 feet of two and one-half inch cotton rubber lined hose, 16,450 feet in good condition and 1,000 feet fair, 7,000 feet has been condemned after tests during the year. Five thousand feet of new hose should be purchased at once.

FIRE ALARM.

We have ninety (90) public and forty-nine (49) private Gamewell fire alarm boxes of the non-interfering type, also thirteen bells and strikers, ten 15-inch gongs and fifteen of smaller size, all operated by a storage battery of 388 cells.

FIRE ALARM TELEGRAPH.

This branch of the service has been improved during the year, and the following additions made:—

- 15 Public
- 10 Private Fire Alarm boxes installed
- 700 feet of 32 Conductor cable, lead covered
- 4,400 feet of 16 Conductor cable, lead covered
- 1,000 feet of 2 Conductor cable, lead covered
- 6 miles of insulated wire
- 78 new cells for battery

All cables have been respliced throughout and three Junction Cable Boxes installed, more than 20 miles of unclaimed abandoned wire have been removed from poles.

FATALITIES.

William F. Brown, died March 10 from burns sustained March 8, 1910.

Mrs. Frank Rego, died July 11 from burns sustained July 10, 1910.

Albert J. Bradbury, died Aug. 27 from burns sustained Aug. 17, 1910.

Arthur C. Middleton, a lineman in the employ of the police department, under the supervision of this department, was instantly killed by coming in contact with high tension electric wires, April 7, 1910.

DEATHS.

ANDREW B. GRINNELL, JR., a member of Engine
Co. No. 9;
died Feb. 27, 1910;
joined the department May 30, 1870.

CAPT. DANIEL D. BRIGGS, Master Mechanic;
died March 3, 1910;
joined the department Aug. 1, 1866.

CAPT. MAURICE C. DAHILL, Engine Co. No. 7;
died April 18, 1910, as a result of injuries re-
ceived at a fire;
joined the department Sept. 1, 1890.

FINANCIAL STATEMENT.

	\$140,338.27	
By transfer	1,133.63	\$141,471.90

RECOMMENDATIONS.

I respectfully renew my recommendations of last year in reference to better building laws, new Central Station, and up-to-date Central Office equipment for the Fire Alarm Telegraph.

A also recommend that all apparatus in the Central Station be of the motor type; and none but permanent men employed in this station.

That a new automobile be purchased for the Master Mechanic.

That four young horses be purchased at once.

That the old hand engine and reels, the old Winton automobile and four horses that are no longer serviceable, be sold.

The temporary quarters of the Fire Alarm Telegraph instruments, the Chief Engineer's office, both unsuited and inadequate to present needs, the lack of accommodation for the constantly increasing permanent force at the Central Station, compel me to urge prompt action in the matter of building a new Central Fire Station, another Hook and Ladder truck is needed at the north part of the city, and if a new motor truck is installed in the center. Truck One could be used to advantage at Station No. 8, where one-half of the house is at present unoccupied.

CONCLUSION.

I extend my thanks to His Honor the Mayor, to the Honorable City Council, the Committee on Fire Department, and the Board of Engineers for the interest manifested in this department; to the Police Department for their assistance, and to the officers and men of the department for the manner in which they have performed their duties.

Respectfully submitted,

EDWARD F. DAHILL,
Chief Engineer.

THE NEW BEDFORD PROTECTING SOCIETY.

1910—1911.

JOHN H. LOWE, President.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,

January 26, 1911.

Received, ordered printed in the City Documents and
sent down for concurrence.

CHARLES P. SAWYER,

Ass't City Clerk.

IN COMMON COUNCIL,

January 26, 1911.

Concurred.

W. H. B. REMINGTON,

Clerk.

THIRTY-SECOND ANNUAL REPORT

OF

THE BOARD OF HEALTH

OF THE

CITY OF NEW BEDFORD

To the City Council for the Year 1910

NEW BEDFORD, MASS.
THE J. E. BUDLONG PRESS,
1911

REPORT.

OFFICE OF THE BOARD OF HEALTH,

New Bedford, January 2, 1911.

To the Honorable the Mayor and Gentlemen of the City Council:

The Board of Health respectfully submits its 32nd annual report covering the work for the year 1910.

There have been reported at the office of the Board 1,817 deaths and 1,515 cases of contagious diseases.

The number of cases of scarlet fever is considerably less than for 1909. The number of cases of diphtheria is slightly in excess of the number for 1909.

There was quite an increase in the number of cases of typhoid fever, especially in the early part of the year. As usual, each case was investigated to determine the cause. It appearing that the eating of shell-fish taken from contaminated waters was the principle cause of the disease, the Board of Health of New Bedford and the Board of Health of Fairhaven revoked all licenses for taking shell-fish for bait. It is now up to the Mass. Fish and Game Commission to prosecute any one who takes shell-fish illegally.

The Board has several times called to the attention of the Fish and Game Commission the violations of the law.

NEW BEDFORD'S MILK SUPPLY.

Since the inauguration in 1907 of supervision of the Milk Supply, conditions and methods have improved each year. Many milk producers who at first were prone to scoff are now enthusiastic and express regret at not having made improvements earlier. Very many have from the first welcomed suggestions from the Board, while a small number have been compelled against their will to comply with the requirements. Very many producers have by order of the Board protected the tie-ups and the milk from dirt sifting through floors of hay-mows by strong thick paper on the ceilings of the cow barns.

One sample of milk examined in the bacteriological laboratory showed diphtheria germs. The milk producer living in a nearby town was immediately notified by telephone and the Medical Inspector hurried to the farm to examine all who had to do with the handling of the milk and to obtain cultures from their throats. One of the farm-hands was shown to be suffering with diphtheria. There is yet much to be done and with the assistance of the consumers the problem is solved. If each consumer having leisure will visit the farm of his producer and observe conditions the producer will give heed to the most powerful factor in the business which engages him.

Some consumers having good milk at their doors immediately contaminate it by handling and improper treatment. An effort will be made to correct such abuse.

Of 249 samples of milk taken from carts the first of the year, the average bacterial count was slightly over 25,261 per c. c., while of 407 samples taken during the summer the average count was 35,863 per c. c. A very excellent showing. During 1910, 873 samples of milk were taken from delivery carts and examined in the laboratory of the bacteriologist.

Following is a list of dairy farms inspected

SOUTH DARTMOUTH—L. Gornell, Daniel Sweeney, Frank Peters, Manuel Madeiros, Jos. Salvadore, John Silvia, John Dias, Jos. Silvia, P. Brightman, Z. Kirby, A. C. Cushman, Samuel Gray, Herbert Wing, Clarence H. Slocum, Manuel Marshall, E. R. Cook, Chas. Macomber, Jos. Fernandes, Manuel Azevedo, Frank Cornell, Jos. Viera, Ellwood Gifford, John Enos, Nicholas Antone, John Maral, Jos. T. Warren, Manuel Viera, Jos. Lewis, F. G. Gidley, John Novacosta, Andrew Saxala, Tony Demers, M. P. Rodgers, W. C. Slocum, H. R. Slocum, John Cornell, A. B. Faunce, J. H. Smith, Jos. Howland, E. K. Dennis, Frank Terra, John Cook, Chas. C. Potter, David Duval, Napoleon Duchane, Matthew Luce, Manuel Braga, Fred Souza, Serina Correrio, Geo. Howland, Louis Manchester, G. Snell, Fred Grinnell (Bircheld Farm), Job S. Gidley, G. R. Neagus, Hawthorn Farm, Oliver Prescott, Jr., Manuel A. Santos, Manuel Fernandes, T. K. Wilbur, Perry C. Brownell, Geo. H. Hambly, John Roderique, Jos. Perry.

WESTPORT—L. W. Nicholson, F. A. Furtado, Jr., Joseph Wordell, C. S. Haskell, Pardon Manchester, Joseph P. Fernandes, Matthew J. Sylvia, Frank Lawrence, Everett Cornell, B. T. Petty, D. L. Petty, Elmer Gifford, Ed. Devoll, John Pedro, F. S. Tripp, Z. T. A. Brightman, Jas. F. Viera, Antone Rose, Oscar Crapo, Philip S. Tripp, Manuel Braga, Harold White, Fred A. Howland, Frank Souza, W. A. Lawton, Wm. Ritter, A. N. Sanford, Jos. Bourne, Mrs. A. S. Tripp, Ed. Peirce, Chas. Gifford, Chas. W. Hitt, Asa B. Allen, E. L. Davis, Geo. Smith, Mrs. Fred. K. Kirby, John Perry, H. Cook, Wm. S. Mercer, J. M. Madeiros, Eli F. Tripp, Joseph Jousaume.

FAIRHAVEN—E. L. Brawley, Geo. L. Hiller, Ernest Costa, Manuel Brown, Jacob S. Martin, Manuel Santos, Jos. Marshall, John Brown, Manuel Goulart, E. Manchester, J. B. Goulart, Antone Lopes, Joseph Magnim, Jos. Carvallo, Antone Rose, Chas. F. Howard, Widow Howard, B. G. Studley, D. B. Akin, Jesse Sylvia, Ephm. Delano, Clement St. Amand, Jr., Angelo Mello, D. W. Kendrick, Pierre Gentilhomone, H. St. Amand, H. N. Wilbur, Frank Young, Manuel Mello, Clement St.

Amand, A. Chicoin, Walter C. Howland, John Rivard, Alfred Benway, Antone Cabral, H. Robideau, H. C. Pierce, Wm. Howland, Ulrich Audette, Caesar Marshall, Jos. Eccles, Frank Paulino.

MATTAPOISETT—A. F. Backus, F. J. Vera, Antone Furtado, Nathan Oliver, Geo. A. Austin, Manuel Nunes, Walter Gammons, H. L. Dunham, Jerry Randall, Geo. Randall, W. H. Gammons, Chas. W. Ellis, Geo. Church.

BERKLEY—E. E. Peirce, John T. Haskins, F. T. Stiplas, C. F. Paull, John Randall.

ACUSHNET—Geo. T. Parker, Jos. Sylvia, Hannah Chase, L. Tripp, Geo. Macomber, Charles Leonard, F. Benjamin, A. L. Dillingham, H. Bartlett, J. Florent, Augustus White, Walter A. White, Jas. A. Budd, Jas. Dexter, Jos. Sears, Manuel Fergundus, Jos. Sylvia, Mrs. Job Chase, Chas. G. Cottle, Robt. Parker, Edw. W. Morse.

FREETOWN—Arthur Rogers, Jas. Ashley, Chas. Thomas, C. Edminster, Alden B. Lucas, Chas. A. Braley, Jos. Levaro.

LAKEVILLE—Albert White, J. T. Parkhurst, Sidney T. Nelson.

In addition to the above the following cow barns in the city limits were also inspected:

NEW BEDFORD—Manuel Miguel, Manuel Raposa, Manuel Phillipa, John Aruda, Morris Perry, Manuel Augustino, John Travers, Manuel Gomes, Antone R. Correria, La Chapelle, Antone Boas, Jos. Miguel, Manuel Costa, Manuel Bettencourt, Manuel Cowles, Augusta Corderia, Antone Andrus, Jos. Jason, Peter Marshall, Antone De Ris, Antone Gonzalves, H. J. Fredette, Edw. O. Spooner, Thomas O'Grady, Howland Bros., Frank Oliver, Joseph Sequiros, Wm. Coggeshall, Clark Allen, H. O. Casey, Wm. H. Turner, C. H. Hathaway, Mrs. E. H. Gammons, Wm. H. Lynch, Robt. Wilson, David Grew, Sr., L. F. Cardoza, C. T. W. Gifford, Robt. Mitchell.

Besides these inspections the Board has examined into the methods employed by a number of milk peddlers residing out of the city, doing business in New Bedford.

TUBERCULOSIS.

During the year 1910 there were reported at the office of the Board of Health 220 cases of tuberculosis, as against 205 in 1909. Acting under Chapter 386, Acts of 1907, aid has been given in 157 cases entailing an expenditure of more than \$10,000. For other contagious disease cases more than \$2,500 was expended. Of a total of nearly \$13,000 expended a portion was for aiding persons not having a settlement in New Bedford and return will be made of \$4,000 (approximately) spent for such cases. The Board of Health will receive no credit for this amount, as it will go to the credit of unappropriated funds, and the demands on the Board of Health will appear to have cost the City of New Bedford \$4,000 more than is the case. The Board of Health respectfully asks the Honorable City Council to direct that the Board shall receive its own credits.

New Bedford is fortunate over many cities in that a private institution—the New Bedford Anti-tuberculosis League—treats its patients so splendidly and at a charge to the City much below actual cost to itself.

The value of the work of the New Bedford Charity Organization has been made apparent to the Board many times during the year. Many worthy cases have been reported by the Charity Organization that otherwise would not have been known and consequently would not have been aided. Also cases discovered by the Board of Health to which no aid could be lawfully given under the contagious disease relief act have been reported to the Charity Organization and prompt relief was always given.

The number of deaths from pulmonary tuberculosis in 1910 was 106, as against 114 in 1909, and by months the deaths were:

	1909.	1910.
January,	11	8
February,	9	7
March,	15	5
April,	12	10
May,	7	12
June,	8	5
July,	5	10
August,	9	5
September,	12	11
October,	12	11
November,	5	12
December,	11	10
	<hr/> 114	<hr/> 106

ISOLATION HOSPITAL.

The scarlet fever and diphtheria wards at the Isolation Hospital have both been in commission this year. The scarlet fever ward has been twice used and the diphtheria ward has been four times used. It is the policy of the Board to treat scarlet fever and diphtheria at the homes of the patients when possible, and this purely for economic reasons. Unfortunately some have no homes and some have homes in institutions where the outbreak of certain contagious diseases is a terrible menace. Of the scarlet fever cases treated at the hospital, one was taken from the Orphans' Home. Of the diphtheria cases one was a young man without a home or friends in the city—having just arrived—and two others, children taken from St. Mary's Home, where were 174 other children. That no other cases occurred in St. Mary's Home is fortunate. The Isolation Hospital is not properly equipped; it should be. This matter has been called to the attention of other City Councils. Should the City Council honor the request of the Board of Health and equip the institution, plans may be drawn and bids obtained for equipment and what is considered best obtained. If the City Council should delay an emergency might arise compelling the equipment by the Board

of Health regardless of plans and bids. It may be economy for the Honorable City Government to act in this matter.

INFANTILE PARALYSIS.

In early July infantile paralysis, which has been epidemic in a number of cities and towns, made its appearance in New Bedford. Immediately measures were taken to treat it as other contagious diseases are treated. Eighteen cases were reported.

SMALL POX.

In May two cases of small pox were discovered, one at the south end and the other at the north end of the city. Both patients were removed to the small-pox hospital and 48 persons who had been exposed to contagion were kept under surveillance a proper length of time. The patient taken from the north end of the city had just arrived in a ship—Madera to Boston—which had a number of cases of small-pox on board. It was impossible to learn the origin of the other case.

CHOLERA SUSPECTS.

On September 26 steamship Germania from Naples, with cholera aboard, arrived in New York. Information was immediately given the New Bedford Board of Health of immigrants whose destination was New Bedford. Seventeen immigrants were kept under surveillance for three weeks, being visited by the Medical Inspector every other day during that time.

SLAUGHTERING OF FOWL.

During the year the Board of Health, after a conference with some of the leading Hebrew residents, caused the killing of fowl to be restricted to two places designated by the Board. Conditions are not ideal and must improve until all reasonable objections are met.

SLAUGHTERING OF ANIMALS.

The slaughtering of animals—other than fowl—is now confined to one establishment in the west end of the city and far removed from any dwelling. The building and equipment are new and are giving satisfaction.

PRIVY VAULTS.

During the year more privy vaults were ordered cleaned and abandoned than in any other year of the existence of the Board of Health. There are still too many. The house that is not worth plumbing is not worth living in.

BAKERIES.

The annual inspection of bakeries was made in the fall of 1910, and for the most part bakeries were found in fair condition. Those which were found in poor condition have since been visited and great improvement is noted. Some of the large bakeries are in excellent shape and clean.

RAT-PROOFING HOUSES.

As rats are carriers of disease and at times cause terrible plagues, the City Council is respectfully requested by the Board to cause all buildings erected in the future to be of rat-proof construction.

BARNs AND STABLES.

Licenses to maintain barns and stables have been granted in 1910 largely in excess of those granted in any previous year, but with more restrictions. A barn or stable must either be supplied with a suitable pit for the storage of manure where flies cannot breed or be supplied with covered barrels as containers of manure, and these to be emptied every week.

PLUMBING.

The unusual activity in building the past year, exceeding any record for a single year in the City's history, carried with it an unusual amount of work in the plumbing inspection department, which with orders for improvement of old property in wiping out long existing privy vaults, kept both inspectors of plumbing busy. During the year the Board issued 1,247 permits, 632 being for new buildings, and 617 for old work, classified as follows:

	Old.	New.
Sinks,	576	2,275
Water closets,	525	2,661
Wash bowls,	214	1,489
Bath tubs,	130	1,618
Wash trays,	47	308
Urinals,	8	61
Shower baths,	56
Drinking fountains,	8

Total number of fixtures,	1,500	8,476
---------------------------	-------	-------

In addition to this work, inspection of plumbing in Marion was made as usual, that town paying New Bedford for the services of the inspectors.

UNDERTAKERS.

Acting under provision of law, Chapter 78, Section 44, the following undertakers have been licensed, all of whom are registered embalmers:

P. H. Sherman,	Robert G. Bennett,
Wm. A. Payette,	Henry J. Proulx,
Henry P. Wilson,	J. E. Moriarty,
Vital Girard,	T. J. Murphy,
A. P. Lagasse & Son,	Henry J. McDonald,
Jeremiah F. Sullivan,	J. Arthur Larviere,
Joseph Carrier,	Charles H. Sullivan,
W. C. Vaughan, Jr.,	Joseph S. Williams.

VACCINATION.

During the year there were 1,225 free vaccinations at this office, 134 of which were revaccinations. This is the largest number for any single year since 1903, when there were 1,560 vaccinations.

Respectfully submitted,

FRANCIS M. KENNEDY,
LOUIS Z. NORMANDIN, M. D.,
HAROLD WINSLOW,

Board of Health.

PLUMBING INSPECTORS' REPORT.

NEW BEDFORD, Jan. 2, 1911.

To the Board of Health:

GENTLEMEN—Following is the report performed by me:
 Inspections, including investigation of nuisances and
 defective plumbing, 1,643
 Inspections in Marion, 20

Respectfully submitted,

LOUIS H. RICHARDSON,
 Inspector of Plumbing.

NEW BEDFORD, Jan. 2, 1911.

To the Board of Health:

GENTLEMEN—I herewith submit the following work performed by me as Plumbing Inspector in the territory assigned from Jan. 1, 1910, to Jan. 1, 1911:

Number of plumbing inspections,	2,308
Number of plumbing inspections in the town of Marion,	10
Number of houses placarded,	19
Number of complaints investigated,	43
Number of tenements inspected,	21
Number of filthy tenements,	16
Number of filthy cellars,	21
Number of filthy yards,	29
Number of filthy water closets,	33
Number of tenements overcrowded,	2
Number of defective drains,	23
Number of defective plumbing,	38
Number of defective water closets,	28
Number of defective sinks,	12

Respectfully submitted,

WILLIAM DEACON,
 Plumbing Inspector.

SCHOOL INSPECTORS' REPORT.

Following is the report of the work performed by the Medical School Inspectors for the year ending Dec. 31, 1910:

Whole number of children examined,	4,857
Whole number of children recommended sent home,	435
Whole number of consultations with teachers,	942
Mumps,	14
Tonsillitis,	72
Measles,	5

MILK INSPECTOR'S REPORT.

To the Board of Health of the City of New Bedford:

GENTLEMEN—I herewith submit my report as Inspector of Milk for the year ending December 31, 1910.

During the year I have issued 157 team licenses and 296 store licenses for the sale of milk, and 8 team licenses and 39 store licenses for the sale of oleomargarine, making a total of

500, for which in accordance with the state law a fee of fifty cents each has been collected and paid into the city treasury at various dates throughout the year and the Treasurer's receipt therefor taken.

A copy of the Rules and Regulations of the Board of Health governing the product, care and sale of milk in the City of New Bedford has been put in the hands of each man taking out a license, and he has been instructed to make himself familiar with its contents and act accordingly.

The Inspector beside making a personal examination of all dairy herds and premises within the City limits during the year, has been called upon at various times to visit herds, from which our milk supply comes, in the surrounding towns wherever and whenever trouble has been suspected.

The number of tuberculous cows which have been condemned from among the herds which supply the City's milk during the year, is somewhat less than last year, showing that the cows are in better condition than they were a year ago.

While this is a satisfaction the fact remains that tuberculosis still exists, and until it is totally eradicated we will not be justified in giving up the fight against it.

Respectfully submitted,

H. B. HAMILTON,

December 31, 1910.

Inspector.

SLAUGHTERED ANIMALS.

To the Board of Health of the City of New Bedford:

GENTLEMEN—I herewith submit my report as Inspector of Slaughtered Animals and Carcasses for the year 1910:

Number of beef cattle slaughtered,	396
Number of swine slaughtered,	536
Number of calves slaughtered,	669
Number of sheep slaughtered,	31

Of the beef cattle 3 per cent. were condemned; of the swine one-fifth of one per cent. were condemned; of the calves 2 per cent. were condemned as unfit for food.

Respectfully submitted,

H. B. HAMILTON,

December 31, 1910.

Inspector.

NEW BEDFORD, Jan. 2, 1911.

To the Board of Health:

GENTLEMEN—I present the following report as Health Officer for the year ending Dec. 31, 1910:

Whole number of houses placarded for contagious diseases,	347
Whole number of rooms disinfected,	1,437
Whole number of complaints of privy valuts,	65
Whole number of clogged water closet drains,	15
Whole number of defective drains (other than water closet),	9
Whole number of complaints of bad odors,	6
Whole number of complaints of water shut off creating nuisances,	2
Whole number of complaints of swill tub nuisances,	8
Whole number of complaints of barn nuisances,	8
Whole number of complaints of overflowing cess-pools,	3
Whole number of complaints of ash heaps and dirty yards,	51
Whole number of complaints of keeping pigs without a license,	3
Whole number of complaints of filthy water closets,	6
Whole number of complaints of water in cellar,	7
Whole number of complaints of filthy henyards,	1
Whole number of complaints of fish market nuisance,	1
Whole number of complaints of tuberculous patients spitting in yards, etc.,	4
Whole number of complaints of burying horses in fields,	2
Whole number of complaints of throwing slops in yards and street,	4
Whole number of complaints of slaughter house,	4
Whole number of loads of mattresses and bedding destroyed,	15

Whole number of manure piles ordered cleared up,	14
Filthy premises investigated,	13
Complaints without cause,	19
Visited sites for application to keep pigs,	2
Visited sites for application to maintain barns,	43

Respectfully submitted,

ROBERT N. B. DOANE,

Health Officers.

MEDICAL INSPECTOR'S REPORT.

NEW BEDFORD, Jan. 1, 1911.

To the Board of Health:

GENTLEMEN—I herewith submit my report as Medical Inspector for the year ending Dec. 31, 1910:

Number of cultures taken,	127
Number of cases of scarlet fever investigated,	249
Number of cases of measles investigated,	27
Number of cases of chicken pox investigated,	208
Number of cases of infantile paralysis investigated,	5
Number of cases of leprosy investigated,	1
Number of cases of typhoid fever investigated,	96
Number of cases of tuberculosis investigated as to diagnosis and history to determine settlement,	90
Number of cases of suspicious smallpox,	12
Number of cases exposed to cholera,	17

Respectfully submitted,

A. N. SENESAC, M. D.

During the year 1910 the following permits and licenses were granted:

Sewer permits,	763
Swine licenses,	29
Stable licenses,	49
Undertakers' licenses,	17
Slaughter house licenses,	9

Respectfully submitted,

S. J. SMALL,

Clerk.

EXPENDITURES FOR THE YEAR 1910.

SUSAN J. SMALL,

Clerk.

CULTURE MEDIA (DIPHTHERIA).

During the year stations for the distribution of culture media (diphtheria) have been established at the apothecary establishments of Ernest Query, corner of Kempton and Cottage streets, Charles T. Smith, corner of South Water and Potomska streets, F. R. Pease, corner of Acushnet avenue and Cedar Grove street, and at C. H. & H. A. Lawton Co., corner of Union and Purchase streets. These stations have been established for the convenience of physicians, who can always secure culture tubes ready for use.

REPORT OF BACTERIOLOGIST.

NEW BEDFORD, Jan. 1, 1911.

To the Board of Health:

GENTLEMEN—I herewith submit my report for the year ending Dec. 31, 1910:

Diphtheria:

Whole number of tests,	274
Whole number of tests positive,	91
Whole number of tests negative,	165
Whole number of tests unsatisfactory,	18
First culture positive,	2
First culture negative,	18
First culture unsatisfactory,	2

Tuberculosis:

Whole number of tests,	314
Whole number of tests positive,	99
Whole number of tests negative,	200
Whole number of tests unsatisfactory,	15

Typhoid Fever:

Whole number examined for widal tests,	5
Whole number positive,	0
Whole number negative,	5

Number of milk samples examined for bacteria, 872

Respectfully submitted,

A. H. MANDELL, M. D.,

Bacteriologist.

QUARANTINE OFFICER'S REPORT.

NEW BEDFORD, Jan. 2, 1911.

To the Board of Health:

GENTLEMEN—I have the honor to submit the following report as Quarantine Officer for the year ending Dec. 31, 1910:

Boarded 18 vessels. None of this number were held in quarantine, there being no contagion found on board.

Respectfully submitted,

JOSEPH A. FRASIER, M. D.

Quarantine Officer.

NEW BEDFORD EXTRACTOR CO.'S REPORT.

PROVIDENCE, R. I., November 30th, 1910.

*To the Board of Health,**City of New Bedford, Mass.:*

GENTLEMEN—We herewith submit our report for the year ending November 30th, 1910:

Garbage collected,	8,280 tons
Animals received,	664
Horses,	320
Cows,	11
Dogs,	324
Pigs,	6
Calves,	2
Goats,	1
	<hr/>
	664

50 tons oyster shells received.

100 tons scallop shells received,

Yours very truly,

NEW BEDFORD EXTRACTOR COMPANY,

CHAS. K. WHEELWRIGHT, Supt.

NECROLOGY.

The number of persons who have died during the year at an advanced age is 12 less than in 1909, the total for the year of those 80 years and over being 75, recorded as follows:

JANUARY.

	Years.	Months.	Days.
5 Sophronia M. Stevens,	80	6	20
7 Amy Jenks,	89	1	7
9 Susan P. Swain,	83	11	0
17 Sarah C. Potter,	80	2	29
18 Amos F. Lovejoy,	82	9	6
18 Sarah Lindsey,	94	10	5

FEBRUARY.

Report of

Inspector of Animals.

For the Year 1910.

CITY OF NEW BEDFORD.

*To the Honorable the Mayor and Board of Aldermen of the
City of New Bedford:*

GENTLEMEN:—My report as Inspector of Animals is herewith respectfully submitted.

In accordance with the State law and by order of the Chief of the Cattle Bureau, of the Board of Agriculture, an inspection of all neat cattle, sheep and swine has to be made during the months of October and November of each year and a detailed report of their condition, also the condition, location, light, water supply, ventilation and drainage of the stables has to be submitted to the Chief of the Bureau.

This duty has been attended to, and I find that there are 640 neat cattle, 165 swine, some half dozen sheep and as many goats; of the neat cattle, only one-half of one per cent. showed any symptoms of contagious diseases, which cases were promptly destroyed and the stables properly disinfected. Of the swine and goats, none were at all suspicious.

In the stables, of which there are 135, there have been a number of improvements since last inspection, such as better lighting, whitewashing, etc., so that the larger number of these are in good condition.

Only four cases of glanders have come to my notice since January 1, 1910, and these have been destroyed, the carcasses rendered and the stables disinfected. This is the smallest number that has been reported in any one year for a long time. A number of cases have been investigated, which have proven to be some non-contagious trouble. Only one suspicious case of rabies has been reported during the year, which upon investigation was found to be entirely harmless, and as there were no cases of this disease last year, it is safe to say that it does not exist in our city.

The residents of the city have the privilege of calling upon the Inspector of Animals at any time to investigate suspicious cases of contagious disease without expense to themselves, and during the year many have done so. This is not only a privilege, but a duty, for when these cases are brought to the Inspector's attention they are properly disposed of in accordance with the State law and the regulations of the Cattle Bureau of the State Board of Agriculture.

Respectfully submitted,

H. B. HAMILTON,

Inspector.

Trustees' Report

To the City Council of New Bedford.

GENTLEMEN:—The Board of Trustees of the New Bedford Free Public Library presents for your consideration its fifty-ninth Annual Report for the year 1910, as follows:

The Librarian's report, which is presented herewith, contains details of the work done by the library and shows a very satisfactory condition for the past year.

One year ago the Trustees in their annual report called attention to the time, then rapidly approaching, when the new library building would reach completion and took occasion to commend the work of all connected with the enterprise. Their pleasurable anticipations have been more than realized. No city of its size can boast of a library architecturally more beautiful, of more substantial construction nor better adapted to its use as a library than the New Bedford Free Public Library, dedicated, as the tablets soon to be placed upon its walls will proclaim, to the culture and education of all the people, a people's university and free to all. The Trustees believe that the citizens will cheerfully assume the added burden of expense in the administration of the library which the new order entails.

On December 1, 1910, exercises were held in the lecture hall for the purpose of dedicating the new building in a formal manner, and addresses were made by a number of distinguished gentlemen prominent in library work. It was an exceedingly enjoyable occasion and the words of commendation which were heard on every hand were convincing proof, if any proof were needed, of the wisdom of the scheme of transmuting the old City Hall into the elegant new Free Public Library building which now has taken its place.

The various rooms devoted to the study of art, genealogy, patents, reference works and magazines, general literature, the newspaper room, and last, but certainly not least in importance, that for the use of the children, are all so well patronized that it is difficult to understand how a library can be efficiently conducted without such rooms. The public certainly have shown a hearty appreciation of the privileges and advantages for reading and study which the new library affords.

The library is fortunate in its staff. The Board desires to express its cordial appreciation of the work of Mr. Tripp, the Librarian, and his assistants. The service rendered deserves hearty commendation.

Respectfully submitted,

CHARLES S. ASHLEY,

D. HERBERT COOK,

ROBERT C. SHERMAN,

OTIS SEABURY COOK,

Board of Trustees.

Librarian's Report

To the Board of Trustees of the Free Public Library.

GENTLEMEN :—This report is the Tenth Annual Report of the present Librarian, and the Fifty-ninth Report of the Free Public Library.

For the first time in many years the library is in a condition where the public and the attendants are not crowded for room. The new building, opened on December 1st, after a month's occupancy seems to fulfill all reasonable demands, and the beauty of its architecture and the convenience of arrangement have been regarded with universal satisfaction. No one department, with the exception of the children's room, is overcrowded, and yet the library is used more fully than ever before. By distribution of the work into the different departments, the work of the library staff is carried on with ease, and the convenience of the public is greatly enhanced.

In accordance with a vote of the Board, a pamphlet will soon be prepared by the Librarian, giving a full report of the opening exercises, and containing a description of the building.

A short review of each department is here given.

The newspaper room proves to be conveniently placed, and its ease of access and freedom from interruption to the readers makes it of great value to those who wish to consult the papers there on file. The whaling collection on the walls brings many visitors to the room, outside the regular newspaper readers.

The children's room from the start has proved its usefulness, something over 1,200 children having registered during the first month, including those who registered for a few days before the library was opened. The

circulation of juveniles for the month was 7,208. While the first few days showed a good deal of bustle and apparent confusion in the room, there was no disorder and the assistants were easily able to handle the crowds of eager youth who seemed to welcome and appreciate the beautiful room opened to their use. The room opened with about 3,500 absolutely new books on the shelves, with a reserve of several thousand juveniles which could be supplied from the stacks as the demand should arise.

In Ingraham Hall, for the first time, the people have had an opportunity to use a reading room which is distinct from the other departments of the library, and its use, which is constantly increasing, shows that the privilege is regarded with great favor. The shelves are constantly being restocked with books from the main collections, and there is opportunity for the people to find well selected literature, which they are free to read in the room, or have charged at the desk.

The reference room, across the hall, is usually filled by those consulting the magazines or seeking special information from the reference books on the shelves. The information department of the library is located in this room.

The delivery desk, although the work has been somewhat diverted to different departments, is yet a busier place than ever before. All books are returned to this desk, and books which are taken directly from the stacks, pass over the counter.

The art room, perhaps, shows more than any other department the great resources of the library. Almost at once the shelves, cases, and drawers were filled with books and pictures which had been crowded into the front room of the old building. A new bookcase, which is needed for the room, will very comfortably provide for the books which are now on the tops of the cases.

The lecture room was first used on Thursday evening, December 8th, when the New Bedford Civic Club held a meeting addressed by Rev. Thomas I. Gasson, S. J., President of the Boston College, who spoke on "The Dignity and Rights of Labor." The Medical Society and the Dental Society have both been given the privilege of using the room at regular intervals through the winter, and during the first month the Medical Society held two meetings there. The Librarian sees a great field for usefulness in the lecture room, and hopes to formulate a plan to present to the Trustees by which a series of lectures on artistic, scientific, and civic themes can be provided, largely by local talent. The room can be made a civic centre for the interchange of ideas, and the dissemination of knowledge, and it should prove to be one of the most useful rooms in the building. It will also be suggested that a series of lectures should be provided each winter on historical or scientific subjects, free to the people, and presented by speakers of noted reputation. As the Lowell lectures in Boston have proved to be an extremely valuable means of culture, something of the same nature might be provided under the auspices of this Board, and the importance of such a work can hardly be overestimated. Loan art exhibitions could also be planned for this room, and I strongly urge the consideration of these projects by an appropriate committee of the Board.

The people who use the genealogical room are pleased with the convenience of arrangement, and the accessibility of the volumes which they are daily consulting. This room contains the genealogical material proper, and also the New England town and state histories.

The room for the blind is well adapted for the purpose, and by the kind thoughtfulness of the ladies of the Woman's club, its facilities will be largely increased, since they plan, with the approval of the board, to present

a bas-relief for the walls, also to arrange for weekly readings to the blind, which can be held in that room, or in the lecture room, if their room is not large enough.

The study rooms have been used, although of course their use will be greater when the people thoroughly appreciate the value of the opportunity for quiet and seclusion which they offer to students.

The patent office room contains one of the largest collections of patent reports in New England, and arranged as it is in convenient quarters, should prove of great value to the inventors and mechanics of New Bedford. It has already been used with profit and will continue to grow in usefulness as its value is demonstrated.

CIRCULATION.

The circulation of books for the past year has been 247,889. The influence of the new building has already been shown in the large circulation for December, about 27,000, the largest, for a single month, in the history of the library.

On the 13th of July a new registration of card holders was begun for the purpose of weeding out the dead cards from the registration. Also a new system of charging books has been established, which is a great improvement on the old, which had been in use for many years. The present system, which is called "The Newark Charging System," is the one most favored in the libraries of our class.

LOCAL RECORDS.

The work which has been carried on for two years on the Crane papers is nearing completion, and by February the completed work will have been delivered to the printer, so that the volumes should be ready for distribution in the spring. The publication of the Crane Field Books is really a monumental work, and will undoubtedly

prove of great value, as they contain the first records of land titles to most of the land in this section.

The transcription of the Old Dartmouth Records, which are being prepared for publication by the New England Historical and Genealogical Society, is approaching completion, and should be finished within a month.

PUBLICATIONS.

The usual monthly bulletins through the year, and several special bulletins, one on "Health and Sanitation" for the Woman's Club; a reading list on "Fruits, Flowers, and Vegetables," prepared in connection with the garden work carried on by the Horticultural Society; and the list of the Peirce Genealogies, were also printed.

GIFTS.

The most notable gifts through the year have been two paintings, "The Wetterhorn and the Wellhorn," by J. Jansen, presented by Mrs. Myles Standish of New York, and "The Rock Bound Coast," by R. Swain Gifford, presented by Miss Emma C. Jones of New York.

Through the courtesy of the Superintendent of Schools, the books which formed the teachers' library, numbering 450 titles, have been placed in the library.

Many other gifts of single volumes are noted in the appendix which accompanies this report.

WORN-OUT BOOKS.

Books which have been used up in the service of the library have been distributed among various charitable organizations and small libraries. Books and papers also have been sent to the Union for Good Works, the St. Mary's Home, St. Luke's Hospital, etc.

Various collections of books have been distributed as deposits in stations in different parts of the city. One collection was sent to the Salter's Point Inn for use in

that locality. Many collections have been circulated among Sunday Schools of the city, while the work in the day schools continues with satisfactory results.

BRANCHES.

Work at the branches has been carried on as usual, the West Branch especially circulating a large number of books, and very well caring for the library wants of that section. The North Branch has been somewhat hampered by moving into temporary quarters, but we trust that when the new rooms are completed there will be a great increase in circulation, and a very satisfactory service. The room planned for the Weld street building will give a large, well-lighted, and extremely convenient room for the library, with entrances from Acushnet avenue and Weld street. At the South Branch, Robert Allen, who has served faithfully for many years as branch librarian, retires from the service to devote his whole attention to his profession.

In accordance with the suggestion in the Mayor's inaugural address, the prospective branch at Lund's Corner will prove to be a most useful adjunct in the service, and give library facilities to a section of the city which is now inadequately covered.

The newspapers of New Bedford have been very willing to print items of interest in connection with the library, and have published weekly the lists of additions, and their assistance in advertising the resources of the library is duly recognized.

Owing to the moving into the new building, the corps of assistants has had to be very largely increased. The work of the staff through the year has been uniformly satisfactory, and all the attendants have entered upon their work with an enthusiasm and spirit of loyalty which promises much for the successful operation of the library.

The Librarian, speaking for himself, and also for the staff, would express appreciation for the valuable help which has been rendered by the Board of Trustees, individually and collectively.

In moving from the old building to the new it was necessary to withhold library privileges from the public for a few days, but it was extremely gratifying to hear no word of dissatisfaction concerning the temporary inconvenience, and in beginning the work in our new building, it is a most delightful augury for the future to note the universal tone of satisfaction with which everyone expresses his appreciation of the library building which securely holds the valuable manuscripts, books, pamphlets, and works of art, which comprise the Free Public Library of New Bedford.

Respectfully submitted,

GEO. H. TRIPP,

Librarian.

Secretary, WILLIAM F. CASWELL.
General Supt., THOMAS W. COOK.

CONSULTING ENGINEER.

WILLIAM F. WILLIAMS, City Engineer.

CITY OF NEW BEDFORD, .
OFFICE OF THE PARK COMMISSIONERS.

December 1, 1910.

*To His Honor the Mayor and the City Council of the City
of New Bedford:*

GENTLEMEN:—The Board of Park Commissioners submit herewith their seventeenth annual report for the fiscal year ending November 30, 1910, together with a financial statement showing all receipts and disbursements for the same.

Appropriation	\$33,000.00
Receipts from rent and sales.....	207.65
	<hr/>
	\$33,207.65
Expenditures	\$33,034.19
	<hr/>
Balance	\$173.46

The work of the year is shown in the detailed reports of the departments.

During the year the business of the Board has been transacted at the regular meetings the first of each month and at such special meetings as were required by the exigency of the occasion. At the first meeting in the year Samuel P. Richmond was again elected Chairman and William F. Caswell Secretary; also Thomas W. Cook, General Superintendent of Parks.

The work of the past year has not been much different from the preceding years, improvements being made only to the extent that the limited amount of funds available over and above that required for maintenance would allow.

The increase of \$8,000 over the annual appropriation of previous years was largely expended for the increase in

the wages for labor, which increase was general in all departments of the city, and also a change in the management of the Water Department, whereby this department was made to pay out of their appropriation the cost of water used in the parks, and which heretofore had not been charged to them, making an increase in their expenditures of about \$3,000, which they could hardly afford to spare, where so much in other directions was needed. In future that addition must be met by an increase in the annual appropriation for that specific purpose. The Board realize that the sentiment of the community is in favor of parks well kept and offering every facility for happy, healthful recreation, and that the extensive awakening through the country as to the value of well planned and beautiful parks; that every city and community are aware that they are facing a positive necessity and must meet the demands of the people and times in prompt and well considered and careful execution of the work, that will make the city and its parks beautiful, and will receive the appreciation of the æsthetic, economic and hygienic value of well kept parks, entertained by the people.

During the year the Board have to some extent elaborated their system of playgrounds. Several new baseball diamonds were added to the playfield of both Brooklawn and Buttonwood Parks, also tennis courts and cricket creases were among the additions. And to accommodate the lovers of the games in the south part of the city two very nice lots of land belonging to the City Farm were placed in charge of the Park Board and were made into game fields, where baseball, tennis and cricket were played and enjoyed by the people who lived too far from the parks to visit them for that purpose. Some comment has been made to the end that playgrounds and game fields could not be laid out and maintained in all our parks without detriment to the landscape beauty of the park, but the experience of Park Board management throughout the country has proved the contrary. The Board are very positive in their opinion that

playgrounds and game fields should be maintained in all the parks that are large enough to contain them. They should be equipped with all the most improved apparatus and, under proper rules and regulations, should be available to all the children for as long a time as the season for outdoor recreation would admit, certainly from May 1st until November. Our experience with what limited amount of play apparatus we have on our parks is that no more profitable expenditure can be made in the interest of the parks and the younger portion of our community than that a portion of each park be assigned to playground privileges and equipped with all the modern apparatus for games and play. The want of shelter houses is a constant annoyance to the park management and absolutely embarrassing to multitudes of visitors to the parks. The conveniences which should be provided for the people and found in well built structures or shelter houses are not to be found in our parks, and the Board urgently request that the appropriation asked for by the Board for the purpose of constructing proper and useful buildings for shelter, comfort and convenience may be allowed. They can be made of frame and concrete or entirely of concrete block construction with pebble dash finish outside, and so designed as to be available for many purposes, such as storage of supplies, an assembly room, toilet accommodations for men and women, repair room and piazza and open space room large enough to protect a goodly number of people in time of sudden rain storms or inclement weather at any time. The need of such houses on Brooklawn and Buttonwood Parks is imperative, and the request of the Board for money to install them at once should be allowed.

The Board do not feel that they invite but little adverse criticism when they plead for appropriations for such a purpose, and the bitterest opponents to park expenditures must admit the utility of public comfort, shelter and station houses on our parks. The Common should be provided with better walks. They are travelled over by a large por-

tion of our citizens of the north part of the city and, situated in a residential neighborhood, they should be made to appear respectable; and the people living around the Common are constantly urging the Board to replace the old walks with new and more modern ones. In order to keep them safe and thereby prevent accidents to the pedestrians and the multitude of children who play there, it is a constant work of patching and filling the holes. The Board earnestly hope that an appropriation may be made to meet this much desired work. The present area of tar concrete walks in the Common is 4,200 square yards. To replace these with granolithic walks, laid on a cinder base, eight inches thick, the concrete top to be four inches in thickness, made of the best American Portland cement, according to the city's specification for granolithic sidewalks, will cost complete \$1.80 per square yard, making the total cost of laying 4,200 square yards of granolithic walks \$7,560. This estimate does not include edge strips. Is this an expense that the city should assume? The Board think it is and therefore recommend it.

The pond, which is very much desired on Brooklawn Park by not only the citizens in the north part of the city, but is a general wish of all our people as an additional beautifier of the park, and as a skating pond in winter and for aquatic sports in summer, and the engineers report that it could have an area of between two and three acres, requiring an excavation of some eight or nine cubic yards of material and the construction of a dam around the southerly border of the same, and assuming that the surplus material could be utilized at some convenient point to the pond, would cost about \$5,000.

The Board do not hesitate to urge for your favorable consideration the representations which they have made in former reports as to the need of improvements, although they are aware the possibilities in park development of our park system are numerous, and that much of the work must be designed and extended with a proper relation to

the future; but some of the recommendations in this report should have immediate attention, and for that reason we have asked for specific sums in the appropriation, and hope that your honorable body will appreciate our feelings in that respect and satisfy the hopes, wishes and desires of not only this Board, but a large part of your constituents.

Of the appropriation, the following was expended for

Labor	\$20,710.33
Materials	12,323.86
Total	<u>\$33,034.19</u>

Respectfully submitted,

SAMUEL P. RICHMOND, Chairman,

WILLIAM F. CASWELL, Secretary,

OBED C. NYE,

WILLIAM KEITH,

ANTONE L. SYLVIA,

Park Commissioners.

REPORT OF THE SUPERINTENDENT OF PARKS.

The Board of Park Commissioners:

GENTLEMEN:—I herewith submit to your honorable body my report of work done on the parks for the year ending November 30, 1910, and a summary of the expenditures for park purposes from the time the Board of Park Commissioners were appointed. The parks have been well patronized the past year, and I am convinced that the pleasure and contentment of the people is promoted by having appropriate places in the shape of well kept parks and playgrounds where they can assemble individually and with their families when they feel like doing so, and it is evident to all who have witnessed the throngs who visit the parks, stroll around, enjoy the quiet of the groves or enjoy the games as played on the fields, appreciate the effort of the authorities to make our city and her parks occupy an enviable position. The possibilities of usefulness are limitless. "If we would love our city, we must make our city lovely." The requirements and demands for parks, parkways, recreation and playgrounds for our rapidly growing city if provided would exhaust an appropriation many times larger than the ones placed annually at the disposal of the Park Commission.

BUTTONWOOD PARK.

Area, 69 acres, 31.37 square rods.

A new non-climable wire fence with steel posts has just been put up around the deer pen about 1,200 feet in length, making with its steel posts a very sightly and no doubt enduring structure; the cost entire being \$519.19.

Also two children's slides have been placed in the grove, and make quite a desirable addition to the apparatus for the children's pleasure and amusement.

Comfortable seats have been built around the baseball diamonds, making it comfortable for the spectators to witness the games. Two tennis courts have been installed. Also cricket creases are among the new additions for games. The two brass field guns the city has owned for many years for saluting purposes were given to the parks by the City Council and placed on this park, and make a very pleasing show.

All the buildings have been kept in good repair. Having been painted this year, they all look in good condition. Settees and swings have been repaired and painted. Forty pin oaks (*quercus palustris*) were set out on the south side of the driveway leading to the pond. In order to derive the most benefit from this park, its boundaries should be extended to Hawthorn street on the south, Kempton street on the north, Brownell avenue on the west and Rockland avenue on the east, and the land needed for the purpose should be purchased at once. The area of the section running to Hawthorn street contains 18 acres 138.42 square rods and has been taxed for \$8,225, on the north running to Kempton street, land owned by F. W. Oesting and Carlo D. Finni. Soon it will be impossible to purchase these tracts of land, for that part of the city is being rapidly built upon. About 1,000 cubic yards of dirt have been used in grading. The skating was very good for about thirty days and enjoyed by thousands of people, many of whom hardly ever visit the park only when skating is to be had.

The park has been kept in usual good trim, as required by its prominent location and popular use, but the limited means available for maintenance have restricted the making of certain repairs which should receive attention the coming season.

EXPENDITURES ON THIS PARK.

Labor	\$5,123.36
Materials	3,769.36

BROOKLAWN PARK.

Area, 86 acres, 100.86 square rods.

This park has been exceedingly well patronized the past year. The picnic grove has been in use every fair and pleasant day during the season, and seems to be attractive to schools and societies and associations from neighboring cities and towns for their sociable gatherings and outings, for which it is certainly a most desirable place.

The only improvement of importance made here the past year is the extension of the deer and elk paddock, which has been extended to about double its former size, and 1,250 cubic yards of dirt used to fill the low and swampy places, making it a superior place for animals, and makes it practically complete for that purpose. The baseball diamonds were used more than ever. Seats were built on each side of the diamonds and everything done to provide the people that love the sport so well with good accommodations.

It seems to be the history of all parks, wherever situated, that their increasing usefulness does not constantly call for improvements and repairs, and this park is not an exception. Although this park is well supplied with attractions and meets all reasonable demands of the visiting public, there are improvements possible, which would add to the park's attractiveness and usefulness. The more a park is appreciated and used by an appreciative public, the more demands will be made upon the management for maintenance and improvement.

One of the largest items of expense in the maintenance of this park is the water needed for its many uses. Previous to this year the city or Water Board made no charge for water, but now having metered all the parks, we have to meet that item in maintenance, which the past year amounted to \$1,310.68.

The entire park was kept in excellent condition, and although the elm-leaf beetle attempted to make some ravages among the trees, they were not very successful.

Twelve Rock maples (*A. Saccharinurn*) were planted around the little pond recently made. All the old sheds and small houses and enclosures used for small animals near the grove were removed and the space used for the addition to the elk paddock, which is a great improvement, not only in appearance to the park, but in utility.

EXPENDITURES ON THIS PARK.

Labor	\$5,632.42
Materials	3,718.59

COMMON.

Area, 7 acres, 69½ square rods.

This park has been, as usual, the favorite resort of a large number of people, and the floral display, although limited, gave pleasure to a great many visitors who go there and on the restful seats enjoy the quiet and beauty of the place. It is a favorite place for small children who with their attendants find a delightfully healthy place for the little ones. The flower beds of the Common from early spring till the season of frost have been a delight to citizens and strangers.

"The parks are havens of sweetness and rest for mothers and wives and sweethearts; above all, they are for the children, for all the people, high and low, with equal rights and privileges for every class."—Cowan.

As year after year rolls on, the need and popularity of the parks increases, and the attendance and use becomes accordingly greater, and therefore the real mission of the public park is accomplished. On account of the frequent and numerous inquiries made at the office in relation to the origin of the Common, it is deemed proper to insert it in this report. Although it was published once before by this Board, and again we place it here on record, as shown in the City Engineer's office, and which says that two of the seven acres now included in the Common were obtained in small lots, and that all except two deeds have been made since New Bedford became a city.

The present area of the Common, including the land between Pearl and Pope streets, which forms the double Pleasant street, is 7 acres, 69½ square rods. The town of New Bedford acquired the "town lot" of 5 acres and 3 rods from Alexander and Sarah W. Read, May 20, 1822, and the deed is recorded in book 1, page 389, at the Registry of Deeds.

The town of New Bedford acquired from William S. E. Pope and Bethuel Penniman, on December 26, 1846, a small triangle adjoining the town lot, area not given. It is bounded by Pearl and State streets and by the town lot in the description. Perhaps this was a Christmas present, for the deed went on record the day after Christmas. The deed is on book 14, page 44.

In the year 1853 there were eight transfers of land to the City of New Bedford, as follows:

James Beetle to the city, June 11, 30 rods; book 25, page 60. Bethuel Penniman and William G. E. Pope, June 13, 25.98 rods; book 25, page 61. William S. E. Pope, June 9, three lots, 50.34, 14.98 and 29.03 rods; book 25, page 62. Horatio Smith, June 13, 45 rods; book 25, page 23. Jonathan R. Ward, June 13, 50.37 rods; book 25, page 64. Bethuel Penniman, Jr., June 9, 28.37 rods; book 25, page 64. John Coggeshall, June 9, 92.55 rods; book 25, page 65. Edward S. Ritchie, June 13, 16 rods; book 25, page 66. Such is the origin of the Common, so far as known in this office.

There are many suggestions that could easily be made, but refrain from doing so until the financial situation is in better condition.

EXPENDITURES FOR THE YEAR.

Labor	\$4,442.62
Materials	2,135.27

GROVE PARK.

Area, 149.54 square rods.

A valuable tract of 149.54 square rods, situated on Water street, in the midst of a thickly populated manufacturing district and is essentially a children's playground, and as such has been provided with the necessary apparatus, consisting of swings, teeters, slides, giant strides, running track, flying rings, vaulting standards and sand boxes, and despite the fact that we have no organized work or superintendent on the playground, the attendance was more than could be well accommodated, especially Saturdays and Sundays. The apparatus was put up for the season much earlier than in former years and kept up later in the fall.

During the early spring, 1,896 cubic yards of dirt were used in grading and putting in good order the surface of the ground, and a small portion of the ledge in the northwest corner of the park was blown out, making it easier for the children in their play. Before the summer vacations the children swarmed to the playground immediately after the school sessions and played with great earnestness, emphasizing the fact that children seem to have intense hunger for exercise and muscular activity. But few accidents happened during the season. The Board hope to add still more to the attractions of the place for play.

EXPENDITURES FOR THE YEAR.

Labor	\$405.27
Materials	824.41

BRIDGE APPROACH.

This place has been kept in good condition, and the only change or improvement made was the planting out of twenty Rock or sugar maples (*A. Saccharinum*), and also the change of the Rhododendrons, which bordered the north side of the place. We transferred these to Buttonwood

Park, they not having done well here, and put in their place the following shrubs:

100 Berberis Vulgaris.	225 Hydrangeas.
150 Hibiscus.	100 Forsythia.
212 Deutzias.	116 Spirea.

About all there is to do here is to keep the grass cut, walks clean and shrub and flower beds kept in order, which has been scrupulously done.

The electric cars running through part of the lawn disturb the grass quite a good deal and it requires constant care to keep it in order.

EXPENDITURES FOR THE YEAR.

Labor	\$816.18
Materials	323.09

HAZELWOOD PARK.

Area, 23 acres, 12.39 square rods.

(Water front), 21.49 square rods.

This park has been well maintained. The roads, paths and lawns have been kept in good order. No improvements of any importance have been made here. It is in fair condition to accommodate the public, who are appreciating it more and more every year. The beautiful views of harbor and bay are alone enough to attract the lovers of scenes unsurpassed for marine beauty, and should make our citizens feel proud of the acquisition of this little park of 23 acres with its 21 rods of shore, a wise and thoughtful procedure on the part of the Park Board who consummated it. In connection with this park, two lots of land belonging to the City Farm and near to the park were loaned to the Park Department for game fields, and by them baseball diamonds, cricket creases and tennis courts were installed and answered the demands for such things by the people of that part of the city. These were taken care of by the men from this park. There is ample opportunity for improvements and some are very much needed.

EXPENDITURES FOR THE YEAR.

Labor	\$2,305.92
Materials	868.12

TRIANGLE PARK.

Area, 25.87 square rods.

The only work of importance done here was the planting out of some three hundred shrubs, making a border around the place. I would most earnestly recommend that all the trees be taken up and moved to the outer line of the sidewalk, as they are too crowded where they are now. It would greatly improve the place.

EXPENDITURES FOR THE YEAR.

Labor and Materials.....\$192.91

Respectfully submitted,

THOMAS W. COOK,
General Superintendent.

FINANCIAL REPORT.

New Bedford, December 1, 1910.

To the Board of Park Commissioners:

GENTLEMEN:—The seventeenth annual financial report of the receipts and expenditures of the Department of Parks for the year ending November 30, 1910, which I now have the honor to submit, contains in detail information regarding the finances of the department, including the receipts, expenses and disbursements of the Park Commission, and affords in this summary, which is given herewith, an opportunity for those who are interested in the parks and their management, maintenance and improvement a correct and well defined explanation of all moneys provided by the taxpayers and expended by the Park Board for park purposes, not only for the past year, but the total amount charged to the department since the adoption of the park system, is comprehensively made apparent by this report, and submitted to our citizens for their consideration.

ANNUAL REPORT

OF THE

SEALER OF WEIGHTS AND MEASURES

TO THE CITY COUNCIL

FOR THE YEAR 1910.

NEW BEDFORD:
NEW BEDFORD PRINTING CO., PRINTERS
1911

REPORT OF
SEALER OF WEIGHTS AND MEASURES.

NEW BEDFORD, Mass., Nov. 30, 1910.

TO HIS HONOR THE MAYOR AND THE HONORABLE
CITY COUNCIL:—

Gentlemen:— I have the honor to present to you my annual report as Sealer of Weights and Measures Department of the City of New Bedford for the year ending Nov. 30, 1910.

As shown in the report of the department, I have tested, adjusted, sealed or condemned a total of 15,884 scales, balances, weights and measures of all kinds during the year. The department has at all times endeavored to enforce the laws of weights and measures in a reasonable and equitable manner. Dealers and peddlers are, as a rule, complying with the law, and in most cases where the law has been violated, it has been through the ignorance of the party or through the carelessness of some employee.

On account of the interstate commerce law, as well as on account of the unfortunate fact that there is no uniformity of weights and measures of many commodities between the various states, it is impossible to prevent wholesalers from short boxes or other short containers. This works great harm, and is decidedly unfortunate to local manufacturers, packers or pro-

ducers of various commodities, as, for instance, raisers of strawberries, etc. I believe, however, that I shall be able to stop some of the abuses, and the department will have the support in this work of all honest dealers in the city.

There seems to be an increasing demand for articles put up in packages ready for sale, but as the state has not yet seen fit to enact a law compelling manufacturers, producers and packers to indicate on the outside of the container the net contents in weight or measure, there is more or less fraud being perpetrated. Although working under adverse conditions on account of the laxity of the laws of the state, I wish to say that while I may not have been entirely successful in making every dealer give 16 ounces to the pound every time, vigilance and activity has certainly restrained tendencies which might have been toward fraud and imposition.

In addition to the above, there were also frequent inspections of coal, coke and charcoal in bags; and ice cream boxes that were found short are now up to the standard.

It has been the policy of the Sealer to bring about a proper respect for weight and measure laws without resorting to extreme methods, and he believes it has been successful.

In closing this report, I wish to thank the city officials, the manufacturers and merchants, for the courteous manner in which they have received me in the discharge of my duties.

A detailed report of the work performed, and an inventory of the office is herewith presented.

INVENTORY OF PROPERTY.

Property in Office of Sealer of Weights and Measures,
Odd Fellows Building, Mechanics Lane.

Standards.

- 5 nickel plated weights, 50, 25, 20, 10, 5 lbs.

JOHN H. RYAN,

Sealer of Weights and Measures.

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

AND

THE BOARD OF TRUSTEES

OF THE

INDEPENDENT INDUSTRIAL SCHOOL

OF THE

CITY OF NEW BEDFORD

For the Year 1910.

NEW BEDFORD:
NEW BEDFORD PRINTING CO., PRINTERS
1911

IN SCHOOL COMMITTEE,

DECEMBER 30, 1910.

Voted, That the Superintendent and Secretary prepare the Annual Report of the School Board for the year 1910, and that 1500 copies of the same be printed.

Report of the Secretary.

By direction of the School Committee, I submit to our fellow citizens the following report for the year 1910.

STATISTICS.

I. POPULATION AND VALUATION.

The population of the city (census of 1890) was	40,705
The population of the city (census of 1895) was	55,251
The population of the city (census of 1900) was	62,442
The population of the city (census of 1905) was	74,321
The population of the city (census of 1910) was	96,652
Valuation of the taxable property (1910) was	\$83,906,051.00
School houses and lots,	1,622,225.00
Other school property,	113,000.00

II. APPROPRIATION.

Rate of taxation,	\$19.00
Amount for school purposes, not including new buildings,	392,292.30

III. SCHOOL CENSUS.

School census, October, 1909 (children between five and fifteen years of age)	15,568
School census, October, 1910 (children between five and fifteen years of age),	16,374
Increase as shown by the returns,	806

SCHOOL CENSUS BY WARDS.

	1909	1910	
Ward One,	4,808	5,588	increase 780
Ward Two,	2,084	1,798	decrease 286
Ward Three,	1,055	1,018	decrease 37
Ward Four,	1,246	1,291	increase 45
Ward Five,	1,961	1,843	decrease 118
Ward Six,	4,414	4,836	increase 422
Totals,	15,568	16,374	increase 806

Location of children between five and fifteen years of age, as to school attendance, as reported by the census enumerators.

	Attending Public Schools	Attending Private Schools	Attending No Schools
Ward One,	2,478	1,899	1,211
Ward Two,	1,023	648	127
Ward Three,	869	128	21
Ward Four,	1,116	94	81
Ward Five,	1,588	93	162
Ward Six,	3,470	897	469

Children reported as attending no school are presumably those who are between five and seven years of age, and those over fourteen.

IV. SCHOOL ORGANIZATION.

High School,	1
Normal and Training School for teachers,	1
Grammar schools,	5
Mixed schools—Grammar, Primary and Ungraded,	6
Primary schools,	14
Suburban schools,	2
Cooking school,	1
Manual Training school,	3
	<hr/> 33

V. SCHOOL BUILDINGS, JULY 1, 1910.

Permanent schoolhouses,	29
Portable schoolhouses,	5
Buildings hired for schools,	2
	<hr/> 36

VI. SEATS JULY 1, 1910.

	Seats occupied.	Seats unoccupied.
High school,	541	
Normal and Training school,	361	65
Grammar schools,	2,560	452
Mixed schools,	2,595	613
Primary schools,	4,288	1,003
Suburban schools (ungraded)	68	31
	<hr/>	<hr/>
Totals,	10,413	2,164

SCHOOL REPORT

5

VII. TEACHERS.

Whole number in service, January 1, 1911.

High school: 24 teachers, 1 librarian, 1 clerk,	26
Normal Training school: Regular teachers,	11
Elementary schools,	272
Special teachers,	16
Primary assistants,	2
Regular substitutes,	2
Evening Commercial school,	10
Evening Elementary schools,	64
Total,	403

PUBLIC SCHOOLS.

	1909	1910	
Enrollment of pupils,	11,364	11,964	increase 600
Average number belonging,	10,014	10,340	increase 326
Average daily attendance,	9,401	9,745	increase 344
Per cent. of attendance,	93.8	94.1	increase .3
Number cases absence,	225,046	216,595	decrease 8,451
Number cases of tardiness,	12,894	12,514	decrease 380
Number cases dismissal,	5,973	5,501	decrease 472

PRIVATE AND PAROCHIAL SCHOOLS.

September, 1909, to July, 1910.

	1909	1910	
Enrollment of pupils,	3,788	4,433	increase 645
Average number belonging,	3,473	3,876	increase 403
Average daily attendance,	3,139	3,488	increase 349
Per cent. daily attendance,	90.3	89.9	decrease .4

PUBLIC, PRIVATE AND PAROCHIAL SCHOOLS.

	1909	1910	
Enrollment of pupils,	15,152	16,397	increase 1,245
Average number belonging,	13,487	14,216	increase 729
Average daily attendance,	12,540	13,233	increase 693
Per cent. daily attendance,	92.9	93.	increase .1

AVERAGE COST OF INSTRUCTION PER SCHOLAR BY
SCHOOLS.

TABLE I.

The cost of instruction per scholar is based upon the average number belonging to each school during the year, and the amount expended for the hire of teachers, fuel, care of schoolhouses, books and supplies, (except those furnished from the income of the Sylvia Ann Howland Educational Fund and Dog Fund), the term, "care of school-houses" including only the salaries of janitors.

High school,	\$68.23
Harrington Normal and Training school,	40.52
Elementary schools,	29.18
Evening Elementary schools,	4.95
Evening Commercial school,	13.38
Day school,	31.79

TABLE II.

The cost of instruction per scholar is based on the average number belonging and the total amount expended for the maintenance of each department, not including the expenditures from the Sylvia Ann Howland Educational Fund or Dog Fund, during the year.

High school,	\$72.52
Harrington Normal and Training school,	41.55
Elementary schools,	30.92
Evening Elementary schools,	5.06
Evening Commercial school,	13.54
Day school,	33.29

RECEIPTS AND EXPENDITURES.

1910.

Summary.

Total appropriation and receipts,	\$369,292.30
Total expenditures,	357,527.94

School Pupil to the Community.

GEORGE ELIHU BRIGGS, JR.

Honorable mention is made of Lena K. Arden, the author of a Class Play in three acts. It is a very creditable work, characterized by excellent English, and careful arrangement of details.

THE CLASS HYMN.

Words by Ruth Wanton Pierce. Music by Harold Eustace Pierce.

With joy and sorrow, hope and fear,
The hour has come to-day,
When we to schoolmates loved and dear
Our last farewell must say.
These four years swiftly by have flown,
While teachers kind and true
Have many seeds of wisdom sown,
More precious than we knew.

In future years, these seeds shall grow
And blossom as the flower;
Upon our lives, new grace bestow,
Inspire us with new power.
In this great world, our part shall be
To scatter hope and cheer;
Set free with wisdom's golden key
Hearts that are dark and drear.

This hour a thought of sadness bears;
For one we loved has found
A heavenly refuge from life's cares,
Where love and peace abound.
Yet long as memory shall live
His life of service true
Shall ever strength and courage give,
And help us strive anew.

As schoolmates, nevermore shall we
Meet as in days gone by;
But friends at heart we'll always be,
Tho' miles between us lie;
These happy days of our school life
Shall hope and comfort give;
Throughout the years of toil and strife,
These memories shall live.

CLASS OF 1910.

Fortiter et Recte.

CANDIDATES FOR DIPLOMAS.

College Preparatory Course.

With Highest Credit.

Frances Dunbar Perry

Elsie May Bennett

With Credit.

Harold Everett Beetle	Francis Freeman Jones
Carlton Everett Borden	Ralph Kirk Wilbur
George Elihu Briggs, Jr.	Lena Kate Arden
Arthur Winslow Brooks	Lydia Grinnell Brown
Jacob Genensky	Marion Louise Clarke
Paul Crowell Howes	Ruth Wanton Pierce

Donald Brightman	Phillips Hamilton Ryder
Stephen Luther Child, Jr.	Albert Case Sherman, Jr
Harry Lider	Gertrude Elizabeth Delaney
Harold Eustace Pierce	Florence Lillian Gibbs
Theodore Ramsdell	Emma Adelaide Paulding
Harry Rothschild	Beryle Stewart Smith

General Course.

With Credit.

Rosamund Wentworth Ashley	Mary Margaret Leonard
Mildred Edna Brownell	Helena Catherine Mahoney
Pearl Iroquois Hart	Ethel Broadhurst Andrew Mills
Hilda Ullman King	Fannie Holden Wilbur

Edna Ellsworth Wright

Alfred Henry LaRocque	Mary Frances McAuliffe
Mildred Lillius Bates	Annie Elizabeth McIsaac
Marion Girtwood Dantsizen	Lila Annie Neves
Bessie Keith Foster	Edna Josephine Paul
Alice Almy Goulding	Gertrude Belle Peirce
Isadore Almy Gray	Charity Pierce Rounseville
Cora Macy Jason	Stella Abiah Ryan
Dora Mason Jason	Lillian Easter Thackeray
Almyra Sherman Manchester	Alice Cecilia Wood

Commercial Course.

With Credit.

Charles John Allen, Jr.	Ruth Gertrude Hilton
Laura Evangeline Godin	Emma Louise Russell

Thomas Brady, Jr.	Leslie Stevens Reed
Edward Everett Cook	Emerald Alton Tripp
Austin Burton Croshere	Mildred Russell Howland
William Alexander Jenney	Clara Susie Lawrence
Roy Turner Hawes	Gertrude Alden Sturtevant
Lester Albert Potter	Grace Carlton Taber

CANDIDATES FOR CERTIFICATES.

Isaac Arthur Crapo	Mary Hardy Wilson
Henry Whittier Danforth	Ruby Ellen Davies
Chester Howland	Leonora Frances Gifford
Howard Irving Wordell	Delia Frances Kendrick
Madeline Frances Smith	Elizabeth Myers

Post Graduates.

Edwin Clifford Luce, Jr.
Solid Geometry, Algebra, Bookkeeping.

Florence Swain Bliss
Bookkeeping.

Holden Remington
French, U. S. History, Chemistry, Algebra, Plain Geometry, Solid
Geometry.

DEPARTMENT OF PUBLIC SCHOOLS.

Brief description of the schoolhouses, with their accommodations and conditions.

AMENDMENT MADE TO THE RULES AND REGULATIONS DURING THE YEAR 1910.

Chapter XII. Section 17, adopted December 5, 1910.

No pupil of the high school who is a member of any fraternity or sorority shall be eligible for office in the cadets, on any athletic team, or in any other organization representing the school.

MASSACHUSETTS SCHOOL LEGISLATION FOR 1910.

CHAPTER 201.

AN ACT RELATIVE TO MILITARY DRILL IN PUBLIC SCHOOLS.

SECTION 1. Section thirty-four of chapter forty-two of the Revised Laws is hereby amended by striking out the last sentence in said section and inserting in place thereof the following:—No pupil shall be required to take part in any military exercise if his parent or guardian is of the religious denomination of Quakers or Shakers or of any other religious denomination conscientiously opposed to bearing arms, or if said parent or guardian is himself conscientiously scrupulous of bearing arms, and so notifies the school committee in writing; or if a physician of good standing shall certify in writing that in his opinion such exercise would be injurious to the pupil's health,—so as to read as follows:—*Section 34.* The school committee shall direct what books shall be used in the public schools, and shall prescribe, as far as is practicable, a course of studies and exercises to be pursued therein. Such exercises may, at the discretion of the committee, include

calisthenics, gymnastics and military drill; but no special instructors shall be employed therefor except by a two-thirds vote of the committee. No pupil shall be required to take part in any military exercise if his parent or guardian is of the religious denomination of Quakers or Shakers or of any other religious denomination conscientiously opposed to bearing arms, or if said parent or guardian is himself conscientiously scrupulous of bearing arms, and so notifies the school committee in writing; or if a physician of good standing shall certify in writing that in his opinion such exercise would be injurious to the pupil's health.

SEC. 2. This act shall take effect upon its passage.

Approved March 11, 1910.

CHAPTER 249.

AN ACT RELATIVE TO THE FORGING OF BIRTH CERTIFICATES.

Section sixty-one of chapter five hundred and fourteen of the acts of the year nineteen hundred and nine is hereby amended by adding at the end thereof the words:—and whoever forges, or procures to be forged, or assists in forging a certificate of birth of such minor, and whoever presents or assists in presenting a forged certificate of birth, to a school committee or to the person authorized by law to receive certificates, for the purpose of fraudulently obtaining the school certificate mentioned in section sixty, shall be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment for not less than three months nor more than one year, or by both such fine and imprisonment,—so as to read as follows:—*Section 61.* Whoever employs a minor under the age of sixteen years, and whoever procures or, having under his control a minor under such age, permits, such minor to be employed in violation of the provisions of sections fifty-six and fifty-seven of this act, shall for each offence be punished by a fine of not more than three hundred dollars, or by imprisonment for not more than six months, or by both such fine and imprisonment; and

whoever continues to employ a minor in violation of the provisions of either of said sections, after being notified thereof by a truant officer or by an inspector of factories and public buildings, shall for every day thereafter while such employment continues be punished by a fine of not less than twenty nor more than one hundred dollars, or by imprisonment for not more than six months; and whoever forges, or procures to be forged, or assists in forging a certificate of birth of such minor, and whoever presents or assists in presenting a forged certificate of birth, to a school committee or to the person authorized by law to receive certificates, for the purpose of fraudulently obtaining the school certificate mentioned in section sixty, shall be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment for not less than three months nor more than one year, or by both such fine and imprisonment.

Approved March 18, 1910.

CHAPTER 257.

AN ACT TO PROVIDE FOR MEDICAL INSPECTION OF WORKING CHILDREN BETWEEN THE AGES OF FOURTEEN AND SIXTEEN.

SECTION 1. Section one of chapter five hundred and two of the acts of the year nineteen hundred and six is hereby amended by inserting after the word "act," in the sixth line, the words:—and shall assign one or more to perform the duty of examining children who apply for health certificates in accordance with this act,—so as to read as follows:—*Section 1.* The school committee of every city and town in the commonwealth shall appoint one or more school physicians, shall assign one to each public school within its city or town, and shall provide them with all proper facilities for the performance of their duties as prescribed in this act; and shall assign one or more to perform the duty of examining children who apply for health certificates in accordance with this act: *provided, however,* that in cities wherein the board of health

is already maintaining or shall hereafter maintain substantially such medical inspection as this act requires, the board of health shall appoint and assign the school physician.

SEC. 2. Section two of said chapter five hundred and two is hereby amended by adding at the end thereof the words:—Every school physician who is assigned to perform the duty of examining children who apply for health certificates shall make a prompt examination of every child who wishes to obtain an age and schooling certificate, as provided in section sixty of chapter five hundred and fourteen of the acts of the year nineteen hundred and nine, and who presents to said physician an employment ticket, as provided in said section, and the physician shall certify in writing whether or not in his opinion such child is in sufficiently sound health and physically able to perform the work which the child intends to do,—so as to read as follows:—*Section 2.* Every school physician shall make a prompt examination and diagnosis of all children referred to him as hereinafter provided, and such further examination of teachers, janitors and school buildings as in his opinion the protection of the health of the pupils may require. Every school physician who is assigned to perform the duty of examining children who apply for health certificates shall make a prompt examination of every child who wishes to obtain an age and schooling certificate, as provided in section sixty of chapter five hundred and fourteen of the acts of the year nineteen hundred and nine, and who presents to said physician an employment ticket, as provided in said section, and the physician shall certify in writing whether or not in his opinion such child is in sufficiently sound health and physically able to perform the work which the child intends to do.

SEC. 3. Section fifty-eight of chapter five hundred and fourteen of the acts of the year nineteen hundred and nine is hereby amended by inserting after the word “language,” in the twelfth and thirteenth lines, the words:—nor until such person has received a certificate signed by a physician, as provided in chapter five hundred and two of the acts of the

year nineteen hundred and six and acts passed in amendment thereof, or by a physician appointed by the school committee, stating that said minor has been examined by him and in his opinion is in sufficiently sound health and physically able to perform the work which the minor intends to do: *provided, however*, that the age and schooling certificate may be approved and issued without a physician's certificate if there shall be on file in connection with the public schools a written record in regard to the child's physical condition made within one year and the person authorized to approve said age and schooling certificate after having examined such record shall certify that in his opinion said minor is in sufficiently sound health and physically able to perform the work which the minor intends to do,—so as to read as follows:—

Section 58. An age and schooling certificate shall be approved only by the superintendent of schools or by a person authorized by him in writing, or, if there is no superintendent of schools, by a person authorized by the school committee; but no member of a school committee or other person authorized as aforesaid shall approve such certificate for any minor then in or about to enter his own employment or the employment of a firm or corporation of which he is a member, officer or employee. No such certificate shall be approved by any person unless he is satisfied that the minor therein named is able to read at sight and to write legibly simple sentences in the English language, nor until such person has received a certificate signed by a physician, as provided in chapter five hundred and two of the acts of the year nineteen hundred and six and acts passed in amendment thereof, or by a physician appointed by the school committee, stating that said minor has been examined by him and in his opinion is in sufficiently sound health and physically able to perform the work which the minor intends to do: *provided, however*, that the age and schooling certificate may be approved and issued without a physician's certificate if there shall be on file in connection with the public schools a written record in regard to the child's physical condition made within one year and the person authorized to approve said age and schooling certificate

after having examined such record shall certify that in his opinion said minor is in sufficiently sound health and physically able to perform the work which the minor intends to do. The person who approves the certificate may administer the oath provided for therein, but no fee shall be charged therefor.

SEC. 4. The age and schooling certificate set forth in section sixty of said chapter five hundred and fourteen is hereby amended by inserting after the word "language," in the thirty-eighth line, the words:—I further certify that in my opinion (or in the opinion of the physician by whom said minor has been examined in accordance with section fifty-eight of the above chapter) he (or she) is in sufficiently sound health and physically able to perform the work which he (or she) intends to do,—so that the said certificate will read as follows:—

AGE AND SCHOOLING CERTIFICATE, ST. 1909, C. , § .

This certifies that I am the [father, mother, guardian or custodian] of [name of minor], and that [he or she] was born at [name of city or town], in the county of [name of county, if known], and state [or country] of , on the [day and year of birth], and is now [number of years and months] old.

[Signature of father, mother, guardian, or custodian.]

[City or town and date.]

Then personally appeared before me the above named [name of person signing], and made oath that the foregoing certificate by [him or her] signed is true to the best of [his or her] knowledge and belief. I hereby approve the foregoing certificate of [name of minor], height [feet and inches], complexion [fair or dark], hair [color], having no sufficient reason to doubt that [he or she] is of the age therein certified. I hereby certify and am satisfied that [he or she] can read at sight and can write legibly simple sentences in the English language. I further certify that in my opinion [or in the opinion of], the physician by whom said

minor has been examined in accordance with section fifty-eight of the above chapter] he [or she] is in sufficiently sound health and physically able to perform the work which he [or she] intends to do.

This certificate belongs to [name of minor in whose behalf it is drawn], and is to be surrendered to [him or her] whenever [he or she] leaves the service of the corporation or employer holding the same; but if not claimed by said minor within thirty days after such time, it shall be returned to the superintendent of schools, or, if there is no superintendent of schools, to the school committee.

[Signature of person authorized to approve and sign,
with official character or authority.]

[City or town and date.]

In the case of a minor who cannot read at sight and write legibly simple sentences in the English language, the certificate shall continue as follows, after the word "language:"—

I hereby certify that [he or she] is regularly attending the [name] public evening school. This certificate shall continue in force only so long as the regular attendance of said minor at the evening school is endorsed weekly by a teacher thereof.

SEC. 5. This act shall take effect on the first day of August in the year nineteen hundred and ten.

Approved March 19, 1910.

CHAPTER 524.

AN ACT TO PROVIDE FOR COMPULSORY INSTRUCTION IN THRIFT IN THE PUBLIC SCHOOLS.

Section one of chapter forty-two of the Revised Laws, relating to the subjects that shall be taught in the public schools, as amended by chapter one hundred and eighty-one of the acts of the year nineteen hundred and eight, is hereby further amended by inserting after the word "ethics," in the twenty-fourth line, the word:—thrift.

Approved May 13, 1910.

CHAPTER 532.

AN ACT RELATIVE TO THE ADMISSION OF CHILDREN UNDER FOURTEEN YEARS OF AGE TO PLACES OF AMUSEMENT.

Section one hundred and eighty-four of chapter one hundred and two of the Revised Laws, as amended by chapter one hundred and seven of the acts of the year nineteen hundred and six, and by chapter three hundred and fifty-five of the acts of the year nineteen hundred and seven, is hereby further amended by striking out the last sentence, and inserting in the place thereof the following sentence:—The provisions of this section shall not apply to shows or entertainments which take place before six o'clock in the afternoon and during the hours that the school of which the child attending such show or entertainment is a pupil is not in session. It shall be prima facie evidence that such school is in session if the public schools are in session in the city or town in which said show or entertainment shall take place,—so as to read as follows:—*Section 184.* Whoever, himself or by his servant or agent, admits a child under the age of fourteen years to any licensed show or place of amusement unless such child is accompanied by a person above the age of twenty-one years, shall, on complaint of a parent or guardian of the child or of any police officer or of a truant officer of the city or town in which the child is so admitted, be punished by a fine of not more than one hundred dollars; but he shall not be liable to said fine if a child apparently fourteen years of age has obtained admission by any written misrepresentation or by any unauthorized entrance to said place of amusement, or has entered with and apparently in the company of a person above the age of twenty-one years but does not remain with such person, provided the person in charge of said place of amusement shall remove such child immediately from said place of amusement upon knowledge of the fact that the child is under fourteen years of age and not then accompanied by a person above the age of twenty-one years. The provisions of this section shall not apply to shows or entertainments which take

place before six o'clock in the afternoon and during the hours that the school of which the child attending such show or entertainment is a pupil is not in session. It shall be prima facie evidence that such school is in session if the public schools are in session in the city or town in which said show or entertainment shall take place. *Approved May 18, 1910.*

CHAPTER 65.

RESOLVE TO PROVIDE FOR TUBERCULOSIS EXHIBITS FOR USE IN THE PUBLIC SCHOOLS.

Resolved, That the sum of one thousand dollars be allowed and paid out of the treasury of the commonwealth, to be expended under the supervision of the Massachusetts commission on hospitals for consumptives, for the formation of small traveling school tuberculosis exhibits to be used in the public schools throughout the state for purposes of instruction in hygiene and the prevention of tuberculosis.

Approved April 13, 1910.

CHAPTER 133.

RESOLVE TO PROVIDE FOR AN INVESTIGATION AND REPORT RELATIVE TO THE ESTABLISHMENT OF A SYSTEM OF AGRICULTURAL SCHOOLS.

Resolved, That the board of education is hereby authorized and directed to investigate the advisability of establishing a system of agricultural schools throughout the commonwealth, and to report the result of its investigation with its recommendations to the next general court not later than the second Wednesday in January, nineteen hundred and eleven.

Approved June 10, 1910.

Report of the Superintendent.

TO THE HONORABLE SCHOOL COMMITTEE:

Miss Winslow and Gentlemen:—I have the honor to submit my third annual report, which is the fiftieth in the series of annual reports of the Superintendent of Schools of this city.

The fact that children differ in mental alertness, moral responsibility, mental attitudes, tastes, and tendencies, physical condition, environment and vocational aim, was made the basis for the program at the meeting of the Department of Superintendence at Indianapolis last March. Nothing could emphasize the existence of these differences more than the rapid growth in the cosmopolitan population of our city. A new eight year elementary course of study, with semi-annual promotions has been prepared, ungraded classes and special classes for backward children have been organized, and an industrial school has been established in New Bedford in recognition of these conditions and in an endeavor to give to each pupil every opportunity for advancement.

The courses of study in Arithmetic and English have been revised during the year by competent committees made up of teachers and principals. In Arithmetic the aim has been to give more emphasis to the fundamental processes in a practical and efficient manner, and in English, composition work has been given more prominence.

As many of our children leave school at the age of fourteen years to go to work our course has been so arranged that it is possible for the pupil to have completed some definite courses at the end of the sixth year, this being the time when a large majority drop out of school.

Ungraded classes, started as an experiment, have become a fixed part of our organization. While these classes are

planned for illiterates and the course of study followed is such as will enable the pupil to meet the legal requirements for a work certificate, many pupils have been transferred to the regular grades and have done good work. One boy, who entered one of these classes three years ago, is now in the freshman class at the High school.

The best teachers in our corps are needed for these classes and I recommend that the teachers having charge of this work be paid fifty dollars per year extra when such increase is recommended by their principal and the superintendent. Because the work is difficult the experienced teachers avoid it and it is necessary to assign new teachers to the vacancies which occur. Among these there is a desire to secure a transfer to the regular grades as soon as possible, usually just as they are becoming efficient in their teaching. I hope this recommendation will receive your early consideration.

The classes for backward children have been under the personal direction of Miss Stuart, and the good work accomplished under her able supervision warrants more such classes in different sections of the city.

SCHOOL ACCOMMODATIONS.

The most pressing need of this department at the present time is additional room. Realizing that the opening of new mills would crowd our present quarters, we asked for ten portable school buildings last June. As no funds were available the problem had to be solved by organizing half-time classes at the Phillips Avenue, T. A. Greene, Acushnet Avenue, Thompson Street, I. W. Benjamin, and George H. Dunbar schools. This adjustment has not been kindly received by the parents. By placing extra teachers in the most crowded sections we have aimed to keep the work up to grade. The only method of properly meeting this question is to purchase a sufficient number of portable school buildings. These can be located according to our needs. That portable buildings can be moved successfully has been demonstrated during the

month of November, when the two buildings located on the W. H. Taylor lot were removed to the Phillips Avenue yard and made ready for use in three weeks. We will need at least eight buildings to properly house the children at the opening of the second term on February 6, 1911.

I recommend again the erection of a twenty-room building in the south part of the city between the Dunbar and Benjamin schools. The completion of the Sharp mill will bring more children into a district already overtaking our facilities. Such a building would relieve the congestion at the Dunbar, Congdon, Thompson Street, Benjamin, and Taylor schools.

The completion of the addition to the Taylor building found us ready to occupy every room at once. With several new tenement houses nearly ready for occupancy we will find it necessary to relieve the lower grades very soon.

An addition to the Parker Street building is needed at once. We have two classes in the assembly hall and one in the front corridor on the third floor. Such an arrangement deprives the school of the use of its hall and is far from an ideal plan. The land at the west of the present lot should be purchased to allow for such enlargement.

The occupancy of the new high school building will make available the Summer Street school for grammar school purposes and provision should be made for its remodelling that the Middle Street school may be transferred at the earliest possible moment.

The two rooms on the third floor at the Rodman school should be finished at once, as we now occupy all the finished rooms and the district is growing fast.

TEACHERS.

Several of our teachers have resigned during the past year for the usual reasons. New Jersey cities are constantly drawing teachers from New England, and New Bedford has lost its full share. A salary of \$1,050. with a liberal pension law, is too strong an inducement to be withstood. Higher salaries

for the grade teachers and a pension law are sure to come, but will have to be adjusted with due regard to the financial condition of our city.

Following are the names of teachers who have resigned, or have had leave of absence, and who have been appointed to the corps:

RESIGNATIONS.

Baylies, Stella H.	Landers, Rose C.
Burgess, Lucy P.	Law, William
Daniels, Ella L.	Longley, Emma F.
Eldridge, Albert G.	Oesting, Mary E.
Feenan, Alice G.	Pasho, Mary E.
Gunn, Marie L.	Price, Tinnie L.
Harwood, Bessie M.	Roberts, Annie M.
Hervey, Helen C.	Talbot, Florence F.
Higham, Elizabeth P.	Thomas, Mabel M.
Isherwood, Elsie M.	Woodsome, Ada M.

ABSENT ON LEAVE FOR WHOLE OR PART OF YEAR
ON ACCOUNT OF ILLNESS, STUDY, AND
OTHER CAUSES.

Burnham, Mabel	Livingston, Mary F.
Burgess, Lucy P.	Leavitt, Carrie M.
Creed, Loretto M.	Macreading, Annie L.
Dexter, Marion H.	Page, Lillian E.
Drew, A. Mable	Thomas, Lillian T.
Howland, Lucy W.	Wordell, Rachel M.
Haslam, Marion K.	

APPOINTMENTS.

Baker, Ethel A.	Buker, Milfred I.
Bannon, Mary G.	Connorton, Ellen T.
Barrows, Sarah D.	Dorgan, Mary Z.
Borden, Gertrude	Dorman, Allison R.
Briggs, Rhoda A.	Dugdale, Elizabeth A.
Briscoe, Retta M.	Eaton, Eliza M.
Budgen, Marguerite E.	Feenan, Alice G.

Finnell, Grace M.
Frost, Carrie M.
Gunn, Marie L.
Haslam, Marion K.
Hayes, Elizabeth G.
Holmquist, Ellen O.
Kateon, Margaret I.
Knowlton, Grace A.
Livingston, Janet M.
Lynch, Catherine F.
McCarthy, Stella
Nesmith, Bessie F.
Norcross, Olivia H.
Ricketson, Florence

Sargent, Ruth E.
Sears, L. Estelle
Shepherd, Isabelle H.
Sherman, Ella F.
Sherman, Ruth R.
Stanley, Arthur B.
Talbot, Florence F.
Thompson, F. Gertrude
Vose, Lottie M.
Walker, Edith F.
Williams, Annabel C.
Woodman, Nettie B.
Yates, Elizabeth M.

ATTENDANCE.

We find a number of children in our schools who are very anxious to achieve a perfect record of attendance and this is a laudable ambition if it can be done without sacrificing health. Such an ambition usually means good scholarship and thus it is that on many stormy days, when the teacher has an opportunity to assist pupils who are below in their work, the children who need the help most are not present. Indifference on the part of the parent and the resulting lack of ambition in the child give us most of our attendance problems. Education continues to be the one thing given free that many of our citizens have to be forced to take.

I wish to acknowledge the earnest co-operation of Dr. Florence Dyer and Mr. S. Howell Wright with the truant officers in our endeavors to make our attendance work effective.

The report of the truant officers follows:

REPORT OF TRUANT OFFICERS.

From September 1909, to June 1910.

	Henry Smith.	John S. Silvia.	Francis N. Howes.
Schools visited,	1701	1166	1202
Absences of pupils reported by teacher,	600	935	447
Absences of pupils without permission of parents,	50	57	48
Second offenses,	12	18	12
Third offenses,	4	10	13
Parents and guardians notified,	631	950	516
Pupils returned to school from street,	13	23	29
Arrests,	5	1	3
Prosecutions,	5	1	3
Placed on probation,	1	0	1
Sentenced to Training School,	3	1	2
Visits to mills,	52	21	6
Violations of labor laws,	6	2	8
Transfer cards received,	510	353	260
Evening school absences reported and investigated,	4	23	6
Posters carried out,	270	0	0
Enrollment cards carried out,	850	0	0
Visits to mercantile establishments,	51	18	115
Notices carried to schools,	779	444	613

AGE AND SCHOOLING CERTIFICATES.

There were issued from the office of the Superintendent of Schools for the year 1910 the following age and schooling certificates:

To minors between the ages of 14 and 16,	1,184
To minors between the ages of 16 and 18,	144
Duplicates,	97
Total,	1,425

HYGIENE.

Miss Florence Ricketson was elected a school nurse at the July meeting of the Board and began her work in September. The following rules were adopted to govern her duties:

CHAPTER XVII.

SCHOOL NURSE.

Section 1. It shall be the duty of the school nurse to co-operate with the medical inspectors assigned to the public schools, to see that the directions given by the inspectors are carried out, and to give such instruction to the pupils as will promote their physical welfare.

Section 2. The school nurse shall follow the schedule prepared by the Superintendent of Schools.

Section 3. She shall report in person to the principal or teacher in charge immediately upon her arrival at the school, keep a record of the time of arrival at and departure from each school, of the name, age, address, disease and treatment of each pupil examined in school, and a separate record of all excluded pupils and pupils to be visited.

Section 4. She shall visit excluded pupils at their homes: provided, that such visits shall not be made in case of small-pox, scarlet fever, diphtheria, measles, whooping cough, or

mumps, and shall keep a record of all visits made by her, and the outcome of each case.

Section 5. She shall make personal visits to homes to give necessary instructions or suggestions, and may demonstrate the treatment of pediculosis. In the case of diseases that cannot properly be treated at the home by the nurses or parents the services of a physician or treatment at a dispensary should be urged.

Section 6. Cases of trachoma shall not be treated by the nurse.

Miss Ricketson has met with an enthusiastic reception from teachers and pupils and the good already accomplished justifies her appointment. As a connecting link between the home and the school her work is very effective. With the Medical Inspectors working under the direction of the Board of Health and the nurse under the direction of the School Committee, cordial co-operation is positively necessary to get the best results. I am glad to acknowledge the many courtesies of the Board of Health in dealing with this department.

Sixty sanitary drinking fountains have been placed in the various school buildings and the common drinking cup has disappeared. When more funds are available additional fountains should be purchased, as our present limited supply causes much time to be lost in waiting for an opportunity to use the fixtures.

Our new buildings are equipped with modern systems of ventilation which are supposed to furnish a proper amount of warmed fresh air. In most cases this is merely supposition, and it is necessary to resort to the old-fashioned methods. Good air is necessary if we are to have good work, and it is earnestly hoped that in all future new buildings, heating and ventilation may receive still further attention.

The recent establishment of a free dental clinic should mean much to the children of our city. Examination shows that fully fifty per cent. of our pupils have defective teeth, and thus their chances of catching infectious diseases are

doubled. We hope the teachers will assist in encouraging the children, whose parents cannot afford to pay for treatment, to go to the clinic. The dental society of the city deserves great credit for the public spirit which prompted its action.

The new sanitarium at Sassaquin offers an excellent opportunity for an open air school. If the authorities in charge of the hospital will co-operate it will be possible to open a school under most favorable conditions. I am sure the school department would willingly furnish a teacher and the necessary equipment for such a class.

HIGH SCHOOL.

The death of Mr. Sargent, so soon after his appointment as principal, was a great loss to the school. To quote from his report: "There is no putting on paper the effect of High school at its best upon pupils' lives. Pretty largely that unreportable side makes school worth while; makes our work worth while. As we touch young lives so that we help them to become good men and good women, we are successful, as we fail in this, we fail in the teacher's work." He was all that a man and teacher should be, and he certainly did touch young lives in such a way as to help them become good men and good women. The whole city joined in mourning his loss.

The school was most fortunate in having Mr. Williams at hand to take up and carry on the work begun by Mr. Sargent. His knowledge of the needs of the school and the plans which had been formulated, permitted him to carry the year's work through successfully. During his acting principalship he had the hearty support of the entire corps of teachers. His executive and administrative ability, coupled with his untiring energy in dealing with every emergency, won for him the nomination and election to the principalship. Under most unfavorable conditions he has organized and carried forward the work since September in a way that reflects credit on the community as well as himself.

RETARDATION.

This subject has been the leading topic for discussion during the past year, and like many similar questions, it has given new emphasis to a study that has been carried on since the first public school was established. With the change in our school population the question has become more complex and hence more difficult to adjust. No teacher voluntarily retards a child's progress, and it is our constant effort to adjust our courses of study so that we may meet the many differences we find existing in children. Many times the home is responsible for slow progress by the refusal to furnish glasses or have some slight operation performed which has been recommended by the school physicians. Every case in our city is carefully considered by both teacher and principal and is then brought to the attention of the supervisor.

In the elementary grades the teacher is required to fill out the following blank:

SCHOOL DEPARTMENT, NEW BEDFORD, MASS.

----- School. ----- Date.

----- Teacher. ----- Grade.

Pupil's name -----

Date of birth-----

Parent or Guardian-----

Address -----

Date of enrollment in present class-----

Place of last enrollment-----

Half days attendance since-----

General cause of absence-----

Years in present grade-----

Years in grade next below-----

Last promotion:

Without conditions. On probation. Not promoted.

Probable promotion:

Without conditions. On probation. Not promoted.

Defective eyesight. Defective hearing.

Vaccination-----

General health-----

Mental ability:

Good. Average. Slow. Backward. Deficient.

Special privileges-----

This form should be filled out for any child who will not be promoted or whose promotion is doubtful and should be kept on file by the teacher. The child should be brought to the attention of the Superintendent or Supervisor during some visit to the school. If the pupil is transferred this form should be enclosed with the transfer card

NOTE—Write remarks on other side.

In the primary grades these blanks have been used very successfully and we look for the same result in the upper grades.

For some years many children have studied during the summer vacation with private tutors and thus made up the work in which they were deficient. I would most heartily recommend that rooms at the north end, centre, and south end of the city be opened for six weeks during the coming summer intermission that those pupils desiring to make up their deficiencies may have an opportunity to do so.

SCHOOL VISITING.

It is to be hoped that some day parents will take advantage of their obligation and opportunity and visit the schools more. Most of our visits at the present time are to settle some difficulty rather than furnish information which will assist in avoiding misunderstandings. The duty of supervisor, principal, and teacher is to build up, and in this work he should receive assistance and sympathy from those most deeply concerned. The state has established schools for the training of its future citizenship, and all should work in harmony for this end. Anyone can tear down by fault finding; it is quite another matter to assist by offering constructive criticism. Parents are most cordially invited to visit the schools and become personally acquainted with principals and teachers. The advantages of such visits are mutual and essential if we are to get the best results.

PENMANSHIP.

Since the introduction of the free arm movement system of writing there has been a wonderful change not only in the penmanship of the pupils, but also in the teaching of the subject and the attitude of the teachers toward it. From the laborious copying of the set studies in a copy book it has become an active and interesting exercise for both teacher

and pupil. The teachers have caught the enthusiasm of Messrs. Williams and Dorman and the results are gratifying. There has also been a great saving in cost, as we no longer have to purchase copy books.

EVENING SCHOOLS.

The action of the committee in raising the wages of the experienced teachers in the evening schools has brought about a much needed change, in that, for the first time in many years, we had a sufficient number of experienced candidates to fill our positions. The pupil who, after a hard day's work, comes to an evening class, has a right to expect to find in his teacher one who appreciates his needs and who knows how to help him. Such teachers will tend to make his attendance more regular and arouse his ambition to do more than the law requires. At the beginning of the present term fifteen graduates of the ungraded classes at the Donaghy school returned for advanced study. The teachers in the day classes are certainly to be congratulated for instilling such ambition.

The classes in preparation for the elementary and advanced Civil Service examinations have proven very popular and are constantly growing in numbers and efficiency. The elementary classes are organized in the different parts of the city and the advanced class meets at the High school. The opportunity for advancement offered by the courses at the evening sessions of the High school continues to be very popular. That the work of this school is of a most practical nature is proven by the fact that a majority of the pupils come from positions where they have an opportunity to test their instruction by actual practice.

SCHOOL DECORATION.

Most of our buildings are at present well supplied with pictures purchased through the Howland Fund. While there is still opportunity in some of our newer schools for more

such decorations, the most pressing need is the planting of shade trees on our playgrounds. This need was impressed upon us very forcibly during the past summer, when several of our school yards were in use as play centres. This work of setting out shade trees could profitably be started by our principals next Arbor Day.

Mr. Allen F. Wood celebrated the fiftieth anniversary of the Fifth Street Grammar School by decorating the walls of his building with pictures and casts purchased through funds furnished by the alumni of the school. The generous response to his appeal made it possible for him to follow a definite and well arranged plan of decoration. A cordial invitation is extended to all to visit the school.

PRESENTATIONS.

During the year two excellent pictures were presented to the Jireh Swift School by a friend who desires that his name be withheld. The subjects are "Washington's Farewell to His Generals" and "The Captive Andromache." These gifts are most acceptable and add much to the attractiveness of the assembly hall.

As president of the Woman's Relief Corps, Department of Massachusetts, Mrs. Elizabeth P. Sawyer had the privilege of presenting two regulation silk flags to two schools in the state. She chose our High School and the Fifth Street Grammar School. Mr. Williams and Mr. Wood, principals of the above named schools, went to Boston and accepted the gifts for the city. Later Mrs. Sawyer sent thirty smaller flags to the department, and these were distributed to the different buildings. No gifts are more pleasing than the "Stars and Stripes," and both teachers and pupils appreciate Mrs. Sawyer's thoughtfulness.

FIRE ESCAPES.

We have pupils on the third floor of the I. W. Benjamin, the Cedar Grove Street, and the Dartmouth Street Schools where there are no outside fire escapes. At the High school

we have over two hundred pupils on the third floor, where the same conditions exist. Some means of escape other than the stairways should be provided at once, and I repeat my recommendation of the past two years, that at least one fire escape of the most improved pattern be placed in position at each of these buildings.

PLAYGROUNDS.

By vote of the City Council April 14, 1910, the management of the playgrounds was given over to this department. A special committee, consisting of Miss Winslow and Messrs. Baylies and Hathaway, was appointed, and under its direction apparatus was purchased and a tentative organization effected. This organization included a supervisor of all the grounds and a director with a first and second assistant on each playground. School yards were selected in different sections of the city as follows: Phillips Avenue, H. M. Knowlton, Merrimac Street, Cedar Grove Street, Harrington, Thomas Donaghy, R. C. Ingraham, and J. B. Congdon, as the most suitable locations. Swings, see-saws, slides, sand boxes, base balls, bats, volley balls, sand pails, small shovels, bean bags, etc., were provided for each playground. The tentative organization proved effective and the grounds were kept open for six weeks, providing successfully good, wholesome recreation for the children. Organized play under skillful direction will do much to eliminate rowdyism and develop a spirit of fair play in considering the rights of others. Some cities provide for special instruction in basketry, sloyd, sewing, and cooking in connection with the playground work. Such instruction calls for special instructors and equipment, and with our limited appropriation the committee decided to limit our efforts to the establishment of simple play centres. We hope to be able to purchase additional apparatus for each ground during the coming season.

TEACHERS' ASSOCIATION.

The New Bedford Teachers' Association is one of our potent forces for good in the community. The annual receptions and lecture courses offer to the teachers an opportunity to secure a better acquaintance with their co-workers and a broader outlook upon their calling, two very necessary adjuncts if they are to keep out of the rut. With the completion of the new High school building a central meeting place will be available without extra expense, and more frequent meetings will be possible. The officers of the association have worked unceasingly to make a success of its undertakings, and every teacher in the city should be an active member that this association may grow in influence in the community and usefulness to its membership.

The educational progress during the past year has been marked by the opening of the new Public Library, the revision of the courses of study in arithmetic and English, an increase in the salary of the grade teacher, the employment of a school nurse, the establishment of a free dental clinic, the installation of sanitary drinking fountains, the equipment of several playgrounds with suitable apparatus, more extensive use of our school halls, the purchase of two modern portable school buildings, the addition of many new pictures and other decorations, and the completion of the addition to the William H. Taylor School. All of the above facts assist materially in aiding the effective classroom work which our teachers are doing.

I hope during the coming year to see:

The present high standard of work which is being accomplished in our schools maintained.

An increase in the salary of the teachers of ungraded classes.

The purchase of additional portable schoolhouses.

A new twenty-room building at the south end under construction.

An addition at the Parker Street School completed.

The old High School building remodelled for the use of the classes now at the Middle Street building.

A second school nurse employed.

Additional drinking fountains installed.

Less sickness among our children as a result of proper care of the teeth.

An open air school for tubercular children at the new sanitarium.

Three summer classes for pupils who are below in their work.

More constructive help from the parents and friends of the schools.

Shade trees planted about our school buildings.

Additional apparatus for our playgrounds.

Every teacher a member of the New Bedford Teachers' Association.

The public school is a democratic institution of the highest type, and as such deserves the hearty co-operation of every citizen. It has been my privilege to have received many evidences of such a spirit during the past year, and I take this opportunity to express my appreciation for the kindly consideration with which my work has been received.

Respectfully submitted,

ALLEN P. KEITH.

Report of the Supervisor of Primary Grades.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—In compliance with your request, I herewith present the fifth annual report of the assistant to the superintendent and supervisor of primary grades.

Throughout the primary grades the half-yearly promotions appear to be working to the advantage of the pupils. The brighter children are less retarded and the child who may have lost ground through illness, change of residence or similar causes can more easily be promoted to another grade whenever his progress warrants the transfer. During the year many such pupils have profited by this more flexible system of grading.

In the higher grades of the primary department the pupils must leave the teacher at the end of the half year, and in some schools this plan is used in the lower grades also. With the younger children the five months allowed for a promotion period is too short a time for the thorough acquaintance and insight needed for the best work of pupil and teacher. After each change it requires some time for the child to become accustomed to the new conditions, and the younger the child the more apparent is the effect of this interruption to his work. I would recommend that wherever it is feasible the pupils should remain with one teacher for a year, taking up the advance work with her as the class is promoted.

The success of the sub-primary classes has been very gratifying to the supervisor of these grades, and in almost every case the work has met with hearty commendation from the principals and the first-grade teachers who have received these pupils. One principal states that she considers the sub-primary grade one of the most important and profitable of

the grades in the child's school life. Upon these teachers rests the responsibility which was formerly placed upon the first grade teacher,—the work of starting the child upon his school career. The teachers of the later grades can correct some of the harm which may have been done in this grade by unfortunate training in discipline, in habits of work, in efficiency and responsibility, but the child who is started in the right direction in his first lessons in the sub-primary and kindergarten classes enters school under the most favorable conditions we have to offer.

The introduction of the sub-primary grade has in no way lessened the value of the kindergarten work. In some cases the kindergarten classes are larger than they were under the old grading, and, in spite of the fact that the classes are held in the afternoon, the work has not dropped from the earlier standard.

Two serious problems are confronting us in the primary grades. These are the lack of school accommodations and the presence of large numbers of over-grown children in grades I. B. and I. A. in many of our schools. This latter is due to causes which are beyond our control, though the remedy lies near at hand.

Many of these pupils are non-English-speaking children who have recently entered this country, but who are not candidates for admission to the ungraded classes because they have not reached the age of twelve years. Others may be over twelve years of age, but if they possess even a limited knowledge of English they do not belong in the ungraded classes, and as many of them have never attended school before, they enter the first grade.

Others of these over-grown children are those whose parents move so frequently that attendance upon school is fragmentary at best and is often accompanied by long periods of non-enrollment in any school. Still others are the children of parents whose occupation leads them to the city in winter and to farms, cranberry bogs, and other means of livelihood during the warmer months of the year. These pupils enter

school some time in October and leave in May. Generally they are not enrolled in school more than six months in a year, though regular attendance during that time is secured by our efficient attendance officers. When these children are well-nourished physically and well-endowed mentally, and when both pupil and parents are ambitious for the child's progress, the shorter time of school attendance does not always prevent promotion, but when these elements of progress are lacking the teacher's best efforts fail to prepare the pupil for the higher grade.

In some of our first-grade classes there are children who are twelve, thirteen, fourteen, and even fifteen years old. It needs no argument to show that these pupils cannot receive as efficient training here as they would in the so-called ungraded classes specially adapted to their needs, or that if the teacher attempts to give the individual attention required for their progress it is an injustice to the regular pupils in the class. When these pupils show a capacity to profit by individual instruction teachers frequently give it after school and these children are promoted whenever the work of the grade is accomplished, but in most cases there is little or no response on the part of these children and they are content to remain in the lowest section of the lowest class.

Occasionally one of these pupils may be transferred to the special classes for backward children, but the number that can be accommodated in these classes is so small and the waiting list is so long that they furnish no solution of the difficulty.

In some sections of the city the problem has been solved. At the John H. Clifford school provision is made for these children and the primary schools situated in this section send to this school the over-grown pupils in the lowest grades. But the companion school, the Thomas Donaghy, has no place for such pupils as the rooms which would naturally be assigned to them are needed for grammar grades. Every available resource at this school is used to its utmost and all non-English-speaking children over twelve years of age in

this section of the city are accommodated here, but, unfortunately, the need for first-grade classes for these children is much greater in this section than in any other part of the city. No relief can be given by the ungraded class at the James B. Congdon school or by the opening of an ungraded class at the William H. Taylor school, since these classes must take the overflow of the rooms already established at the Donaghy school for the older ungraded pupils. There will still remain in many of the schools in this section first-grade rooms in which from one-third to one-half of the pupils are these backward or non-English-speaking children from nine to fifteen years of age who need the special instruction which is being given to the pupils in the ungraded classes in this section of the city and given to all the over-age pupils in the more fortunate section.

Since each of the four primary schools near the Donaghy school has many first-grade pupils in half-time classes, the establishment of ungraded classes for the over-age pupils would help to solve the other difficulty,—over-crowding in the regular grades. Two portable schoolhouses for ungraded classes, located near the center of the district, would go far toward meeting the needs of these over-age pupils and toward relieving the pressure upon these over-crowded school rooms, though they would not entirely remedy the evil. Few cities of equal size have made wiser or more efficient plans than New Bedford has adopted for the instruction of its pupils of foreign tongue, and when this excellent special instruction has been extended to all who need it we may well take pride in these ungraded classes.

The regular work of the grades calls for no special mention at this time. In conclusion I wish to extend my thanks to all who have helped in carrying on the work of the department.

Respectfully submitted,

JOSEPHINE B. STUART.

Report of the Principal of the High School.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I respectfully submit the following report of the New Bedford High school for the period from September 7, 1910, to December 23, 1910.

The school opened on September 7th with a larger number of pupils than we have had in the preceding years. The following is our statistical record:

Number of pupils who have left the High School during the school year 1909-1910.

	1909 Sept. to Dec.			1910 Jan. to June			1909-1910 Sept. to June		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Senior,	0	1	1	3	0	3	3	1	4
Junior,	0	4	4	5	4	9	5	8	13
Sophomore,	1	0	1	6	8	14	7	8	15
Freshman,	4	5	9	9	6	15	13	11	24
	5	10	15	23	18	41	28	28	56

Causes for leaving:

	Boys	Girls	Total
Illness,	3	13	16
Moved from city,	4	3	7
At work,	14	8	22
Neglect of school work,	5	4	9
Went to other schools,	2	0	2
	28	28	56

The total enrollment, by classes and courses, from September to December 1910, was as follows:

	Commercial Course			General Course with Latin			General Course with French			School of Technology			College Course with German			College Course with Greek			Total
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	
Seniors	11	16	27		12	12	2	21	23	23	1	24	10	13	23	5	2	7	51
Juniors	10	28	38		21	21	8	23	31	19		19	11	12	23	2	1	3	50
Sophomores	22	31	53				4	29	33				35	28	63				61
Freshmen	42	37	79	45	19	64		39	39										87
	85	112	197	45	52	97	14	112	126	42	1	43	56	53	109	7	3	10	249
																			582

That is, the total enrollment by courses was:

Post Graduates,	7
Commercial Courses,	197
General Course with Latin,	97
General Course with French,	126
School of Technology,	43
College Course with German,	109
College Course with Greek,	10
	<hr/> 589

GRADUATES ENTERING HIGHER INSTITUTIONS.

Graduates of 1910 entered

	Boys.	Girls.
Amherst College,	1	
Bates College,		1
Beloit College,		1
Bridgewater State Normal Training,		6
Brown University,	1	
Crainsche Schule, Germany,		1
Dartmouth College,	2	
Fitchburg State Normal Training,		1
Gordon Training School,		1
Harvard University,	1	
Long Island College of Medicine,	1	
Massachusetts Agricultural College,	1	
Massachusetts Institute of Technology,	1	
New England Conservatory of Music,	1	
Simmons College		3
Tufts College,	1	
Worcester Polytechnic Institute,	1	
Yale University,	1

Graduates of 1909 entered		
Simmons,		2
Graduates of 1907 entered		
Simmons,		1
	<hr/>	<hr/>
	12	33

A brief comparison of the foregoing statistics with those of the past year shows the following results: Total enrollment December, 1909, 536; December, 1910, 589. Number of pupils who left school during the school year 1908-1909, 120; during the school year 1909-1910, 56. Number of pupils who entered higher institutions December, 1909, 36; December, 1910, 45.

REORGANIZATION.

Believing that the school could be better organized if some of the Freshman and Sophomore classes were re-arranged, a new combination of these classes was formed. Through this

reorganization, we have been able to seat a larger number of pupils than it was possible heretofore, and to have the pupils move to their respective classes with less friction. We are able now to seat our pupils without using the corridors in the school nor the recitation room in the Annex.

ABSENCES AND TARDINESSES.

The large number of absences, tardinesses, and dismissals has been very discreditable to our school. We are endeavoring this year to secure the hearty co-operation of pupils and parents to raise our standard in this respect. If parents and pupils can be brought to fully realize that promptness and regularity in attendance are essentials of an efficient school, we do not believe pupils will stay away from school for such trivial reasons as they have in the past few years. Parents should understand clearly that they are under obligation to the High school, to the city, and to their children to insist that pupils shall not be absent, tardy, nor dismissed except for very urgent reasons.

DROPPING SUBJECTS.

Another weakness that we are endeavoring to eliminate is the practice of dropping subjects during a course. Many pupils who have deliberately entered upon a course of study become easily discouraged and drop one or more of their subjects. An investigation of this practice shows that unless we are willing to turn out a lot of weaklings in intellect and character, we should not allow pupils to continue dropping subjects, except for excellent reasons.

Many pupils have been dropping subjects for no better reason than they find the subject more difficult than they had expected, or they do not like the subject, or do not like the teacher. I am sorry to say that parents have approved of such excuses by their children. When about twenty-five per cent. of the pupils in our High school drop one or more subjects in the regular courses, it is clear that a firm stand must

be taken to prevent such a practice. Pupils and parents must be made to see that if we are to maintain a high standard, a stronger intellectual and moral fibre must be developed in our pupils.

In the future much care must be exercised by pupils in selecting their courses. No changes in subjects will be allowed during the term except for urgent reasons, and then only by special permission from the High School Committee or Superintendent. Special pupils must carry at least fifteen credits a week and obtain a passing mark in the fifteen credits, unless they are excused by vote of the High School Committee.

Another weakness that it has been necessary to correct is the one of allowing pupils to spend extra periods on easy subjects in order to secure enough credits for a diploma without doing the amount of work required in a regular course. As an example, pupils drop Latin because they find it difficult, and then spend the Latin periods on drawing, penmanship, or typewriting in order to get the credits for a diploma. No pupil is now allowed credit for extra periods spent on any subject. If for any reason pupils spend more periods on a subject than is allowed for it in the regular course, the extra credits do not count towards a diploma.

HOME WORK.

We are trying to secure better home work by our pupils. Most of our pupils who fail do so because they do not spend enough time on home study under proper conditions. Parents have been informed that the average High school pupil cannot do satisfactory High school work unless he spends at least three hours each school day in home study in accordance with a well planned weekly program. We have adopted the plan of sending reports every five weeks to parents of pupils who are low in their studies. We hope that by keeping parents fully acquainted with the standing of their children, we shall secure their hearty co-operation in our efforts to give their children a satisfactory High school education. The teachers

are spending one or more afternoons a week at the school to help pupils who are behind in their studies. We are planning also to help them by giving lectures on the art of study, mental and physical hygiene, and related subjects in addition to what we are doing in the regular recitations.

ATHLETICS.

We are happy to say that the athletic life of the school has been very active and successful. We believe that this renewed activity in athletic exercise will result in better school spirit, better class room work, better deportment, and better health. We believe that one of the benefits of High school athletics for boys is the opportunity afforded for practicing those manly virtues that mean so much for success in after life. Our coaches and teachers have endeavored to instill into our boys the following ideals in their athletic activities: The rules of games are to be observed as mutual agreements between gentlemen; the taking of unfair advantage in sport is to be regarded as mean a practice as taking unfair advantage in affairs of life; visiting teams are to be treated always as young gentlemen; ungentlemanly or unfair tactics are not to be used even if they are used by the opposing team; good plays by other teams should be appreciated and applauded. We have been pleased with the gentlemanly conduct of our teams during this school year. Their athletic ability and gentlemanly conduct have been creditable to the school.

The pupils have responded generously to the support of athletics. All bills are paid and there is a balance in the treasury. We hope that the new William E. Sargent athletic field will be ready for use in the spring. The advantages of a fine athletic field we believe will stir a new interest in athletic exercise and will relieve much of the financial burden that has heretofore been borne by the pupils and teachers.

The girls' athletic class has a large membership this year, sixty-five pupils belong. They exercise once a week in the Pacific Lodge Hall. The girls are as enthusiastic as the boys in their physical exercises.

CADETS.

This organization has successfully organized a battalion for the second time in its history. Our High School Cadets are noted for their fine military drill and bearing. As evidence of their proficiency, it is sufficient to say that their representatives in the past three years have won the first prize twice, and tied for the second place once, in the annual competitive military drill held by the Massachusetts Institute of Technology, Boston. This competitive drill is open to all high schools in New England. The instructor, officers, and privates of this year's battalion are upholding proudly the splendid reputation which the High School Cadets have sustained for several years.

ORCHESTRA.

The orchestra continues to furnish an excellent opportunity for pupils who play musical instruments to receive instruction in orchestra playing. The pupils receive valuable instruction and practice, and the school receives much pleasure and culture listening to them.

DEBATING SOCIETY.

This society is very active this year; it has a larger membership, and is doing more active work than it has for several years. It has planned to hold monthly public debates, and to hold inter-scholastic debates with other schools. It is a valuable organization, and should be strongly encouraged by the school and community.

THE SCHOOL PAPER.

Our school paper, "The Alpha," is issued regularly each month. The teachers and pupils are proud of "The Alpha." It excels most papers published by schools of our size. Aside

from its literary excellence, it is managed by an efficient business organization. Most schools sell their papers for ten or fifteen cents. Our paper is sold for five cents, and easily pays all expenses of publication.

SCHOOL PROPERTY.

We are trying to instill into our pupils a greater respect for public property. When a city spends large sums of money to furnish books, school furniture, writing materials, and instruction apparatus so that the children of the city may have a High school education free of cost, it is reasonable to expect that young men and young women will not wilfully break, mar, nor even misuse such property. Our pupils have not yet fully realized their obligation to the city in this respect. The amount of school material and school property that they destroy or mar is exceedingly discreditable to any high school. We hope to prevent in the future most of this waste and also to develop in our pupils a deeper sense of their obligation to the city.

COURSES OF STUDY.

Our courses of study need revision and reorganization. Our college course can be made to give a better preparation for the various colleges than it is giving now. Our general and commercial courses need revision also. This matter has been under consideration by the principals and teachers for the past three years. It is so important a matter, and requires so much investigation and thought that a separate report will be submitted on "Courses of Study." A thorough investigation of the courses given in twenty-five of our leading high schools, and a careful study of the courses advocated by our leading authorities on secondary education will be soon completed.

Conclusion. I am under deep obligation to the teachers for their hearty co-operation. The measure of success the

school has attained has been attained largely through the advice, encouragement, loyalty, and hard work of the teachers. No principal could desire stronger support, nor more hearty co-operation than I have received from every one of them.

The pupils have been cordial and helpful. Their willingness to comply with any request made, and their loyalty to the school, merits my deep appreciation.

The advice and encouragement given by the Superintendent, and the support given by the High School Committee have been all that could be desired.

Respectfully submitted,

G. WALTER WILLIAMS.

Report of Supervisor of Drawing.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—The change in the course of study during the past year necessitated by the half-yearly promotions is being effected with but slight inconvenience to the classes. Drawing has suffered of course in those classes which have been on half time, but in the end we shall make up the lost lessons.

More emphasis has been placed on applied design or on the manual training side of the work this year. In some intermediate grades the boys have made articles in raffia while the girls are engaged in sewing, and in one school the boys have constructed their own hand looms and have made experiments in weaving. A good deal of careful work has been done in paper construction, involving accurate measurements. We really need, however, better constructive material than paper.

Thinking it worth while to hear the pupils' estimate of their drawing work, the supervisor asked a number of classes in different grades to write answers to the following questions: Do you like to draw? Why do you like to draw? Which do you like best—pictorial drawing, construction or design? If you do not like drawing, why do you not like it? The teacher held no discussion of the subject beyond making sure that there was a clear understanding of the terms used and the pupils were asked to write freely and frankly. It is worthy of observation that many spoke of construction. The choice may have been influenced by the Christmas gift making going on at the time, but the satisfaction afforded by actually making something is mentioned by nearly all. Several writers say that the necessity for careful planning and accurate measurement in the construction work helps them to be careful in other work. Some believe drawing to be use-

ful in the work they expect to do after leaving school. But construction, though important, is but one side of drawing. Pictorial representation and color have their share of appreciation in the children's answers. The negative replies are frank and are in a very small minority. The answer of a seventh year pupil is worth quoting: "I like drawing, for although writing expresses my thoughts, drawing expresses a still deeper thought which words only could not express." That pupil is fortunate in having a teacher who not only appreciates the value of drawing, but has found a way to make it apparent to her pupils.

After all it is to the grade teachers we must look for results. I would urge those students in the High school who are expecting to become teachers to give earnest attention to the study of drawing in preparing for the Normal and Training School, in order that in the Training School less time need be spent in reviewing or teaching principles and more time be available for the application of the study to school needs and conditions.

Miss Clara M. Gale, assistant supervisor, has proved a valuable acquisition to the drawing department. An earnest and enthusiastic teacher, she is doing efficient work, particularly along the line of handicraft. Miss Stuart, supervisor of primary grades, and Miss Wood, supervisor of nature study, have continued their friendly co-operation with the drawing supervisors in planning the work for the grades. I desire to thank the Superintendent of Schools for helpful advice and generous support, and to the other supervisors and to the teachers grateful acknowledgment is due.

Respectfully submitted,

LUCY C. BEDLOW,
Supervisor of Drawing.

Report of Supervisor of Music.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—In compliance with your request for a report, I submit the following:

During the year which has elapsed since my last report, no great changes have been made in the methods of instruction. The same books are used and until Fall nearly the same programs were followed as heretofore. In October, in grades III-VI, we began a new plan of work, which has met with so much favor by the teachers that we shall continue it throughout the school year. My assistant, Miss Werner, is much pleased with the progress of the primary grades. In these we have begun individual singing, which we propose to continue as the children progress through the grammar grades. I wish we might have some supplementary songs for the four upper grades. Such material is used in other cities, where it furnishes much zeal and enthusiasm. In closing I would thank the teachers, the principals, and the superintendent for their cordial co-operation with Miss Werner and me in our work.

Respectfully yours,

FREDERICK H. BUTTERFIELD,
Supervisor of Music.

COPY OF CITY ORDINANCE ESTABLISHING
NEW BEDFORD INDUSTRIAL SCHOOL.

“ORDERED:— That an independent industrial school be and is hereby established, to be in charge of a Board of Trustees to be elected by the School Committee, who shall provide and maintain such school for the instruction in the principles of agriculture and the domestic and mechanic arts, as permitted in Chapter 505 of the Acts of 1906, as supplemented by Chapter 572 of the Acts of 1908, and for evening courses in such subjects for the benefit of persons already employed in trade; and, if deemed expedient by the said trustees, for the instruction in part time classes of children between the ages of fourteen and eighteen years who may be employed during the remainder of the day.

Such school shall be approved by the Commission on Industrial Education of the Commonwealth as to location, courses, and methods of instruction, before any money appropriated by the City for the maintenance of said school shall be expended, and all appropriations shall be expended with the approval of said Commission.

And the said Board of Trustees shall so conduct said school and do all things that may be necessary to entitle the city to be reimbursed by the Commonwealth the proportion of expense so incurred in the manner and amount provided by law.”

October 22, 1908. Adopted in concurrence.

October 23, 1908. Presented to and approved by the Mayor.

A true copy, attest:

(Signed) DANIEL B LEONARD,
City Clerk.

Report of Board of Trustees.

Since our last report, the Industrial School has completed its first year of work. As would naturally be expected, we have encountered many important problems, to which we have given earnest consideration, and have made, we believe, progress towards their solution. The problem of establishing a new institution of this character is a large one; the securing of suitable teachers and equipment, and of properly adjusting the work to local needs has been our chief concern during the year.

While we have found it by no means easy to secure competent teachers, those which we have employed have, on the whole, demonstrated their ability to carry on the work efficiently in their respective departments, and to co-operate in the development of the school. Judging from the regular school standard, it would appear at first glance that our salaries are somewhat high, but when the different conditions are taken into account, the explanation is easily seen. Our teachers are hired with the understanding that they will teach nights as well as days, that they are liable to be called upon for fifty weeks' service, and, in the case of the shop men, we must pay a man as much as he is worth in the trade. In the public schools, teachers are hired on an implied forty weeks' basis, and are paid for extra evening work.

In the matter of equipment, our policy has been to utilize the school shops for building material, so far as that work had educational value, and this policy has been carried out during the year. By doing this, we have not only secured an output for the work of the shops, but have considerably lessened the cost of equipment.

In securing the necessary equipment material, we have

been greatly aided by manufacturers and citizens who are interested in the school; a list of these is appended to this report,—and, as a result, we have secured a large additional equipment at a considerably reduced cost.

This assistance has taken various forms,—direct donations, loans, special discounts, and other forms,—in making acknowledgement, in some cases, however, it has seemed best to simply acknowledge “assistance in establishing the school.”

The institution has attracted considerable interest both in this country and abroad, a number of interested persons have visited it, and many requests for information have been received and answered. Exhibitions of the work of the school have been made at Milwaukee, at the meeting of the Society for the Promotion of Industrial Education; at Boston, in November, in the “1915” Exhibit, and in July, during the meeting of the National Education Association; and also in the Canadian National Exhibit at Toronto, in September, 1910. These exhibits have been made at the request of the authorities conducting these meetings.

During the last year, the school has been attended by about 450 students; boys, mechanics, and women. This has altogether overtaxed the capacity of the school building, and outside space was therefore secured, the gas engine work being carried on in the building of the New Bedford Auto Co., the steam practice and mathematics in the High School building, and the women’s work in the City Mission building and in the Emmanuel Baptist Church. As would be expected under these conditions, administration has been difficult, and efficiency has suffered.

FUNCTION OF THE INDUSTRIAL SCHOOL.

As the school is still young, many citizens are not yet clear as to its aims, functions, and relation to industry on the one hand, and to the public schools on the other. It therefore seems proper to embody in this report some statements bearing on these points.

Very wide and careful official investigations have established the fact that, each year, large numbers of children leave school soon after reaching the age of 14. Many of these children go into what are called "dead end" employments; that is, employments in which the experience gained forms no basis for advancement into more skilled and better paid work as the child grows older. Elevator boys, messenger boys, attendants in bowling alleys, are illustrations of this class of work. As a result, on arriving at 19 or 20, the boy has no trade, and, since his work can be done by a younger boy, he must either continue to work at boy's wages, or throw up his job with no training for a better one. Investigations have also shown that in many cases the child did not leave school because his parents were financially unable to keep him in school longer, but because the child or his parents did not see how a further training in the public schools would aid him in direct training for earning capacity.

On the other hand, it is also well known that employers of skilled labor find it very difficult to obtain young men and women capable of becoming skilled workers. This situation is so acute that many large corporations have established apprentice schools of their own.

Thus, on the one hand, we have these large numbers of children in "dead end" employments, and on the other, the demand for young men and women trained so that they can quickly become efficient and intelligent skilled workers.

The industrial school is established and planned to offer the child an opportunity to continue his schooling as a form of preliminary vocational training, very directly connected with future earning power, and to provide a source from which our skilled industries can draw workers educated in the theories and principles of the trades. Its work is to prevent the boy from wasting his youth in dead end work, and to train him and start him on the road to the practice of a skilled trade, offering opportunity for advancement and good pay, and at the same time to give him the training in

English, mathematics, civics, etc., required for the education of the future citizen, whatever his occupation may be. This is the work of the day school.

But under the conditions of extreme specialization under which modern industrial processes are carried on, an adult worker has no chance to learn the trade as a whole, only some process of the trade. Nor can a young man learn the trade in the shop, as the old apprentice could, because it is more economical to teach him one process and keep him on that. Neither can he secure instruction in the theory of his trade, except through correspondence schools. That the more ambitious do try to secure it, is shown in the great success of these schools.

The difficulty of securing training on the one hand, and the demand for trained workers on the other, that exists in the case of the workman also exists in the case of the potential foreman. Both in its day and its evening session, the school is planned to meet this demand. The evening session of the industrial school is intended to meet these needs of those already at work, by offering opportunity for them to secure training in the trade, outside of their specialty, and to give the related theoretical work which they can only otherwise obtain through the correspondence school or similar means.

In developing the school, we have endeavored to plan an institution which will, to a greater and greater extent, meet the needs of both the youth and the adult. It is, at present, doing by no means what it will do, but, with the means at our disposal, a beginning has been made, and as we learn how to connect the work more and more closely with our local industries, and with the needs of those engaged in them, the work will become more and more efficient along the lines for which the school is established.

GENERAL ORGANIZATION.

Under the law, a boy qualified for an "age and schooling certificate" can be admitted to the school. This practically means fourteen years old. In organizing the school, it has

seemed best to provide a four years' course, although we fully understand that many pupils will be unable to continue their education for so long a period.

In a general way, boys of 14 to 16 are not wanted in the skilled industries, while from 16 on, they have some earning capacity, although, as elsewhere pointed out, the 16 to 17 year old boy has little opportunity, even in the shop, to secure any general knowledge of the theory and practice of a trade as a whole,—so that, in the case of the older boy, the school must compete with the shop by giving better training, while, in the case of the younger boy, the shop competition is not strong.

Therefore, the first two years of the school are planned to give a general preparation, manual and academic, while the remaining years of the course are devoted to increasing specializations in the theory and practice, first, of a group of closely allied trades, and then in preliminary training for learning some definite trade.

This arrangement has the further advantage of avoiding a definite decision in the earlier years, while the pupil is still immature, and his capacities are still unknown. Moreover, in this preliminary work, there can be included a considerable amount of academic work, which, while closely related to the shop work, really represents an extension of the pupil's education in ninth grade and elementary High School subjects.

The tentative courses of study given on page 19 show how this idea is worked out. For the reasons given above, all pupils take the same work for the first two years, choosing, then, first a department, and afterwards a course within the department.

The school is therefore organized into five departments; metal working, building and construction, academic, applied science, and women's industrial arts, each with a responsible head,—these heads, together with the director, forming the responsible faculty of the school.

As the work of the school is so largely experimental, we have not deemed it wise to hamper the faculty in details, but have only determined the general policy, leaving them to work out the details. This general policy has been expressed by votes from time to time, which appear on our records.

METHOD OF ADMISSION AND PROMOTION.

While theoretically planned to take pupils at 14 years of age, as a matter of fact they enter at all ages. Moreover, there seems to be no satisfactory way of determining a pupil's fitness to profit by the school, except to admit him and try him out. If, after fair trial, he is found unable to profit by the work of the school his withdrawal is called for.

Therefore, while we admit only to first year work, we have authorized the faculty to promote pupils whenever they were convinced that the student was competent to do more advanced work. This makes it possible for a more mature or efficient student to shorten the time required for passage from class to class, and prevents the working of an injustice in holding back such pupils unduly.

CERTIFICATES AND DIPLOMA.

Feeling that pupils who cannot complete the full time should have a definite recognition of good work, and yet wishing to encourage them to remain and complete the four years' course, we have authorized the granting of certificates at the completion of the two years' preliminary work, and of one year's work in a department, as well as authorizing the granting of a full diploma on the satisfactory completion of a four years' course. While certificates will be granted by the faculty, diplomas will be given only on vote of the trustees.

While this method of elastic promotion has offered some administrative difficulties, it has, on the whole, worked well, and, as a result, a number of pupils have been able to

satisfy the faculty of their ability to begin special work this fall, and have been granted an elementary certificate entitling them to begin such work.

WOMEN'S WORK.

While the work for men and boys has been, at least, partially developed, the work for women and girls has only been begun. As stated elsewhere, no women's work can be carried on in the present building. The scope of the school, under the law, includes instruction for girls in the domestic arts. Courses in household administration, cooking, catering, dressmaking, millinery, etc., are fully planned, and the development of this work is already begun.

In the evening work for women, we have opened courses in dressmaking and millinery. Out of a registration of 750 women and girls, about 200, selected by lot, have been accommodated in two centers, one north and one south. These girls have worked earnestly, and we feel that there is no question as to the value of this work and the demand for it. Investigation of local conditions shows a strong demand for girls trained in the elements of the domestic arts (such training as would be given in the day school), and we believe that this work is as valuable as that for men and boys.

We have been notified that, under a recent interpretation of the law, evening work for women not engaged during the day in work directly connected with the evening courses, is not considered as falling within the scope of approval for state reimbursement by the State Board of Education, so that such work cannot be approved for next year, or until the present law is amended, which we understand the State Board purposes to ask the Legislature to do at the next session.

In view of the value of this work, and the small cost, we requested authority from the city government to admit students to this work without regard to employment, with

the understanding that no claim for state reimbursement will be made for this portion of the work.

This authority was given us and the courses have been opened this year,—many of the students returning for a second year's work.

EVENING SESSION, MEN.

As soon as the day session was well organized, we took up the matter of the evening session. A circular was issued giving the courses which the school could offer, as follows: House-framing, stair-building, architectural drawing, construction work in concrete, special machine shop work, gas engine repair work, shop drafting, machine shop mathematics, practical mathematics, practical English, elementary physics, principles of electricity, principles of heat, steam practice, construction and maintenance of dynamos and motors, outside wiring, gasolene engines. Of these, the following gave a registration sufficient to warrant our giving them: House-framing, special machine shop work, shop drafting, steam practice, gasolene engines, practical mathematics.

These courses were carried until the last of April, with the exception of the practical mathematics, which closed the first of March.

Work in these courses was confined to men already engaged in work connected with the courses taken.

This evening session reopened in November, 1910, and has been carried on from that date.

BUILDING AND EQUIPMENT.

The building now occupied by the school is that formerly occupied by the Hill Electric Co. and is one of the group on the corner of North Water and Elm Streets. This building is hired from Hedge, Lewis & Co. who lease the entire property from the owner. This building is about 30 x 80 feet, three stories and basement. So far as construction is

concerned it is well adapted for the work of the school, being of factory construction and designed to carry machinery, but at the time it was secured we were fully aware that, with any normal development, it would soon become inadequate, and could, at best, only serve as temporary quarters. We have, therefore, fitted the building only so far as was absolutely necessary, the total expense being not over \$500, mainly for sanitary and lighting fixtures. Expense for other equipment has been mainly for necessary machines and tools. Furniture was almost entirely constructed in the school or obtained by utilizing material which could be temporarily spared from the school department.

The installation of the machinery and the minor changes needed to adapt the building to our work were carried out by the pupils as part of their shop training.

The present equipment is as follows:

MACHINE TOOL OUTFIT.

2 Lathe & Morse, 15 in. x 5 ft. Engine Lathes, elevating rest.

1 Lathe & Morse, 15 in. x 4 ft. Engine Lathe, elevating rest.

1 F. E. Reed, 14 in. x 4½ ft. Engine Lathe, elevating rest, taper attachment, power cross feed.

1 Prentice Brothers, 15 in. x 5 ft. Engine Lathe, elevating rest.

1 Draper Machine Tool Co., 15 in. x 4 ft. Engine Lathe, elevating rest.

1 Putnam Machine Co., 14 in. x 5 ft. Engine Lathe, elevating rest.

1 Putnam Machine Co., 14 in. x 4 ft. Engine Lathe, elevating rest, screw cutting.

1 Pratt & Whitney, 10 in. x 5 ft. Engine Lathe, elevating rest.

1 P. Blaisdell & Co., 14 in. x 6 ft. Engine Lathe, screw cutting, elevating rest.

- 1 W. C. Young, 10 in. x 4 ft. Speed Lathe.
- 1 Gould & Eberhardt, 16 in. High Duty Shaper, vise, variation speed gear box, swiveling table, auxiliary front cross feed, ram positioning shaft, table support.
- 1 Morse Twist Drill & Machine Co., Universal Grinder.
- 1 Wilmarth & Morman Co., Drill Grinder.
- 1 Springfield Wet Tool Grinder.
- 1 L. W. Pond, 26 in. Upright Drill, power feed, sliding head, revolving table, elevating and swinging knee.
- 1 Four Spindle Sensitive Drill.
- 1 Brown & Sharp, No. 1 Universal Miller.
- 1 Brown & Sharpe, No. 0 Plain Miller.
- 1 Goodell Pratt, Power Hack Saw.
- 1 Greenerd No. 3 Arbor Press.
- 5 C. Parker Co., No. 3 Vise, 3½ in. jaw.
- 1 C. Parker Co., No. 39 Vise, semi-steel solid bar, 4 in. jaw.
- 1 Hollands Mfg. Co., No. 20 Swivel Vise, 3½ in. jaw.
- 1 Forge, Anvil, Tongs, Flatters, Formers, etc.
- 1 20 H. P. Fairbanks Clutch on main line shafting.
- 1 Gray 10 x 24 x 60 planer.
- 1 Sensitive Single Spindle, Power Drill Pins.
- 1 Bench Centering Machine.

With adequate small tools, such as, Center Rests, Lathe Chucks, Drill Chucks, Drills, Reamers, Taps, Die Plates, Breast Drills, Milling Cutters, etc.

WOOD-WORKING EQUIPMENT.

- 1 Plain Saw Table, Whittaker Guard.
- 1 Pony Planer, L. Power & Co., Phila., 24 in.
- 1 Buzz Planer, Safety Knife, Gore, Swan Mach. Co., Cinn., O., 8 in.
- 1 Universal Saw Table, Boring attachment, Crescent Mach. Co., Leetonia, O., Jones Guard.
- 1 Foot Mortiser, E. Gourd & Co.
- 1 26" Band Saw, Crescent Mach. Co., Jones Guard.
- 1 Yost Universal Vise.

8 Emmett Bench Vises.
1 Emmert Universal Vise.
1 No. 2 Yost Universal Vise.
12 Carpenter's Vises, Cushman Patent.
1 Speed Lathe, 26" bed, 5" swing.
1 Grindstone, Athol Mach. Co., Trueing attachment.
Adequate small tools and tool room accessories.
Individual Tool Chest Outfit.
Hammer, Compasses, 1½" Chisel, ½" Chisel, ¼" Chisel,
Cross Cut Saw, Screw Driver, Brad Awl, ½" Bit, ⅜" Bit,
Block Plane, Try Square, Nail Set, Bit Stock, Jack Plane,
Rule.

MISCELLANEOUS EQUIPMENT.

1 Time Clock, International Time Recording Co., Endicott,
N. Y.
1 5 K. W. 110 D. C. Dynamo and Switchboard fittings.
1 Combination Lantern and Opaque Projector—Electric.
1 Rotary Neostyle, Neostyle Company, Boston.
3 Interior Telephones.
General material for demonstration in Science and
Mechanics, much constructed in the shops.

THE QUESTION OF BUILDINGS.

As already stated the present building was secured as a temporary location pending some action by the city which would establish the school in adequate quarters. It is a matter of general knowledge that when the city first established the school and instructed the Trustees to develop it, the accepted plans of the new High School included provision for its proper housing. When final action was delayed on these plans we proceeded to perform our duty by establishing the school in the best temporary quarters which we could find, which would serve for immediate needs but not for growth.

In response to our request the city government has referred the matter of some provision for suitable accommodations to the joint committee on education for investigation and report.

It seems therefore proper to point out briefly the situation.

The present building will accommodate 60 day pupils in the work of the first and second years which is common to all courses, and but little of the work of the upper years. It will accommodate a limited number of men in the evening in the machine shop and carpenter shop. The equipment for this work fills the building so that we have practically no room for the third year work in any of the specialized work of the departments, for gas engine work, for erecting work, or for work for advanced evening courses. We can secure no more room in the connected buildings and we have no guarantee that we can remain in the present building more than a year longer. We have been unable to meet the demand for evening students and will be obliged to limit the number of day pupils.

This, in brief, is the situation, and we hope that when the whole question has been thoroughly investigated by the proper authorities, some way may be found to enable the school to develop its work and meet the demands made upon it.

The requirements of a suitable building are air, light, and adequate floor space fitted to carry machinery (such construction is not expensive). A building of this character in a suitable location, especially if situated on land enough to allow of addition, if required, would amply fill the requirements of the institution.

STATE REIMBURSEMENT.

Under the general acts dealing with Industrial Schools all initiative rests with the city establishing the school. If, however, the character and quality of the work are satisfactory to the States Board of Education, the city has a claim against the state for one half the cost of maintaining

such work. Should the city desire the Trustees to carry on some work which does not meet with the approval of the State Board we understand that this can be legally done without prejudice to claim for other work, it being only necessary that no claim for reimbursement be made for such work.

Claims for reimbursement for maintaining the school have been presented up to June, 1909, and have been paid.

The work of last year has been approved.

Claims for maintainance from June, 1909, to June, 1910, have been rendered, and these items are included in the financial statement.

DEPARTMENT OF WOMEN'S INDUSTRIAL ARTS.

As is the case of the other departments of the school, the age limit is 14 years. A girl of that age, who can read and write and who can speak the English language is eligible to enroll. A grammar school education is not necessary, although if possible, it is desirable.

The aim of the department is to turn out girls, who if they wish to go into a mercantile establishment as a dress-maker or a milliner, can secure employment at once at wages, without being forced to go through a term of apprenticeship; and to turn out girls who are capable of going into homes and caring for them. Statistics prove that as the average girl works in a store or a shop about six years and then gets married, eventually she will have charge of the running of a house for herself. At the industrial school she will have received training which will fit her to run a house, and fit her to do it on a limited income. After the preliminary training a girl can elect whether she wants to take the courses in millinery and dressmaking or specialize further in house-in millinery and dressmaking or specialize further in household economics. If the former her studies are emphasized along these lines; if the latter, the reverse is true. But the

dressmaker or milliner, when she finally graduates, knows considerable about foods, cooking and the running of a house. The girl who specializes in household studies, when she graduates knows considerable about dressmaking and millinery, at least enough to make her own garments.

About one-half of the girl's time while at school will be employed in practical work, in millinery, dressmaking, cooking, etc., while the other half will be occupied with related courses. She will be given history and English and a course of academic studies which will give her the training that she may have missed by not attending the grammar or the high school. There will be no home work, or outside work.

In the millinery courses and the dressmaking courses, the girls will be given instruction which, when they graduate, will make them of real money value, and make them able to enter a shop without having to go through a long course of apprenticeship. This apprenticeship they already will have served at the Industrial School, while at the same time they will have received instruction in household economy and academic subjects. The school intends to turn out a girl who can begin to earn money at once in a skilled trade, and who also has learned enough of the rudiments of housekeeping to be able, if she should be called upon to take charge of a home, to do it intelligently and economically.

INSTRUCTORS

1909-1910.

Day and Evening School.

CHARLES R. ALLEN, 75 Madison St., Director, and Head of Dept. of Applied Science.

WESLEY A. O'LEARY, 371 County St., Head of Academic Dept.

LEWIS H. HAIGHT, 32 James St., Head of Machine Dept.

OLIVER H. GARDNER, 48 North St., Head of Dept of Building and Construction.

CHARLES A. WILSON, 194 Main St., Fairhaven, Instructor in Dept. of Building and Construction.

CHARLES F. CHASE, 113 Fourth St., Instructor in Machine Dept.

GRAFTON D. FISH, 279 Palmer St., Assistant in Science Dept.

ALLEN W. MILLIKEN, 8 Lincoln St., Instructor in Civics.

KATE WILLIAMS, Court St., Designing.

MARY A. SOUZA, 233 Fourth St., Household Economics.

Evening School — Special.

H. PERCY ARNOLD, Rankin & Arnold, 19 North Second St., Steam Practice.

LEONARD KLEEB, 192 Washington St., Steam Practice.

HARRY H. TRIPP, 100 Willis St., Gasolene Engines.

DANIEL FERGUSON, N. B. School Dept., Carpentering.

FRANK HAMMOND, 79 Mill St., Architectural Drawing.

CHESTER HAMMOND, 79 Mill St., Machine Drawing.

JOSEPH ECCLESTON, 9 Jenny Lind St., Steam Practice.

EDWARD E. CROMPTON, Morse Twist Drill and Machine Co., Gearing.

WILLIAM H. HAND, JR., 464 County St., Gas Engines and Automobile Work.

MOLVINA L. VONFLATERN, 624 Cottage St., Head of Dress-making Dept.

CECILIA V. MOORE, 96 Oak St., Head of Millinery Dept.

ANNIE B. CHASE, 315 County St., Dressmaking.

KATHERINE V. RILEY, 558 Cottage St., Dressmaking.

ELIZABETH A. WALL, 19 Robeson St., Dressmaking.

KATHERINE W. SHERMAN, 28 Borden St., Dressmaking.

LIZZIE F. O'MEARA, 256 Hillman St., Millinery.

LILLIAN BROWNING, 351 County St., Millinery.

KATHERINE F. HARRINGTON, 29 Fifth St., Millinery.

RACHEL M. BERRY, 82 School St., Millinery.

Appointments for 1909-1910.

WILLIAM LAW, 179 William St., Instructor in Science Dept.

Resignations.

GRAFTON D. FISH, Assistant.

OUTLINE OF COURSES—FIRST TWO YEARS.

BOYS. For all Courses.

1st year.

Applied Math.	5	Drawing	7
Language	4	Shop, Wood	10
Elem. Mechanics	4	Shop, Metal	10

2nd year.

Applied Math.	3	Shop, Wood	10
Language	3	Shop, Metal	10
Drawing	5	Indust. History	2
Mechanism	4	Citizenship	3

GIRLS. For all Courses.

1st year.

Applied Language	5	Arithmetic and Household	
Sewing and Clothing Economy	8	Accts.	4
Cooking and Food Economy	9	Drawing, Applied Color Work,	
Hygiene and Sanitation	5	Simple Design	6

2nd year.

Citizenship	4	System and Care of Supplies	3
Applied Language	4	Cooking and Food Economy	9
Drawing, House Planning and Decoration	5	Hygiene and Sanitation	5
Sewing and Clothing Economy	9		

* The subjects given below indicate the character of the work in the various departments for the 3d and 4th years. In all these departments, the approximate time allotment is from 50% to 60% shop work, with the remaining time about equally divided between the technical subjects bearing directly upon the shop work and academic work of a general character.

TENTATIVE OUTLINE OF COURSES—THIRD AND
FOURTH YEARS.

BOYS.

POWER COURSE.

3rd year.

Economics, General Chemistry, Steam Mathematics, Electrical Mathematics, Machine Shop Practice, Machine Drawing, Heat and Electricity—Lectures and Laboratory.

4th year.

Applied Chemistry, Formal Algebra, Formal Geometry, Formal Physics, Economy, Mechanics, Steam Practice, Station Practice, Steam and Electrical Laboratory, Trigonometry, System.

MACHINE SHOP COURSE.

3rd year.

General Chemistry, Economics, Shop Mathematics, Physics, Algebra, Accounts, Machine Shop Practice, Drawing, Technics,—Materials, Extra Shop, Extra Drawing.

4th year.

Applied Chemistry, Mechanics, Formal Geometry, Economy, Steam Practice, Machine Shop, Laboratory,—Mechanical, Power, System.

WOOD CONSTRUCTION COURSE.

3rd year.

Formal Algebra, Physics, Shop Mathematics, Building Mathematics, General Chemistry, Accounts, Economics, Shop Practice, Drawing.

4th year.

Mechanics, Specifications, Applied Chemistry, Formal Geometry, Economy, Laboratory,—Testing, Drawing, Shop Practice, System.

WOOD WORKING COURSE.

3rd year.

General Chemistry, Economics, Shop Mathematics, Shop Work, Drawing, Material.

4th year.

Material, Drawing, Physics, Algebra, Geometry, Shop Work.

GIRLS.

HOUSEHOLD ADMINISTRATION.

3rd year.

English History, Modern Literature, Civics, Home Nursing, General Chemistry, Advanced Dressmaking and Millinery, Advanced Cooking.

4th year.

Applied Chemistry, Economics, Art, Household Administration, Modern Literature.

DRESSMAKER OR MILLINER COURSE.

3rd year.

Hygiene, Material, Technical Drawing, Civics, Trade History, Shop Millinery, Shop Dressmaking.

4th year.

Trade English, Trade Law, Bookkeeping, Design, Shop Work.

MACHINE SHOP OUTLINE.

The shop work is determined by the character of jobs ordered by the school office. In a general way this calls for the usual operation of common machine shop work, including:

Filing, fitting (all metals), turning, planing, screw cutting, milling, grinding, drilling, erecting, assembling and disassembling.

The work involving the above operations included the construction of electrical instruments for the laboratories, installing machine shop tools, counter shafts, line shafting, repairing lathes, making new posts, such as gears, tool posts, tool post wrenches, lathe centers, face plates, milling machine arbors and collars, drill chuck arbors, and angle plates. Taking the lathe apart, cleaning, overhauling and reassembling, construction of machines.

In this work the following machines were used by the boys: Lathes, planer, shaper, drill press, bench tools, universal grinder, milling machine, drill grinder, and the usual measuring tools, i. e., calipers, micrometer, etc.

ELEMENTARY WOODWORKING.

No graduated course of instruction in woodworking is laid out, the work given each boy being determined by the orders which are sent into the shop, although an instructor naturally uses judgment in the assignment of the work, with regard to the ability and the previous training of the boy. The work done during last year has been filling orders for equipment, and has included the following articles: Sixty tool chests, lockers, shop benches, chairs and other office furniture, vises, tables, drawing boards, T squares, and time racks.

The construction of these articles has called for practice in the general processes of woodworking, including butt, dovetail, blind, dado, mitre, half lap and glued joints, tongue

and groove joints, spline and dowell joints, simple work on the speed lathe,—all from working drawings prepared by the boy (not copied). While pupils use the woodworking machines but very little, they have ample opportunity to learn the uses and construction. (See list of equipment).

DRAWING, WOOD AND METAL.

Drawing is made a part of the shop work. In connection with the making of shop drawings for shop work, the elements of the standard methods of projection, section, detail drawing, etc., are introduced.

MATHEMATICS.

AIM OF FIRST YEAR WORK.

1. To lay an apperceptive basis for later mathematical work.
2. To teach the pupil readily and accurately to apply the processes of arithmetic to shop work.

TOPICS STUDIED DURING PRESENT YEAR.

1. Fundamental arithmetical operations.
 - a. Rapidity and accuracy with simple combinations.
 - b. Shop methods.
2. Stock calculations.
 - a. Amount of stock used, waste.
 - b. Cost of stock.
 - c. Cost of labor.
3. Estimating distances, areas, volumes, weights, etc.
4. Shop problems on pulleys, gears, belting, shafting, tapers, piping, etc., based on shop work done by pupils.

5. Problems in electricity, on lighting, power, etc., based on work done in science classes.
6. How to read curves and diagrams. How to plot curves.
7. How to look up and use data in tables, handbooks, etc.
8. Construction and use of mathematical instruments, such as the slide rule, micrometer, vernier, and the like.
9. Indicator cards. How made and how calculated.
10. Cost of power to run various machines in the shops calculated from indicator cards.
11. Recognition of type forms of mathematics in machines and construction work generally.
12. Fundamental constructions of Geometry and applications of same to machine and construction work.

Emphasis throughout is upon qualitative aspect of work. Considerable attention is given to forecasting answers and checking results.

ENGLISH.

·AIM OF FIRST YEAR WORK.

1. To teach the pupil clearly and accurately to express himself in both written and oral language upon every day matters.
2. To encourage him to read good books.

TOPICS COVERED THIS YEAR.

1. Written specifications on jobs.
2. Oral and written reports on jobs.
3. Oral and written reports on experiments in science.
4. Oral and written reports on lectures in science, civics, shop practice, and on visits to outside shops.

5. Oral and written reports on construction, use, and operation of machines.
6. Oral and written statements of constructions in mathematics.
7. Reading of selections from such good books as appeal to the interest of the boys.

INDUSTRIAL HISTORY.

The course in industrial history constitutes 20% of the academic work of the second year. The aim of the course is to develop in the pupil some appreciation of the significance of industrial progress. Owing to the fact that there is no material in collected form that can be utilized in this course, the work this year has been limited to readings from industrial biography and magazine literature and to discussions of some early types of engines.

CIVICS.

This course is given in the second year and constitutes about 20% of the academic work in that year.

The aim of the course is to develop in the pupil an intelligent interest in civic affairs. The work this year has consisted of a first hand study of the organization and working of the various city departments of New Bedford, lectures by city officials, discussion of local elections and local municipal questions, supplementary reading and discussion of editorials in local papers and of magazine literature of a popular nature bearing upon the topics studied.

ECONOMICS.

This course is essentially a continuation of the course in civics, the same methods being applied to the study of questions and topics connected with state and national economics.

MECHANISM.

This course is carried through the first and second years. Its general aim is to develop the power of making out the construction of machines, the functions of parts and the scientific mechanical principles involved, together with the acquisition of a mechanical vocabulary and the power of direct and clear expression along these lines.

The work has included practice in knotting and splicing; slinging and handling heavy machinery. A study of various machines in the shops has been carried out along the lines indicated above.

This work has been supplemented by lectures on various machines prepared and delivered by the students. This has been largely group work. The lantern and opaque projection have been freely used in this work—the boys preparing, drawing and selecting pictures to illustrate these lectures.

The second year work continues along these same lines with more emphasis on the scientific principles involved, the whole forming an apperceptive basis for the specialized work in the upper years.

CHEMISTRY.

Given in third year. The aim is to give a student the power of understanding chemical books and of applying his knowledge to the problems of his chosen line of work. From the beginning the practical applications of the subject are brought out. The work has included simple experiments involving the principles of testing of fuel, paints, oils, etc.

STEAM AND ELECTRICAL WORK.

Third year. Given in Power Department only. This work has included building motors, winding armatures, testing and repairing circuits and practical experience in the

engine and fire rooms together with the repairing, assembling and installing of steam and gas engines. The class work has included the study of and "laying out" of various power plants with lectures and discussions and use of reference books.

EVENING SCHOOL.

PROGRAM OF EVENING SESSION

- Monday* — House-framing, Architectural Drawing, Gas Engine Repair, Shop Drafting, Gasolene Engine, Dressmaking (Home), Millinery (Home).
- Tuesday* — House-framing, Architectural Drawing, Special Machine Shop, Shop Drafting, Mathematics, Gasolene Engine, Steam Practice, Dressmaking (Commercial), Millinery (Commercial).
- Wednesday* — House-framing, Architectural Drawing, Gas Engine Repair, Shop Drafting, Gasolene Engine, Dressmaking (Home), Millinery (Home).
- Thursday* — House-framing, Architectural Drawing, Special Machine Shop, Shop Drafting, Mathematics, Gasolene Engine, Steam Practice, Dressmaking (Commercial), Millinery (Commercial).

PRACTICAL MATHEMATICS.

AIM.

To teach men engaged in the trade of machinist and in the building trades those parts of mathematics that have practical application to their work.

TOPICS.

1. Machine shop arithmetic.
2. Recognition and mensuration of type forms of Geometry.
3. Similar figures.
4. Trigonometrical functions.
5. Use of squared paper.
6. Meaning and use of the formula.
7. The equation.

EVENING ELECTRICAL COURSE.

This course is intended for men in the Electrical Trades who are desirous of knowing more of the "hows" and "whys" of electricity. Some of the subjects taken up are dynamo and motor practice, testing, and wiring of armatures. Discussions and lectures constitute a part of the instruction.

ROOF-FRAMING.

Lengths of rafters, use of framing square in rafter bevels, laying out backing of rafters. Drawing and construction on scale model of different types of roofs, including hip, bell top, etc., with their modifications.

HOUSE-FRAMING.

Drawing and framing to scale of ordinary cottage house.

GASOLINE ENGINES.

Stripping and taking down. Cleaning and adjusting parts. Minor repairs. Assembling, adjusting. Wiring and adjusting spark circuit on single and multicylinder engines. Adjustment of carbureter. Location of trouble.

STEAM PRACTICE.

1. Elementary principles of heat.
2. Elementary principles of work and power.
3. Steam boilers, materials and construction.
4. Calculations of strength of steam boilers.
5. Calculations of efficiency of riveted joints.
6. Efficiency of steam boilers.
7. Horsepower of boilers.
8. Fusible plugs of boilers.
9. Types of safety valves, their uses and construction.
10. Calculations on the lever safety valve.

11. Pumps, different forms, their uses, principles of operation.
12. Pump calculations, size of same for given conditions, capacity of pumps.
13. Valve settings of duplex steam pumps.
14. Types of feed water heaters, principles of operation.

STEAM PRACTICE.

Cylinder dimensions for compound and simple engines.

Amount of steam required to develop a given amount of power in different types of engines.

Valve setting.

Corrugated furnace flues.

Steam pumps.

Indicator practice.

To find the required diameter of a cylinder to develop 500 H. P. running non-condensing.

To show the amount of steam required to develop 100 H. P. in two different types of engines.

To find the size of cylinders for a compound engine to develop 500 H. P. with $\frac{1}{4}$ cut off, 4 ft. stroke, 75 revolutions per minute, steam pressure 115 lbs. gauge.

Setting valves on Corliss engines.

Corrugated furnace flues.

Duplex pumps.

To find the size of feed pump to supply boilers of a given H. P.

To find the H. P. required to raise a given amount of water to a given height.

To increase the H. P. of a compound engine.

Indicator practice.

SPECIAL MACHINE SHOP WORK.

Instruction on various machine shop tools for men who are at present working on special machines and desire to obtain practical experience on some other machines.

GAS ENGINE REPAIR WORK.

A general overhauling of the gas engine, making minor repairs, reassembling, etc.

AUTOMOBILE.

The equipment for this course includes, one model K Winton engine and running gear, and one Stanley steamer. The work consists of overhauling the entire outfit, reassembling, and testing all parts.

MILLINERY (TO MARCH, 1910).

1. Making wire frame, covering frame, wiring and covering bands.
2. Making bias folds, roll and flat, hemming velvet, sewing straw on frame, wiring ribbon.
3. Lining hats.
4. Steaming velvet, making buckram frame.
5. Plain fitting hats, draping.
6. Working on crepe, chiffon, and maline.

In all work, the student is taught to be economical.

DRESSMAKING (TO MARCH, 1910).

HOME CLASS.

Students have been taught to cut by pattern, according to bust measure, a lining. Basting together, fitting, and finishing a shirtwaist suit.

COMMERCIAL CLASS.

Students have been taught to sew by hand and machine, then to make fine hand-run tucks, hems, facing, shirring, ruffles, and overcasting. The students have been taught the different stitches used in dressmaking, and to cut economically. They have made muslin aprons, and are now making plain shirtwaists.

REIMBURSEMENT BY THE STATE.

While none of this money goes to the credit of the school, the net cost to the city is reduced by two sources of income, tuition for non-resident pupils, and repayment by the state of a portion of the expense of maintenance. Under the present law the repayment for maintenance is one-half, and the State Board has fixed the tuition for out-of-town day pupils at \$15 per month.

Under the law as it formerly stood the state has repaid the city \$655.37 for its share of expenditures from February 1, 1909, to March 30, 1909. For the expenditures for maintenance from March 30, 1909, to June 30, 1910, \$15,997.89 less \$305 tuition for non-resident pupils, or \$15,692.89; a claim for \$7,846.44 has been filed with the State Board of Education, approved by that body, and should be appropriated by the legislature this winter.

When the city has received this money the net maintenance cost from March 30, 1909, to July 1, 1910, will have been reduced by \$8,151.44, or from \$15,692.89 to \$7,846.44. From July 1, 1910, to November 30, 1910, the estimated reduction is \$3,200 on an expenditure of \$6,233.17, or about \$3,000 net cost.

Annual Report

OF THE

Superintendent of Streets

OF THE

CITY OF NEW BEDFORD

TO THE CITY COUNCIL

FOR THE YEAR 1910.

NEW BEDFORD, MASS.
THE A. E. COFFIN PRESS, PRINTERS,
1911.

Report of the Superintendent.

*To the Mayor and City Council,
of the City of New Bedford, Mass.:*

Gentlemen:—The Annual Report of the work of the Sewer and Street Departments for the year ending December 3, 1910, is herewith submitted.

Respectfully submitted,

C. F. LAWTON.

NEW BEDFORD — 1910

Population, U. S. Census, 96,652.

Valuation, \$83,906,051.00.

Area, about 19 $\frac{1}{8}$ square miles.

168.35 miles of accepted streets.

Two bridges over the Acushnet River: New Bedford and Fairhaven Bridge, 70 feet wide and $\frac{9}{10}$ mile long: $\frac{4}{5}$ maintained by New Bedford. Coggeshall Street Bridge, $\frac{3}{4}$ maintained by New Bedford.

7.77 miles granite block paving, area 111,574 square yards.

0.45 miles asphalt block paving, area 6,511 square yards.

0.35 miles sheet asphalt paving, area 10,891 square yards.

3.64 miles bitulithic paving, area 59,372 square yards.

0.34 miles brick paving, area 9,276 square yards.

10.87 miles cobble paving, area 131,063 square yards.

81.14 miles macadam paving, area 1,029,784 square yards.

114 67 miles curbing.

32.29 miles flag sidewalks, area 96,710 square yards.

35.17 miles tar concrete sidewalks, area 152,606 square yards.

14.03 miles granolithic sidewalks, area 61,751 square yards.

91.89 miles sewers 8 to 72 inches diameter.

\$1,425,386.83, cost of sewer system to date.

1092 catch basins.

740 eyeholes.

822 manholes.

26 sewer outlets and 3 surface drain outlets into Acushnet River.

5 sewer outlets and 1 surface drain outlet into lower harbor.

8 sewer outlets into Clark's Cove.

Amount of stone received from city work,	2,894.00 tons
	<hr/> 42,413.00

NORTH CRUSHER:

Amount of stone on hand Dec. 4, 1909,	1,339.00 tons
Amount of stone received from sundry parties during the year,	11,563.00 tons
Amount of stone received from city work,	795.00 tons
	<hr/> 13,697.00

SOUTH CRUSHER:

Amount of stone on hand Dec. 4, 1909,	2,371.00 tons
Amount of stone received from sundry parties during the year,	23,283 tons
Amount of stone received from city work,	1,112 tons
	<hr/> 26,766.00

PORTABLE CRUSHER:

(Located Mt Pleasant and King's Highway).

Amount of stone on hand Dec. 4, 1909,	_____ tons
Amount of stone received from sundry parties during the year,	5,393.00 tons
Amount of stone received from city work,	935.00 tons
	<hr/> 6,328.00

Total amount of stone received at the three crushers, 89,204.00

Crusher stone on hand Dec. 4, 1910:

Centre crusher,	2,500.00 tons
North crusher,	2,000.00 tons
South crusher,	3,500.00 tons
Portable crusher,	

8,000.00 tons

Average cost of stone per ton,	\$.600
Average cost of crushing per ton,	<hr/> .327

Total average cost of crushed stone per ton,	<hr/> \$.927

REPORT

CITY OF NEW BEDFORD, MASS.,
OFFICE OF NEW BEDFORD WATER BOARD,
JANUARY 2, 1911.

To the City Council of the City of New Bedford:

GENTLEMEN :—In accordance with the provisions of the Water Ordinance, the New Bedford Water Board respectfully submit their forty-first annual report. Accompanying it, will be found the reports of the Water Registrar and the Superintendent.

The following abstract, drawn from the report of the Water Registrar, shows the financial operations of the past year in condensed form:

RECEIPTS.

Balance, December 1st, 1909,		\$44,139.62
Receipts from water rates,	\$244,203.79	
Receipts from other sources,	23,216.52	267,420.31
		<hr/>
		\$311,559.93

PAYMENTS.

Management and repairs, less interest, and sinking funds,	\$67,076.08	
Extension of works,	89,542.43	
Interest paid,	56,240.00	
Interest paid Sylvia Ann Howland fund,	6,000.00	
Sinking funds,	28,338.00	247,196.51
Balance December 1, 1910,		64,363.42
		<hr/>
		\$311,559.93

The actual outlay for the construction of these works, exclusive of debt, interest, and management and repair account, is \$3,601,863.52.

Following is a summary of the duplicate supply main account, from High Hill to city, to December 1, 1910:

Received from sale of bonds,	\$250,000.00
Received from sale of material,	836.65
	<hr/>
	\$250,836.65
Payments,	245,459.28
	<hr/>
Balance unexpended,	\$5,377.37

On June 23rd, 1910, Francis P. Washburn was elected a member of this Board, for a term of three years, which ends in June, 1913.

The year has been a notable one of achievement, of a large outlay of money, and of a distinct advance in number of routine activities. A new high water mark has been established. We have granted ninety-two petitions this year for the extension of main pipe, as against sixty-one in 1909 and fifty-six in 1908. We have added 726 service supplies as compared with 527 last year, an advance of fully 38 per cent. in one year. Interwoven with all this, has been the successful installation of the new duplicate supply main, all work upon which, we are pleased to report, will be fully completed within the appropriation made for this undertaking. This work has extended over the entire season. The larger part was originally intended for contract work, that portion only within the city limits where the new pipe replaced older pipe being reserved for the attention of our own forces. This last named portion of the work, we ordered to be first done. It was accomplished to our entire satisfaction so quietly and so speedily, that the contract idea was abandoned, and we decided to complete the entire installation by citizen day labor. A large force has been kept in employment throughout the entire season.

The pipe itself was practically completed in November, since which time it has been in daily use. A certain amount of work yet remains for attention, for which the balance of the appropriation amply provides.

Aside from the work of installing the duplicate supply main, there have been about six and one-half miles of pipe laid in response to the petitions of takers in various parts of the city. This is fully fifty per cent. advance over the requirements of last year.

Meters have been installed with all new supplies this year. This has required 720 meters, and in addition to these, 814 have been placed upon supplies heretofore unmetered, making a total of 1,534 meters set. 47 8-10 per cent. of the total number of service supplies are now metered, which represents a gain of ten per cent. upon total number of services during the year.

At a meeting of this Board held on February 2, 1910, the rate for building purposes then in force was rescinded and the following rate was established:

VOTED:—That on and after this date the charge for water used for building purposes shall be as follows:

When water is taken from metered supplies by application made to the Water Registrar previous to use, at the rate of fifteen cents per thousand gallons.

When taken from unmetered supplies as follows:

Ordinary frame dwellings, 25 cents per room

Ordinary brick dwellings, 50 cents per room

Payment to be made in advance.

Manufacturing structures, business blocks, or any building containing over thirty (30) rooms, at metered rates.

No charge in any case to be less than one dollar.

Unusual conditions whereby water can temporarily be more conveniently taken from an adjoining supply, metered or unmetered, belonging to the same or other parties, and by their permission, is to be left for adjustment with the Water Registrar, provided, in all cases, that application is

made in advance of such use and not otherwise. In case water is taken for this use without previous notice to the Water Registrar, the charge for an unmetered supply shall be made.

In most manufacturing cities, the industries do not depend wholly upon the city water supply. Provision for such use is made by a secondary supply. The manufactories of Lowell, Lawrence, and Manchester draw upon the Merrimac River. Holyoke has the Connecticut River. Fall River uses Watuppa Pond. In our own city, no such provision can be acquired. All water needed for every possible purpose must come through the city supply. It therefore is of the utmost importance that our facilities be kept tuned up to the highest efficiency. Our plant continues to be very reliable, with the exception that there is a little too much falling off from normal pressure at the southerly end of the city during the hours of heavy draft. Compared with other cities, we show a record of few breaks and none that have compelled the stopping of any one industry for a single moment. The completion of the new duplicate supply main insures an ample supply to the north end, but in order to obtain the best results in maintaining normal pressure under heavy drafts throughout the length and breadth of the city, large mains should be further extended into the gridiron of the distributing system. We feel that work cannot be commenced too soon in making such provisions. We commend the suggestions outlined in the Superintendent's report as worthy of consideration. We would suggest an early conference with representatives of your body to consider the advisability of immediate application to the Legislature for authority to increase the water debt sufficiently to meet the expense of installing all, or such portions of, the reinforcements therein outlined, as may later be determined to be necessary in maintaining the efficiency of the system.

The following contracts have been made this year on account of the "duplicate supply main:"

Date. 1910.	Contractor.	Supply.	Consideration.
Feb. 4	Z. B. Davis Corporation.	Cypress plank	\$58.00 per M.
		" boards	\$55.00 " "
		Yellow pine plank	\$36.00 " "
		Spruce plank and lumber	\$27.00 " "
Mar. 3	Water Works Equipment Co.	36 inch tapping sleeves, with 24 inch valves	\$529.50 each.
		Use of tapping machines	\$20.00 each.
May 16	Chadwick — Bos- ton Lead Co.	45 tons pig lead	\$89.85 per 2,000 lbs.
May 16	Harold L. Bond Co.	70 bales jute packing	4 15-100 cents per lb.

The following are the principal contracts which have been executed this year in connection with operations of ordinary maintenance and extensions.

Date. 1910.	Contractor.	Supply.	Consideration.
Feb. 8	Frank A. Frates	Double harness	\$78.50
Feb. 11	E. Anthony & Sons	Printing reports	675 complete pam- phlets \$85.00. 400 extra printed sheets \$7.68.
Mar. 3	Edson Mfg. Co.	Portable gasoline engine pump- ing outfit	\$250.00
April 12	New Bedford Boiler and Ma- chine Co.	34 tons lead pipe	\$5.04 per 100 lbs.
April 27	Braman Dow & Co.	2000 feet 2 inch galvanized wrought iron pipe	13 68-100 cents per foot.
May 16	Chadwick — Bos- ton Lead Co.	30 tons pig lead	\$89.85 per 2,000 lbs.
May 16	Harold L. Bond Co.	15 bales jute packing	4 15-100 cents per lb.
June 6	Johnson Service Co.	Motor truck	\$2,500.00
Aug. 18	Patrick McQuade	Erection of ga- rage	\$3,327.00
Sept. 22	Blake & Knowles Steam Pump Works	Feed pump	\$396.50
Oct. 11	Clinton Wire Cloth Co.	30 special copper screens	21½ cents per square foot.

Oct. 26	DeWolf & Vincent	12 dozen special padlocks	\$18.00 per dozen
Oct. 26	John B. Sullivan	Special granite curbing	\$105.00
Nov. 17	S. F. Bowser & Co.	Gasoline storage tank and pump	\$150.00
Nov. 19	General Electric Co.	Electric motor	\$204.00
Dec. 20	Standard Cast Iron Pipe and Foundry Co.	1540 tons pipe and special castings	Pipe \$21.38 per ton Specials \$46.00 per ton

On July 11, a contract was made by the Fuel Committee of the City Council with the Garfield & Proctor Coal Company for twelve hundred gross tons of best quality New River coal for use at the Little Quittacas Pumping Station, the same to be delivered at Braley's Station, at the rate of \$4.25 per gross ton, also fifty tons same coal to be delivered at the Purchase Street Pumping Station, at the rate of \$4.50 per gross ton; also a contract with F. T. Akin & Company to deliver 26 gross tons of best quality of George's Creek Cumberland coal at the department workshop, on North Water Street, for the sum of \$4.75 per gross ton.

Respectfully submitted,

Meters:			
Cost of meters,	19,000.34		
Cost of setting,	3,447.53	22,447.87	
Mill piping,		185.63	
Boiler feed pump, Quittacas station,		8.54	89,542.43
Total expenditures for the year,			\$247,196.51
Whole outlay upon the works to this date,			\$6,249,582.92
Balance Dec. 1, 1910,			64,363.42
			\$6,313,946.34

The receipts from the commencement of the works to this date have been as follows, viz:

Appropriations by the City Council,	\$1,038,000.00
Net appropriations for further supply,	1,316,639.60
Receipts for water and other sources,	3,959,306.74
	<hr/>
	\$6,313,946.34
Deduct total outlay,	6,249,582.92
	<hr/>
Balance as above Dec. 1, 1910,	\$64,363.42
Outlay,	\$6,249,582.92
Deduct from outlay:	
Paid for management and repairs, \$1,262,995.26	
Interest paid,	498,948.14
Bonds paid,	465,000.00
Sinking funds,	420,776.00
	<hr/>
	2,647,719.40
Actual net cost of works,	\$3,601,863.52
Total receipts for water,	\$3,959,306.74
Deduct the amount paid for maintenance, debt, interest and sinking funds,	<hr/>
	2,647,719.40
Water receipts applied to construction,	<hr/>
	\$1,311,587.34

The funds for the construction of these works have been derived from the following sources:

Investment of Sylvia Ann Howland educational bequest,	\$100,000.00
Sylvia Ann Howland water bequest,	100,000.00
Received from sale of bonds,	815,000.00
Net receipts applied to construction,	1,311,587.34
Appropriation for construction in 1885,	23,000.00
Net proceeds of bonds, etc., sold, further supply,	1,316,639.60
	<hr/>
	\$3,666,226.94
Deduct balance Dec. 1, 1910,	64,363.42
	<hr/>
Net cost of works as stated above,	\$3,601,863.52

The water debt at this date is as follows:

Water bonds 4 per cent,	\$ 140,000.00
" " 4 " " (further supply),	1,200,000.00
" " 4 " " (duplicate supply main),	250,000.00
" " 3 1/2 " "	48,000.00
Sylvia Ann Howland bequest, 6 per cent,	100,000.00
	<hr/>
Total,	\$1,738,000.00

Less sinking funds in treasury:	
No. 9	\$20,000.00 bonds due 1918, \$17,887.18

Balance unexpended,		\$5,377.37

Respectfully submitted,

CLIFFORD BAYLIES,
Water Registrar.

REPORT OF THE SUPERINTENDENT

NEW BEDFORD WATER BOARD,
SUPERINTENDENT'S OFFICE,
DECEMBER 7th, 1910.

To the New Bedford Water Board:

GENTLEMEN:—The forty-first annual report of the Superintendent, for the year ending December 1st, 1910, is herewith presented.

Never before in the history of this department have we given employment to such a large number of men. The larger part of this extra force was used in the installation of the new duplicate supply main, but, aside from this, in amount and variety of routine work executed, the employees of this department have surpassed all previous records.

Copies of the rainfall records at Little Quittacas Pumping Station and at the Long Plain Storing Reservoir appear upon the next two pages.

These are followed by a series of tables kindly supplied by Chief Engineer X. H. Goodnough of the State Board of Health, showing results of chemical examination of samples of water taken from locations indicated. These statements indicate that the quality of the water remains satisfactory. The quantity has been ample in meeting all requirements.

RAINFALL AT QUITTACAS PUMPING STATION FOR 1910.

2—Deep yellowish brown tint.

The surface of Great Quittacas Pond has varied from elevation 51.33 on March 16th, to elevation 47.40 on November 1st. At this date it is at elevation 47.70.

The surface of Little Quittacas Pond has varied from elevation 49.00 on January 24th to elevation 47.15 on this day. This pond is now rapidly being filled to the level of Great Quittacas Pond, the connection being open.

The usual care necessary for good maintenance has been given to all parts of the works. The Pumping Station with its equipment, force main, distributing reservoir, distributing system, are all in the best of order.

The distributing mains have been increased 67,756 feet, and 9,651 feet of pipe laid in previous years have been removed. The total mileage is now 136.97367.

The installation of the new duplicate supply main leading from High Hill Reservoir to the City is practically completed. The work has been done by our own forces and has extended through the entire season.

This pipe is laid upon the lines described in my last report, i. e., commencing at effluent chamber at High Hill Reservoir, it parallels the first supply main to the intersection of the Plainville road and Mt. Pleasant street, where it diverges and follows through Tarkiln Hill road, Park avenue, thence south in Bowditch street to Cedar Grove street. From the Reservoir to Nash road, the pipe is thirty-six inches in diameter. From the Nash road south, it is thirty inches. Returning to the corner of Park avenue and Bowditch street, a sixteen inch pipe has been laid northerly in Bowditch street, thence easterly in Tarkiln Hill road to Lunds Corner. At this corner, the work is not yet fully completed.

This pipe crosses the bridge in Shawmut avenue at Turner's Pond. The older pipe was laid across the bottom of the pond at the west side of the bridge. It was necessary to raise the surface grade of this bridge quite an amount to accommodate the new pipe. Three twenty-

four inch connections have been made with the older pipe at the following locations:

1. At the intersection of Plainville road and Mt. Pleasant street.
2. Shawmut ave., a short distance south of the bridge.
3. 60 foot way, a short distance west of Shawmut avenue.

Fourteen insulated joints, placed with a view of preventing electrolysis, were located as follows:

1. Station 13 + 70. On straight by-pass connection leading from old 36-inch main to 48-inch force main on east side of High Hill Reservoir; joint is short distance north of old 36-inch main and south of 36-inch gate.

2. Station 13 + 90. On curve connecting new 36-inch main with the straight by-pass and west of 36-inch gate on said curve.

3. Station 25 + 98.8. In 60-foot way, 1,370 feet west of Turner's Brook culvert.

4. Station 43 + 28.9. In 60-foot way, 360 feet east of Turner's Brook culvert.

5. Station 46 + 1.1. In 60-foot way, upon the west line of Shawmut avenue.

6. Station 52 + 72.7. Shawmut avenue, 48 feet south of first angle south of Turner's Pond.

7. Station 53 + 39. Shawmut avenue, 114 feet south of first angle south of Turner's Pond.

8. Station 70 + 49. Shawmut avenue, 102 feet north of north line Plainville road.

9. Station 92 + 22.3. Plainville road, 46½ feet east of 36-inch gate opposite Shawmut schoolhouse.

10. Station 128 + 98.3. Plainville road, 69 feet northwesterly of angle at junction of Mt. Pleasant street, or 25 feet northwesterly of northerly 36-inch gate.

11. Station 154 + 79.9. Tarkiln Hill road, 75 feet west of first angle west side of railroad tracks.

12. Station 157 + 46.4. Tarkiln Hill road, 191 feet east of first angle west side of railroad tracks.

13. Tarkiln Hill road, 12.5 feet east of east line Bowditch street.

14. Tarkiln Hill road, 410.2 feet east of east line Pine Grove street.

A connection, properly gated, has been made with the thirty-six inch by-pass on the east side of High Hill Reservoir, connecting the forty-eight inch force main with the older distribution main.

The remaining work of this undertaking consists in the completion of the work at Lunds corner, and the necessary grading and clearing up of the sixty foot right of way. Water was first passed through this pipe to the City on November 9th, 1910.

You will note by the financial statement that a balance of \$5,377.37 now remains to the credit of this work. This is sufficient to fully complete the same.

There have been nine leaks upon the mains the past year as herewith shown.

Two hundred and fifty-nine feet of small sized distribution pipe (less than four inches) have been laid and eighty-five feet of that previously laid has been removed. The total length now in use is 4,314 feet.

One hundred eighty-six new stop gates have been set and twenty of those previously set have been removed. The total number now in use is 1,643.

Two new small sized stop gates have been set and one of those previously set has been removed. The total number now in use is 111.

Thirteen new waste gates have been set and one of those previously set has been removed. The total number now in use is 124.

Thirty-five new stop gates for private supplies have been set and five of those previously set have been removed. The total number now in use is 293.

Twenty-two new air taps have been set. The total number now in use is 91.

One hundred thirteen new hydrants have been set and thirty-nine of those previously set have been removed. The total number now in use is 1,004.

Seven hundred fifty-three service pipes have been laid and twenty-seven of those previously laid have been removed. The total number now in use is 12,769.

One hundred fifty-seven service taps have been cleaned as follows: Rust, 110; sediment, 25; fish, 2; trouble inside, 20.

The total number of motors is 177.

All new service supplies have been metered and in addition to these, 814 meters have been placed upon supplies heretofore unmetered. 47 8-10 per cent of the service supplies are now metered.

The total number of meters set in 1910 was	1,569
Number removed,	35
	<hr/>
To be added,	1,534
Number in use at date of last report,	4,572
	<hr/>
Number in use December 1st, 1910,	6,106

This list may be divided as follows:

Manufacturing supplies,	234	
Domestic supplies,	5,872	6,106
	<hr/>	

The following is a list of the different makes of meters now in commission: Crown, 242; Empire, 185; Nash, 462; Gem, 7; Trident Compound, 8; Trident Crest, 8; Trident Disc, 248; Hersey Torrent, 13; Hersey Rotary, 100; Hersey Disc, 810; Watch Dog, 5; Union Rotary, 142; King, 1,450; Lambert, 1,216; Thomson, 3; Worthington Turbine, 2; Worthington Dies, 1,205.

The Jenks Drinking Fountain, Sixth street, at the junction of County, which was worn out, has been replaced by a new fountain of the same type. The Nash Drinking Fountain, south side of Elm street, west of Purchase, has been removed. Following is a complete list of the drinking fountains now in use:

1	West French ave., at Cove st.	Jenks.
2	Bolton st., at junction of Rivet st.	Jenks.
3	Sixth st., at junction of County st.	Jenks.
4	Allen st., at junction of Dartmouth st.	Jenks.
5	Front st., at corner of School st.	Jenks.
6	Union st., at corner of Bethel st.	Nash.
7	Market st., bet'n Pleasant and Sixth sts.	Jenks.
8	Court st., west of Jenney st.	Horse bowl.
9	Kempton st., at junction of Mill st.	Jenks.
10	Hillman st., at corner of County st.	Nash (drinking only).
11	County st., at corner of Smith st.	Nash.
12	Shawmut ave., at corner of Durfee st.	Jenks.
13	Acushnet ave., at junction of Weld st.	Jenks.
14	Acushnet ave., south of Tarkiln Hill rd.	Jenks.
15	Belleville rd., bet'n Acushnet ave. and No. Front st.	Jenks.
16	Acushnet ave., at junction of Water st.	Jenks.

In July, a Johnson Three Ton Motor Truck was added to the equipment of this department.

- A garage is now being erected within the Water Street Workshop enclosure by Patrick McQuade, Contractor, for the use of this department. It has three doors opening upon Water street. Its floor dimensions are 31½ feet by 23½ feet. The plans were drawn by Nat. C. Smith, Architect.

MONTHLY CONSUMPTION OF WATER.

1910 Month	Monthly Consumption	Daily Average Consumption
	Gallons	Gallons
January	240,784,818	7,767,252

The average daily consumption of the past year has been 7,864,323 gallons. This may be divided into two items, of which 5,322,000 gallons represents the day use (the twelve hours which follow six A. M.), and 2,542,000 gallons represents the night use. Compared with the record of 1909, these figures show a daily average increase of a little over 400,000 gallons. The largest amount used in a single day was on February 7, 1910, 11,424,188 gallons. This, however, does not express the maximum rate of usage. There are short periods in every working day when the simultaneous drawing by a large number of takers creates a larger rate. For instance, in the early morning, when all the mills are drawing at exactly the same time preparatory to starting, or on Monday mornings, when the majority of families are attending to the weekly wash, then the draft upon High Hill Reservoir sometimes approaches a rate of twenty million gallons per twenty-four hours. No city ever pretends to furnish a supply sufficient for the simultaneous usage of all of its takers. That would bleed the mains far beyond their capacity.

There are, however, two things to be recognized and for which provision must be made. Each new mill adds one more supply to those which will draw at exactly the same moment. The number of takers who are discontented with the delivery of an ordinary service supply is increasing. The desire to fill their bath tubs in from two to three minutes, instead of allowing five or six minutes. So it is with other supplies. The demand is constantly in the direction of larger deliveries, and all this creates a large rate.

A successfully operated water works must always stand ready to deliver the maximum amounts likely to be drawn, with a minimum loss of pressure. To do this requires mains of ample size. It is the experience of all cities that they have outgrown their water supplies almost as soon as constructed. While the supply now delivered at the north end of the City is ample for all requirements,

a further extension of these mains must be made to obtain the maximum benefit of this delivery throughout the entire length of the City. Under a heavy draught, there is little variation from normal pressure throughout the north end district, from one to three pounds loss, according to location. Under the same conditions, in the centre of the City, the loss is from ten to twelve pounds. In the vicinity of Dartmouth and Bolton streets, the loss is about fifteen pounds; while upon Brock avenue, the loss reaches twenty pounds or more.

To correct this condition, and provide ample reinforcements in equalizing the pressure in all parts of the City, I propose an encircling main as hereafter described. It is not proposed to undertake the whole of this work at once, but such portions of it from time to time as appear necessary. I would suggest for the first installation that portion of the westerly section from Durfee and Cottage streets southerly to the vicinity of Dartmouth street, where a reinforcement will be needed as soon as the new Sharp Mill, now under construction, is placed in operation.

The proposed plan of this encircling main is something like the following:

Starting with the older distributing main which terminates in Mt. Pleasant street at Durfee, extending this southerly through Cottage, Parker, Park, Union, Tremont, Grape, Oak, Rockland, Orchard, Thompson, Fourth, Rivet, to First street. This constitutes the westerly portion of the encircling main, and involves the placing of 17,300 feet of thirty inch pipe at a cost of \$130,000.

The easterly section begins with the thirty inch main now terminating in Bowditch street at Cedar Grove street. From this point extend pipe southerly through Bowditch, Weld, Purchase, Willis, Water, Second, Grinnell, First, and in the latter street to Rivet street, where it joins the first described pipe. This to be connected with pipes in side streets through which it passes. This involves the placing

of 13,000 feet of thirty inch pipe, and the cost is estimated to be \$100,000.

The joining of the two lines described above creates a large encircling main around the thickly settled portion of the City, which will guarantee the delivery of larger volumes of water, available in every section, both for fire purposes and for the needs of the City in its regular growth.

From the corner of First and Rivet streets, I would suggest the placing of a twenty-four inch main southerly in First street to Cove road; thence in Cove road easterly across West French avenue into Brock avenue, and southerly in the last named thoroughfare, some 2,100 feet. This will require the placing of about 4,760 feet of twenty-four inch pipe at a cost of \$27,000.

The placing of these mains will remove an almost equal length of smaller pipe, which, of course, is desirable. There are about sixteen miles of four inch pipe now within the gridiron of our distributing system. Much of this was laid years ago in streets then thinly populated, but which since have become congested thoroughfares; fire risks have annually become more hazardous in consequence. Four inch pipe is of little use for fire protection in a congested district, and pipe of this size should be removed in such locations as speedily as possible and replaced with that of larger size.

It is possible that at some future day a route for another supply main from High Hill Reservoir will be found through Shawmut avenue, the Fresh River Valley, crossing the Hathaway road near the ledge, and entering the City through the swamps west of the Oak Grove Cemetery.

It has been suggested that the supply would be further strengthened by making a direct connection between the Quittacas Pumps and the distributing system. This suggestion involves the tapping of the present force main in Freetown at the intersection of the City's right of way with the County road; thence extending southerly in the

County road, Acushnet avenue, and Bowditch street to the vicinity of Park avenue, where it would connect with the present thirty-six inch distributing main. Such an arrangement would render it possible to deliver direct into the distributing system such portions of, or all the pumpage, as might be deemed best. It would also serve all properties abutting Acushnet avenue and Bowditch street by which it passes. Assuming the size of this pipe to be thirty-six inch, and its length to be 29,300 feet, the estimated cost is \$275,000.

Considering all the improvements enumerated above as a whole, we see that their installation involves an outlay of \$532,000, divided as follows:

1	Encircling main, western portion,	\$130,000
2	Encircling main, eastern portion,	100,000
3	Extension of 24-inch main,	27,000
4	36-inch main in Acushnet ave., and Bowditch st.,	275,000
		<hr/>
		\$532,000

The present market quotations for supplying cast iron pipe are unusually low. It is doubtful if such favorable figures can again be obtained for many years to come. I would, therefore, recommend that you give the plans which I have herein outlined early consideration.

Respectfully submitted,

R. C. P. COGGESHALL,
Superintendent.

TABLE A.
STATEMENT OF WORK DONE BY LEAVITT ENGINE B FOR YEAR ENDING
DECEMBER 1st, 1910.

Diameter Steam Cylinder, 16 $\frac{3}{4}$ % and 36 $\frac{1}{4}$ in.
 Diameter Pump Plungers, 13 1-10 and 19 $\frac{3}{8}$ in.
 Stroke of Piston and Pump Plungers, 90 inches.

Average working steam pressure, 185 lbs.
 Average static head, 168.11 ft.

MONTHS	Total pumping time per month		Total number of strokes per month	Average number of strokes per minute.	Total fuel used for all purposes.	Total number of gallons pumped per month. For slip. allowance being made	Number of gallons pumped per pound of coal for total coal.	Number of gallons raised 100 ft. per lb. of coal for total coal.	Average dynamic head against pump in feet: no allowance for friction in suction.	Average duty in pounds raised one foot high per 100 lbs. of coal; calculated on total fuel used for all pur- poses. No deductions.

SUMMARY OF STATISTICS

FOR THE YEAR ENDING 1910.

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION.

NEW BEDFORD WATER WORKS, NEW BEDFORD, BRISTOL COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1910, 96,652.

Date of construction 1866 to 1869, inclusive. Further supply
1895 to 1901, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet river, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the City.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6-10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase street pumping station. Thence it was pumped into the Mt. Pleasant distributing reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distant, from whence it flowed by gravity into the City's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52' through a 48-inch steel force main $8\frac{1}{4}$ miles long) to a distributing reservoir (capacity 67 millions gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the City's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1-17 miles in length.

The first named system is not now in use; but is held in reserve to meet any emergency which might occur.

PUMPING STATISTICS.

1. Builders of Pumping Machinery.

Purchase Street Station,

a. McAlpine engine

built by Quintard Iron Works, Cap. 5,000,000 gals. per 24 hrs.

b. Duplex engine

built by Henry R. Worthington, Cap. 3,000,000 gals. per 24 hrs.

c. High duty engine

built by Henry R. Worthington, Cap. 5,000,000 gals. per 24 hrs.

Little Quittacas Station,

a. b. Leavitt engines in duplicate

built by Dickson Mfg. Co.

Capacity of the two engines

20,000,000 gallons per 24 hrs.

2. Description of fuel used.

a. Kind—bituminous.**b.** Brand of coal—New River.**c.** Price of coal per gross ton—delivered Little Quittacas Station, \$4.38.**d.** Percentage of ash—7.**e.** Wood, price per cord—none used.

LITTLE QUITTACAS STATION—Engine B

3. Coal consumed for the year—3,292,750 lbs.

4. [Pounds of wood consumed] \div 3 = equivalent amount of coal—none used.

5. Total equivalent coal consumed for the year = (3) + (4), 3,292,750 lbs.

6. Total pumpage for the year—2,845,558,260 gallons, with allowance for slip.

7. Average static head against which pumps work—168.11 feet.

8. Average dynamic head against which pumps work—184.92 feet.

9a. Number of gallons pumped per pound of equivalent coal (5)—894.

9b. Number of gallons raised 100 feet per pound of equivalent coal (5)—1,653.

$$10 \text{ Duty} = \frac{\text{gals. pumped (6)} \times 8.34 \text{ (lbs.)} \times 100 \times \text{dynamic head (8)}}{\text{Total fuel consumed (5)}} = 133,278,059$$

Cost of pumping, figured on pumping station expenses, viz.:

\$16,878.46

11. Per million gallons pumped—\$5.93

12. Per million gallons raised one foot (dynamic)—3 $\frac{3}{10}$ cents

Cost of pumping figured on total maintenance and interest on bonds, (see financial CC+DD) viz.: \$129,316.08

13. Per million gallons pumped—\$45.44

14. Per million gallons raised one foot (dynamic)—24 $\frac{4}{10}$ cents

10. Number of hydrants (public and private) now in use, 1,361.
11. Number of stop gates added during year, 166.
12. Number of stop gates now in use 1,643.
13. Number of stop gates smaller than 4 inch, 111.
14. Number of blow-offs, 124.
15. Range of pressure on mains, 25 lbs. to 95 lbs.

SERVICES.

16. Kind of pipe, lead, wrought iron and cast iron.
17. Sizes, $\frac{1}{2}$ inch to 10 inches.
18. Extended 32,278 feet.
19. Discontinued 1,035 feet.
20. Total now in use, 86 $\frac{75}{100}$ miles.
21. Number of service taps added during year, 726.
22. Number now in use, 12,769.
23. Average length of service, 35.9 feet.
24. Average cost of service for the year:
 - a. Gross, \$19.26.
 - b. Net, \$9.41.
25. Number of meters added, 1,534.
26. Number now in use, 6,106.
27. Percentage of services metered, 47 $\frac{8}{10}$.
28. Percentage of receipts from metered water (B \div C), 74 $\frac{8}{10}$.
29. Number of motors and elevators added, 5.
30. Number now in use, 177.

CITY ORDINANCES

PASSED BY THE CITY COUNCIL
FROM JUNE 1910 TO JUNE 1911.

CITY OF NEW BEDFORD.
IN THE YEAR ONE THOUSAND NINE HUNDRED AND TEN.

AN ORDINANCE REGULATING TRAFFIC ON CERTAIN STREETS.

Be it Ordained by the City Council of the City of New Bedford as follows:

SECTION 1. Purchase street, between Elm and Union streets, is hereby made a one-way street; excepting street cars, all vehicles using the named street between the hours of 7 a. m. and 9 p. m., shall proceed in a northerly direction. William street, between Pleasant street and Acushnet avenue, is hereby made a one-way street; excepting street cars, all vehicles using the named street between the hours of 7 a. m. and 9 p. m., shall proceed in an easterly direction.

SECTION 2. On North Second street, between Middle and Union streets; and on South Second street, between Union and Spring streets, no vehicle shall be allowed to stop with its left side to the curb.

SECTION 3. On the streets enumerated in Sections 1 and 2, no vehicle shall be allowed to stand for a period exceeding five minutes.

SECTION 4. Every person in charge of a vehicle on the streets named shall remove the same to another place on the street, or to another street, as directed so to do by any police officer; any police officer may remove the same to and leave the same in such other place or other street.

SECTION 5. Any violation against this ordinance shall be punishable by a fine not exceeding twenty dollars for each offence.

In Common Council, October 27, 1910.

Passed to be ordained,

D. HERBERT COOK, President.

In Board of Aldermen, October 27, 1910.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

Approved, October 28, 1910.

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

CHARLES P. SAWYER, Acct. City Clerk.

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND TEN.

AN ORDINANCE

PROVIDING FOR THE APPOINTMENT OF AN INSPECTOR OF WIRES.

Be it Ordained by the City Council of the City of New Bedford as follows:

SECTION 1. Annually in the month of April, at the time of the election of the other officers of the city, the Mayor shall nominate, subject to confirmation by the City Council, a person to be Inspector of Wires, who shall hold his office until the next annual election of city officers in April and until another be duly appointed in his stead; unless sooner removed by the City Council.

SECTION 2. It shall be the duty of the Inspector of Wires to faithfully perform all the duties required to be performed by Chapter 122 of the Revised Laws, and all Acts amending the same or in addition thereto, and shall have all the powers and authority created thereunder; and shall perform all the duties for him provided by ordinance and carry into effect all orders by the City Council or either branch thereof to him directed.

SECTION 3. In full compensation for all the services of the Inspector of Wires he shall receive such salary as the City Council may from time to time fix and determine.

In Common Council, December 22, 1910.

Passed to be ordained,

D. HERBERT COOK, President.

In Board of Aldermen, December 22, 1910.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

December 24, 1910. Approved,

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

DANIEL B. LEONARD, City Clerk.

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND TEN.

AN ORDINANCE

PROVIDING FOR A SYSTEM OF COMPETITIVE BIDS FOR PURCHASES AND CONSTRUCTION WORK REQUIRED BY THE SEVERAL DEPARTMENTS.

Be it Ordained by the City Council of the City of New Bedford as follows:

SECTION 1. An ordinance entitled "An ordinance providing for competitive bids for furnishing supplies, work and materials in certain cases," passed by the City Council, November 12, 1908, and approved by the Mayor November 14, 1908; and an ordinance entitled "An ordinance amending an ordinance providing for competitive bids for furnishing supplies, work and materials in certain cases, November 14, 1908," passed by the City Council June 10, 1909, and approved by the Mayor June 11, 1909, are hereby repealed.

SECTION 2. A system of competitive bids, applying to all purchases made by and construction work done for the city of New Bedford, through its several departments, excepting the purchase of horses, or the purchase of works of art or special editions of books for the Free Public Library, is hereby provided. These excepted things shall not be purchased, if the cost exceeds Fifty Dollars, unless with the approval of the Mayor, which approval shall be set forth in writing, attested by the Mayor's signature, upon the vouchers or bills for the same.

SECTION 3. In the purchase of anything required for the several departments of the city of New Bedford, in cases where the cost of any one article or quantity of similar articles purchased at the same time, or for the ordinary and customary supply of the same, exceeds Fifty Dollars, the head of department, board or committee charged with the purchase shall not divide such purchase in such manner as to bring the amount of said purchase below the amount of Fifty Dollars, but shall secure sealed competitive bids for furnishing the same.

SECTION 4. In all cases where repairs, of whatever nature, are to be made to public buildings of the city of New Bedford, the estimated cost of which shall exceed Fifty Dollars, the head of department, board or committee in charge of said building shall secure sealed competitive bids for furnishing the required work and materials, except as provided in Section 5 of this ordinance.

SECTION 5. In case of serious break in gas fixtures, electric light plants, electric light wiring, heating or hoisting apparatus, leaks in roofs, defects in plumbing, or damages of a serious character requiring prompt action, the estimated cost of the repair of which exceeds Fifty Dollars, the head of department, board or committee in charge of such building may cause such immediate repairs to be made as are necessary for the preservation of life or property without procuring competitive bids therefor; providing that each

claim for work or materials furnished shall have attached to it, previous to its audit, the certificate of the officer, board or committee authorizing the same, setting forth the nature of the emergency. No such claim shall be paid without such certificate.

SECTION 6. Notification that bids will be received for furnishing things to be purchased, or for furnishing required work and materials for repairs to public buildings, shall be given in the following manner: 1, in all cases where the estimated cost of the same exceeds Five Hundred Dollars by public advertisement, not to exceed three insertions, in some one or more daily newspapers published in the city of New Bedford; 2, in cases where the estimated cost is under Five Hundred Dollars, either by aforesaid newspaper advertisement or by circular letter sent to a sufficient number of persons engaged in the business of furnishing the things, work or materials required as will ensure active competition; 3, in all cases, by publication on a bulletin board located in some conspicuous place in the municipal office building. Every notice inviting bids shall provide: That said bids shall be publicly opened at a specified hour on a specified day, at a place to be named in the notice; and that the city reserves the right to reject any or all bids.

SECTION 7. The head of department, board or committee charged with making purchases, or with procuring materials for the repair of public buildings, shall make return to the City Auditor of all bids obtained in competition in every case where bids are invited, together with a copy of every contract made in consequence of such bids. A copy of every such contract shall be filed with the City Clerk.

SECTION 8. Nothing herein contained shall be construed to, in any way, extend or enlarge the general or specific powers of any heads of departments, boards or committees, with respect to their authority to incur indebtedness or authorize expenditures, and in all cases the powers of persons acting for the city shall be expressly limited to the terms of their authorization as defined by the City Council.

SECTION 9. It is hereby made the duty of the persons who shall receive bids pursuant to the provisions of this ordinance to commit the order for the service or things to be furnished to the bidder whose offer shall be for the best interests of the city.

SECTION 10. All persons are prohibited from incurring any indebtedness purporting to bind the city of New Bedford contrary to the terms of this ordinance; the approval for audit of any such claim is forbidden; same shall not, in any event, be certified for payment by the City Auditor; penalty for breach of this ordinance shall be Twenty Dollars.

In Common Council, December 22, 1910.

Passed to be ordained,

D. HERBERT COOK, President.

In Board of Aldermen, December 22, 1910.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

Approved December 24, 1910.

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

DANIEL B. LEONARD, City Clerk.

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND ELEVEN.

AN ORDINANCE

REPEALING AN ORDINANCE APPROVED FEBRUARY 10, 1908, RELATIVE
TO THE OFFICE OF CITY MESSENGER AND CLERK OF COMMITTEES.

*Be it Ordained by the City Council of the City of New Bedford as
follows:*

SECTION 1. The ordinance of the city of New Bedford, approved February 10, 1908, and entitled "An Ordinance Establishing the Office of City Messenger and Clerk of Committees and Defining the Duties of Said Officer," is hereby repealed.

SECTION 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, April 13, 1911.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

In Common Council, April 13, 1911.

Passed to be ordained,

D. HERBERT COOK, President.

Approved, April 13, 1911.

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND ELEVEN.

AN ORDINANCE

ESTABLISHING THE OFFICE OF CLERK OF COMMITTEES AND DEFINING
THE DUTIES OF SAID OFFICER.*Be it Ordained by the City Council of the City of New Bedford as follows:*

SECTION 1. The office of Clerk of Committees is hereby established. A suitable person shall be elected as Clerk of Committees, annually, in April, by the City Council in convention.

The Clerk of Committees shall be the clerk of all committees, standing or special, of the City Council or either branch thereof. He shall make proper records, in books provided by the city, and kept for that purpose, of all proceedings and transactions of said committees, shall have the care and custody of all books and papers belonging to said committees; and shall keep them in a safe and convenient place provided by the city; shall cause notices of meetings to be served upon the members of all committees when requested so to do by the Mayor, chairman, or a majority of the members of any such committee.

SECTION 2. The salary of the Clerk of Committees shall be provided from such municipal account or accounts as the City Council shall determine.

SECTION 3. This ordinance shall take effect upon its passage.

In Board of Aldermen, April 13, 1911.

Passed to be ordained.

CHAS. S. ASHLEY, Mayor.

In Common Council, April 13, 1911.

Passed to be ordained.

D. HERBERT COOK, President.

Approved: April 13, 1911.

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

W. H. B. REMINGTON, City Clerk.

ORDINANCES.

7

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND ELEVEN.

AN ORDINANCE

ESTABLISHING THE OFFICE OF CITY MESSENGER AND DEFINING THE DUTIES OF SAID OFFICER.

Be it Ordained by the City Council of the City of New Bedford as follows:

SECTION 1. There shall be appointed in the current month of April, by the Mayor, subject to confirmation by the City Council in joint convention, a City Messenger, who shall hold his office for the balance of this calendar year and until his successor is duly chosen and qualified.

Hereafter, in January of each year, there shall be appointed and confirmed in the same manner a City Messenger, who shall hold his office for the term of one year thereafter and until his successor is duly chosen and qualified.

SECTION 2. The City Messenger shall in general perform all services required by the Mayor or either branch of the City Council. He shall have the custody of the municipal building used for city offices, and such other municipal buildings as the Mayor may from time to time direct. He shall employ and have charge of such janitor service as may be necessary for the proper care of such buildings, and shall purchase all janitors' supplies. He shall serve notices of meetings of the City Council or either branch thereof when requested so to do by the Mayor.

SECTION 3. The salary of the City Messenger shall be provided from such municipal account or accounts as the City Council shall determine.

SECTION 4. This ordinance shall take effect upon its passage.

In Board of Aldermen, April 13, 1911.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

In Common Council, April 13, 1911.

D. HERBERT COOK, President.

Approved: April 13, 1911.

CHAS. S. ASHLEY, Mayor.

A true copy, attest:

W. H. B. REMINGTON, City Clerk.

CITY OF NEW BEDFORD.

IN THE YEAR ONE THOUSAND NINE HUNDRED AND ELEVEN.

AN ORDINANCE

AMENDING AN ORDINANCE PROVIDING FOR A SYSTEM OF COMPETITIVE
BIDS.*Be it Ordained by the City Council of the City of New Bedford as follows:*

SECTION 1. An ordinance entitled "An ordinance providing for a system of competitive bids for purchases and construction work required by the several departments," passed to be ordained December 22, 1910, and approved by the Mayor December 24, 1910, is hereby amended by the addition thereto, after Section 10 of said ordinance, of a new section to be called "Section 11," which said section shall read as follows: viz.:

"SECTION 11. No bid for construction work shall be opened until the expiration of at least ten days from and after the invitation for bids was issued."

SECTION 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, June 29, 1911.

Passed to be ordained,

CHAS. S. ASHLEY, Mayor.

In Common Council, June 29, 1911.

Passed to be ordained,

D. HERBERT COOK, President.

Presented to and approved by the Mayor June 30, 1911.

A true copy, attest:

W. H. B. REMINGTON, City Clerk.
